Based on advanced technological capabilities, our Dynatrace-Associate study materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied Dynatrace-Associate Exam guides to them. Our Dynatrace-Associate exam prepare is definitely better choice to help you go through the Dynatrace-Associate test. Buy our Dynatrace-Associate exam questions, the success is just ahead of you.

Dynatrace Associate Certification Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

What are the different Event Categories in Dynatrace?

- A. Availability, Error, Slowdown, Resource
- B. Critical, Error, Warning, Info
- C. Monitoring Unavailable, Availability, Error, Slowdown, Resource, Custom, Info
- D. Critical, Availability, Error, Slowdown, Resource, Warning, Custom, Info

Answer: C

Explanation:

Dynatrace event categories include:

- * Availability
- * Error
- * Slowdown
- * Resource
- * Custom
- * Info
- * Monitoring Unavailable

These categories define different types of detected issues.

Critical and Warning are severity levels, not categories.

Reference: Based on official Dynatrace University training materials on problem detection.

NEW QUESTION # 57

What type of User Actions exists?

- A. Click Actions
- B. Custom Actions
- C. Load Actions
- D. XHR Actions

Answer: B,C,D

Explanation:

Dynatrace defines three main types of user actions:

- * Load Actions - full page loads
- * XHR Actions - background requests (AJAX/fetch)
- * Custom Actions - user-defined actions

Click Actions are not a separate action type; clicks are typically captured within other action types such as load or custom actions.

Reference: Based on official Dynatrace University training materials on Real User Monitoring.

NEW QUESTION # 58

I want to reduce the mean-time-to-identify critical security vulnerabilities in my environment by sending a notification to the correct team's Slack channel when detected. How can I achieve this?

- A. Application Security app
- **B. Workflow with an Event Trigger, Ownership and Slack integration**
- C. Manually check the Problems page
- D. Manually check the Security Vulnerability page

Answer: B

Explanation:

Dynatrace enables automated response through Workflows :

- * Event triggers detect security issues
- * Ownership ensures the correct team is identified
- * Slack integration sends notifications automatically

This automation significantly reduces detection and response time.

Manual checking options do not meet the requirement for automation.

Reference: Based on official Dynatrace University training materials on workflows and automation.

NEW QUESTION # 59

Which of the following data points can be found within a User Session?

- **A. Session and Action Properties**
- **B. JavaScript and Request errors**
- **C. User Tags**
- D. Server side code level insights
- **E. User Actions**

Answer: A,B,C,E

Explanation:

A User Session in Dynatrace contains detailed information about user interactions and experience:

- * User Tags - custom identifiers assigned to users
- * Session and Action Properties - metadata describing session behavior
- * JavaScript and Request Errors - frontend and backend errors impacting the session
- * User Actions - all interactions such as clicks, page loads, and XHR calls Server-side code-level insights are not directly part of the user session view; they belong to service-level and distributed tracing analysis.

Reference: Based on official Dynatrace University training materials on Real User Monitoring and user sessions.

NEW QUESTION # 60

Which of the following Synthetics simulate a user loading a single webpage?

- A. HTTP monitor
- **B. Single-URL browser monitors**
- C. Ping test
- D. Browser clickpaths
