많은 사이트에서SAP 인증C_SIGVT_2506 인증시험대비자료를 제공하고 있습니다. 그중에서 Itexamdump를 선택한 분들은SAP 인증C_SIGVT_2506시험통과의 지름길에 오른것과 같습니다. Itexamdump는 시험에서 불합격성적표를 받으시면 덤프비용을 환불하는 서

SAP C_SIGVT_2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.
주제 2	<ul style="list-style-type: none"> Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.
주제 3	<ul style="list-style-type: none"> Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.
주제 4	<ul style="list-style-type: none"> Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.
주제 5	<ul style="list-style-type: none"> Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.

SAP C_SIGVT_2506 최신 기출문제 & C_SIGVT_2506 합격보장 가능 덤프 공부

Itexamdump는 SAP C_SIGVT_2506 시험에 필요한 모든 문제유형을 커버함으로서 SAP C_SIGVT_2506 시험을 합격하기 위한 최고의 선택이라 할 수 있습니다. SAP C_SIGVT_2506 시험 Braindump를 공부하면 학원다니지 않으셔도 자격증을 취득할 수 있습니다. SAP C_SIGVT_2506 덤프 정보 상세보기는 이 글의 링크를 클릭하시면 Itexamdump 사이트에 들어오실 수 있습니다.

최신 SAP Certified Associate C_SIGVT_2506 무료 샘플문제 (Q28-Q33):

질문 # 28

What transformation method does SAP Signavio use to offer fast insights with minimal setup?

- A. Lift and Shift
- B. Extend and Merge
- C. Clone and Execute
- **D. Plug and Gain**

정답: D

설명:

SAP Signavio's Plug and Gain approach is designed to provide organizations with rapid process insights without requiring extensive configuration or long deployment cycles. The method allows companies to connect their SAP systems to Signavio in a streamlined manner so the platform can immediately begin analyzing transactional data, identifying performance gaps, and revealing improvement opportunities. This makes it particularly valuable during early stages of transformation, when leadership needs fast visibility into system performance and process inefficiencies.

Plug and Gain eliminates the need for heavy upfront modeling or manual data migration. Instead, it leverages automated data integration and prebuilt best-practice process models to start generating insights almost immediately. As a result, companies can accelerate their discovery phase, understand current process behavior, and prepare for fit-to-standard workshops much more efficiently.

Options A, C, and D refer to general transformation concepts that are not tied to SAP Signavio's methodology. Plug and Gain is the only method specifically developed for Signavio to offer quick, meaningful insights with minimal effort. It supports transformation readiness by helping teams identify high-priority areas early and align their process improvement initiatives with quantifiable data.

질문 # 29

SAP LeanIX Fact Sheets can represent which of the following?

- A. RACI Matrices
- B. Survey Forms
- C. Audit Logs
- **D. Application, interfaces, and capabilities**

정답: D

질문 # 30

What is the primary role of the SAP Business Technology Platform?

(2 correct answers)

- A. To provide a platform for onboarding suppliers
- **B. To provide integration with third-party ecosystems**
- **C. To enable application extension with technologies like machine learning and AI**
- D. To serve as the underlying technology platform for SAP S/4HANA

정답: B,C

설명:

SAP Business Technology Platform (SAP BTP) is designed to be the central innovation and integration layer within SAP's cloud strategy. One of its key roles is to provide integration with third-party ecosystems.

BTP offers a comprehensive integration suite that includes API management, data services, event-driven architecture, and over a thousand prebuilt connectors. This enables seamless communication between SAP applications and external systems, supporting end-to-end processes that extend beyond the SAP landscape.

Organizations rely on this capability to unify their heterogeneous IT environments without modifying the SAP core system.

Another primary role of BTP is to enable application extensions enhanced by machine learning, AI, automation, and low-code/no-code development tools. Through services such as SAP Build, SAP AI Core, workflow automation, and analytics, businesses can create intelligent extensions that improve efficiency and innovate rapidly. These extensions run on the platform independently from SAP S/4HANA, ensuring that the core system remains clean, upgradeable, and stable.

Options B and C do not represent the main purpose of BTP. S/4HANA runs on SAP HANA, not BTP, and onboarding suppliers is a procurement-specific capability typically handled by SAP Ariba-not BTP. Thus, integration capabilities and intelligent extensibility are the two correct primary roles.

질문 # 31

What is the significance of data privacy compliance in a clean core strategy?

- A. It focuses on data duplication
- B. It eliminates the need for data archiving
- C. It ensures data is stored and processed only for justifiable purposes
- D. It allows unrestricted access to all data

정답: C

설명:

Data privacy compliance is an essential element of SAP's clean core strategy because it ensures that an organization manages data responsibly and in accordance with legal and regulatory requirements. In a clean core environment, systems must support standardized handling of personal, sensitive, and business-critical data. This includes ensuring that data is collected, stored, accessed, and processed only for valid business purposes that comply with regulations such as GDPR or local data protection laws.

Maintaining proper data privacy also reduces risk during upgrades and transformations. Clean core principles emphasize minimizing custom data handling logic, which reduces the chances of unauthorized access or non-compliant processing. By adhering to standardized data frameworks and extension patterns, organizations limit the potential for data misuse and maintain clear control over data lineage and retention policies.

Options A and D contradict privacy best practices-unrestricted access and eliminating archiving would create major compliance issues. Option C addresses operational concerns but is unrelated to privacy.

Therefore, the correct significance is that data privacy compliance ensures data is processed lawfully, purposefully, and responsibly within a clean core ecosystem.

질문 # 32

What component enables application development and integration in the toolchain?

- A. SAP GUI
- B. SAP Business Technology Platform and SAP Build
- C. SAP S/4HANA
- D. SAP HANA Studio

정답: B

설명:

SAP Business Technology Platform (BTP), together with SAP Build, provides the infrastructure for creating extensions, integrations, and custom applications while preserving a clean core. BTP includes integration services, event-driven architecture, workflow automation, and low-code/no-code tools. This enables customers to extend SAP S/4HANA without modifying the core system. The other tools do not serve as the primary integration or extension platform in modern cloud transformation.
