PSM-I exam comprises 80 multiple-choice questions that must be answered within 60 minutes. The questions cover various aspects of Scrum, including roles, artifacts, events, and the Scrum framework.

## Scrum Professional Scrum Master I Sample Questions (Q118-Q123):

### NEW QUESTION # 118

A Scrum Team has been working on a product for nine Sprints. A new Product Owner comes in, understanding he is accountable for the Product Backlog. However, he is unsure about his responsibilities.

Which two activities are part of the Product Owner role according to Scrum? (Choose two.)

- A. Describing features as Use Cases.
- **B. Ensuring that the most valuable functionality is produced first, at all times.**
- **C. Interacting with stakeholders.**
- D. Creating detailed functional test cases.
- E. Providing the Development Team with detailed specifications.

**Answer: B,C**

### NEW QUESTION # 119

A Development Team selects a set of Product Backlog items for a Sprint Backlog with the intent to get the selected items "Done" by the end of the Sprint. Which three phrases best describe the purpose of a definition of "Done"? (Choose three.)

- **A. It creates transparency over the work inspected at the Sprint Review.**
- **B. It tracks the percent completeness of a Product Backlog item.**
- C. It guides the Development Team in creating a forecast at the Sprint Planning.
- **D. It defines what it takes for an Increment to be ready for release.**
- E. It controls whether the developers have performed their tasks.
- F. It provides a template for elements that need to be included in the technical documentation.

**Answer: A,B,D**

### NEW QUESTION # 120

Which of the following best describes an increment of working software?

- A. A decomposition of all Product Backlog items into tasks for future Sprint Backlog lists.
- B. UML diagrams that describe how to deliver functionality in future iterations.
- **C. Additional features in a usable state that complement those delivered in previous iterations.**
- D. A new user interface design for functionality delivered in previous iterations.
- E. An automated test suite to verify functionality delivered in previous iterations.

**Answer: C**

Explanation:

According to the Scrum Guide<sup>1</sup>, an Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, an Increment must be usable. Multiple Increments may be created within a Sprint. The sum of the Increments is presented at the Sprint Review thus supporting empiricism. However, an Increment may be delivered to stakeholders prior to the end of the Sprint. The Sprint Review should never be considered a gate to releasing value. Therefore, the best description of an increment of working software is additional features in a usable state that complement those delivered in previous iterations.

### NEW QUESTION # 121

Developers are self-managing, which of the following do they manage? (choose the best answer)

- A. Sprint Backlog
- B. Stakeholders for the Sprint Review
- C. Sprint length
- D. Product Backlog ordering
- E. When to release, based on this progress.

**Answer: A**

Explanation:

According to the Scrum Guide, Developers are self-managing, which means that they manage their own Sprint Backlog. They decide how to organize their work and collaborate effectively to deliver a valuable Increment that meets the Definition of Done and the Sprint Goal. The other options are not valid, as they imply that Developers manage things that are either determined by the Scrum framework (such as Sprint length), by collaboration with other roles (such as when to release or stakeholders for the Sprint Review), or by the Product Owner (such as Product Backlog ordering).

### NEW QUESTION # 122

The Scrum Master observes the Product Owner struggling with ordering the Product Backlog. What is an appropriate action for the Scrum Master to take?

- A. Encourage the Product Owner to work with the Development Team to see which items technically are fastest to implement.
- B. Suggest the Product Owner extend the Sprint, so he can have more time to order the Product Backlog.
- C. Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize value.
- D. Present the Product Owner with an ordered Product Backlog to use.
- E. Suggest that the Development Team does the ordering to be sure that it is a feasible ordering of work.

**Answer: E**

### NEW QUESTION # 123
