We always learned then forget, how to solve this problem, the answer is to have a good memory method, our AZ-305 exam question will do well on this point. Our AZ-305 real exam materials have their own unique learning method, abandon the traditional rote learning, adopt diversified memory patterns, such as the combination of text and graphics memory method, to distinguish between the memory of knowledge. Our AZ-305 learning reference files are so scientific and reasonable that you can buy them safely.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q232-Q237):

NEW QUESTION # 232

You are evaluating whether to use Azure Traffic Manager and Azure Application Gateway to meet the connection requirements for App1.

What is the minimum numbers of instances required for each service? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure Traffic Manager:

Azure Application Gateway:

Answer:

Explanation:

Azure Traffic Manager:

Azure Application Gateway:

Explanation

Answer Area

Azure Traffic Manager: ▼

Azure Application Gateway: ▼

NEW QUESTION # 233

You plan to develop a new app that will store business critical data

- a. The app must meet the following requirements:
- * Prevent new data from being modified for one year.
 - * Maximize data resiliency.
 - * Minimize read latency.

What storage solution should you recommend for the app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

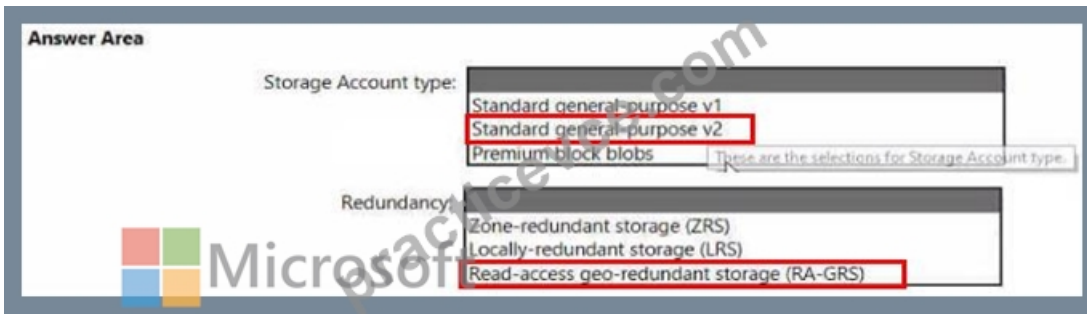

Answer Area

Storage Account type:

Redundancy:

Answer:

Explanation:

NEW QUESTION # 234

You have an on-premises network.

You have an Azure subscription.

You plan to centralize the collection and analytics of Azure and on-premises resources by using Log Analytics.

You are evaluating the cost implications of using the Basic log data plan versus the Analytics log data plan.

What will increase costs by using the Basic log data plan, and what will reduce costs by using the Basic log data plan? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 235

Your company deploys several Linux and Windows virtual machines (VMs) to Azure. The VMs are deployed with the Microsoft Dependency Agent and the Log Analytics Agent installed by using Azure VM extensions.

On-premises connectivity has been enabled by using Azure ExpressRoute.

You need to design a solution to monitor the VMs.

Which Azure monitoring services should you use? To answer, select the appropriate Azure monitoring services in the answer area.

NOTE: Each correct selection is worth one point.

Analyze Network Security Group (NSG) flow logs for VMs attempting Internet access.

Visualize the VMs with their different processes and dependencies on other computers and external processes.

Azure Monitoring Service

- Azure Traffic Analytics
- Azure ExpressRoute Monitor
- Azure Service Endpoint Monitor
- Azure DNS Analytics

- Azure Service Map
- Azure Activity Log
- Azure Service Health
- Azure Advisor

Answer:

Explanation:

The screenshot shows the Azure Monitoring Service interface. On the left, there is a 'Scenario' section with the text: 'Analyze Network Security Group (NSG) flow logs for VMs attempting Internet access.' and 'Visualize the VMs with their different processes and dependencies on other computers and external processes.' On the right, there are two dropdown menus under the heading 'Azure Monitoring Service'. The first dropdown menu is open, showing a list of services: Azure Traffic Analytics, Azure ExpressRoute Monitor, Azure Service Endpoint Monitor, and Azure DNS Analytics. The second dropdown menu is also open, showing a list of services: Azure Service Map, Azure Activity Log, Azure Service Health, and Azure Advisor.

Explanation

Graphical user interface, text, application Description automatically generated

Analyze Network Security Group (NSG) flow logs for VMs attempting Internet access.

Visualize the VMs with their different processes and dependencies on other computers and external processes.

- Azure Traffic Analytics
- Azure ExpressRoute Monitor
- Azure Service Endpoint Monitor
- Azure DNS Analytics

- Azure Service Map
- Azure Activity Log
- Azure Service Health
- Azure Advisor

Box 1: Azure Traffic Analytics

Traffic Analytics is a cloud-based solution that provides visibility into user and application activity in cloud networks. Traffic analytics analyzes Network Watcher network security group (NSG) flow logs to provide insights into traffic flow in your Azure cloud. With traffic analytics, you can:

- * Identify security threats to, and secure your network, with information such as open-ports, applications attempting internet access, and virtual machines (VM) connecting to rogue networks.
- * Visualize network activity across your Azure subscriptions and identify hot spots.
- * Understand traffic flow patterns across Azure regions and the internet to optimize your network deployment for performance and capacity.
- * Pinpoint network misconfigurations leading to failed connections in your network.

Box 2: Azure Service Map

Service Map automatically discovers application components on Windows and Linux systems and maps the communication between

services. With Service Map, you can view your servers in the way that you think of them: as interconnected systems that deliver critical services. Service Map shows connections between servers, processes, inbound and outbound connection latency, and ports across any TCP-connected architecture, with no configuration required other than the installation of an agent.

NEW QUESTION # 236

You have a Microsoft Dataverse instance named dv1 and an Azure Cosmos DB database named db1.

You need to develop a solution to update db1 automatically when a record is updated in dv1. The solution must minimize development effort.

What should you include in the solution?

- A. Azure App Service
- B. Azure Event Grid
- C. Azure Logic Apps
- D. Azure Functions

Answer: C

NEW QUESTION # 237

.....

We learned that a majority of the candidates for the AZ-305 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the AZ-305 exam. Taking this into consideration, we have tried to improve the quality of our AZ-305 training materials for all our worth. Now, I am proud to tell you that our AZ-305 Training Materials are definitely the best choice for those who have been yearning for success but without enough time to put into it. There are only key points in our AZ-305 training materials.
