Best of luck in the SAP C-ACDET-2506 exam and career!!!

## **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q57-Q62):**

#### NEW QUESTION # 57

A customer has requested that a Contracts field be added to an export event. After creating the field, assigning the appropriate check box in the advanced section, and publishing, this field still cannot be found in the export. What can be done to rectify this? Note: There are 2 correct answers to this question.

- A. The data definition needs to be refreshed.
- B. Custom fields cannot be added to import/exports.
- C. A custom visibility expression needs to be added stating isVisibleInExport == true.
- D. The field must be accepted and published in the data definition.

Answer: A,D

#### NEW QUESTION # 58

You need to revise a published form template. What steps do you follow?

- A. Create a new version, edit, test, and publish
- B. Edit directly in production
- C. Clone and change ID
- D. Delete and recreate

Answer: A

#### NEW QUESTION # 59

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? Note: There are 2 correct answers to this question.

- A. Relation and Relation Entries
- B. User to Group Mapping
- C. Enumerations
- D. Units of Measure

Answer: A,C

#### NEW QUESTION # 60

Which of the following master data types requires manual migration from Test to Production in a Greenfield migration?

- A. Translations
- B. Relations and relation entries
- C. Enumerations
- D. Clause Library

Answer: C

Explanation:

In SAP Ariba Greenfield deployments, Enumerations (picklist value lists) require manual migration because they are not included in Intelligent Configuration Manager (ICM) bundles. Enumerations must be manually exported from Test and imported into Production to ensure correct picklist values for fields that depend on them. Other master data types like Clause Library and Relations can be migrated using standard migration tools or processes. Translations are handled via AML & Translations Upload. Ensuring enumerations are migrated correctly is critical because missing or inconsistent enumerations can cause field validation errors and disrupt system usage.

#### NEW QUESTION # 61

Which syntax is used for writing custom Validity Conditions?

- A. Python
- B. XML
- **C. Regular expression**
- D. Scheme

**Answer: C**

Explanation:

SAP Ariba uses an expression language based on Object-Graph Navigation Language (OGNL) to define custom validity conditions on fields. Within these expressions, regular expressions (regex) are supported to perform complex pattern validations, such as validating email formats or custom string structures. Other programming languages like Python, Scheme, or XML are not supported for this purpose. The use of regular expressions within SAP Ariba's validity conditions provides powerful, flexible validation capabilities, allowing administrators to enforce data quality rules precisely at the field level, consistent with official SAP Ariba documentation on validation expressions.

## NEW QUESTION # 62

.....

Three different formats of C-ACDET-2506 exam study material are available at Exams-boost. These formats include C-ACDET-2506 dumps PDF files, desktop SAP C-ACDET-2506 practice exam software, and a web-based C-ACDET-2506 practice test. Professionals have designed the product according to the most recent syllabus of the C-ACDET-2506 test in mind. Let's find out the prominent features of these latest SAP C-ACDET-2506 exam questions format.

**C-ACDET-2506 Reliable Study Notes:** <https://www.exams-boost.com/C-ACDET-2506-valid-materials.html>
