

Valid AD0-E725 Test Dumps, Test AD0-E725 Practice

What's more, part of that TestsDumps AD0-E725 dumps now are free: https://drive.google.com/open?id=1urMeL7d_qwT7uDuUWLonDpQk2lt7SxIZ

It has similar specifications to the Adobe AD0-E725 desktop-based practice exam software, but it requires an internet connection. Our Adobe AD0-E725 practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late. This kind of approach is great for complete and flawless Adobe AD0-E725 Test Preparation.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.
Topic 2	Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
Topic 3	Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 4	External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I/O events and webhooks to create automated and connected business processes.

Test AD0-E725 Practice & Authorized AD0-E725 Exam Dumps

In order to help you save more time, we will transfer AD0-E725 test guide to you within 10 minutes online after your payment and guarantee that you can study these AD0-E725 training materials as soon as possible to avoid time waste. We believe that time is the

most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Here are some advantages of our AD0-E725 study question and we would appreciate that you can have a look to our AD0-E725 questions.

Adobe Commerce Developer Expert Sample Questions (Q22-Q27):

NEW QUESTION # 22

An Adobe Commerce Expert is tasked with implementing a custom condition on salable quantity with reservations. The condition needs to be applicable only when added to cart.

Which option should the Developer implement?

- A. XML

```
<preference for="
Magento\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC type="
Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsCo
/>
```
- B. XML

```
<type name="Magento\InventoryApi\Model\Stock\ValidatorChain">
<arguments>
<argument name="validators" xsi:type="array">
<item name="is_salable_with_reservations" xsi:type="object"
>Vendor\InventorySales\Model\Stock\Validator\IsSalableWithReservationsValidator</item>
</argument>
</arguments>
</type>
```
- C. XML

```
<virtualType name="IsProductSalableForRequestedQtyConditionChainOnAddToCart">
<arguments>
<argument name="conditions" xsi:type="array">
<item name="is_salable_with_reservations" xsi:type="array">
<item name="object" xsi:type="object"
>Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC
/item>
</item>
</argument>
</arguments>
</virtualType>
```

Answer: C

NEW QUESTION # 23

A Developer needs to set up a message queue topic in Adobe Commerce to asynchronously handle order processing. Which XML file should the Developer use to configure this?

- A. queue_topology.xml
- B. queue_consumer.xml
- C. communication.xml

Answer: A

NEW QUESTION # 24

A Developer discovers that inline scripts are no longer working. This issue occurred after upgrading to the latest version of Adobe Commerce. When checking the console, the errors indicate that the scripts are not allowed to execute.

The following is an example script:

```
<div id="action-div" onclick="someComponent('title')>Action</div>
```

How should the Developer adapt the script to run properly according to security practices?

- A.

```
<?php echo $escaper->renderSecureTag('<div id="action-div" onclick="someComponent(\'title\')'
>Action</div>'); ?>
```

- B. `<?php echo $secureRenderer->renderEventListenerAsTag('onclick', 'someComponent(\'title\')', '#action-div'); ?>`
- C. `<?php echo $block->renderAllowedElement('<div id="action-div" onclick="someComponent(\'title\')">Action</div>'); ?>`

Answer: B

Explanation:

Since Magento 2.3.5, inline JavaScript is restricted by default due to stricter Content Security Policy (CSP) enforcement.

Developers must use the SecureHtmlRenderer class to safely render inline event listeners.

Option C correctly uses \$secureRenderer->renderEventListenerAsTag() to safely attach the onclick event listener to #action-div.

Options A and B are invalid or unsupported for this purpose.

Adobe Commerce DevDocs - Secure HTML rendering

NEW QUESTION # 25

An Adobe Commerce Expert is tasked with implementing a custom condition on salable quantity with reservations. The condition needs to be applicable only when added to cart.

Which option should the Developer implement?

- A. `<virtualType name="IsProductSalableForRequestedQtyConditionChainOnAddToCart">
<arguments>
<argument name="conditions" xsi:type="array">
<item name="is_salable_with_reservations" xsi:type="array">
<item name="object" xsi:type="object"
>Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC
/item>
</item>
</argument>
</arguments>
</virtualType>`
- B. `<preference for="Magento\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC type="Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsCo />`
- C. `<type name="Magento\InventoryApi\Model\Stock\ValidatorChain">
<arguments>
<argument name="validators" xsi:type="array">
<item name="is_salable_with_reservations" xsi:type="object"
>Vendor\InventorySales\Model\Stock\Validator\IsSalableWithReservationsValidator</item>
</argument>
</arguments>
</type>`

Answer: A

Explanation:

To add a custom salable quantity condition for use only during the add-to-cart flow, developers must extend the IsProductSalableForRequestedQtyConditionChainOnAddToCart virtual type. This chain is designed specifically for cart validation, ensuring the new condition runs only at that stage.

A would override the core class completely, not scoped to add-to-cart.

B relates to stock validator chains, not salable quantity conditions.

C is correct: defining a virtual type extension ensures proper conditional logic for reservations during cart validation.

Adobe Commerce DevDocs - MSI salable quantity conditions

NEW QUESTION # 26

While implementing additional functionality, a Developer needs to modify a class with protected and private methods requiring custom logic. The Developer finds that no other Magento customization, such as plugins, will work.

What should the Developer do in this scenario?

- Answer: C**
