Free PDF Quiz 2026 XK0-006: CompTIA Linux+ Certification Exam Newest Reliable Exam Pdf

Our XK0-006 PDF file is portable which means customers can carry this real questions document to any place. You just need smartphones, or laptops, to access this CompTIA Linux+ Certification Exam (XK0-006) PDF format. These CompTIA Linux+ Certification Exam (XK0-006) questions PDFs are also printable. So candidates who prefer to study in the old way which is paper

study can print XK0-006 PDF questions as well.

CompTIA Linux+ Certification Exam Sample Questions (Q61-Q66):

NEW QUESTION # 61

A Linux administrator is attempting to capture all network traffic coming to the server from the 10.0.6.5 IP address. Which of the following commands should the administrator run on the server to achieve the goal?

- A. `tcpdump ip 10.0.6.5`
- B. `tcpdump host 10.0.6.5`
- C. `tcpdump addr 10.0.6.5`
- D. `tcpdump net 10.0.6.5`

Answer: B

Explanation:

`tcpdump host 10.0.6.5` applies a Berkeley Packet Filter that matches any packets to or from the IP 10.0.6.5, capturing all traffic involving that host. The netqualifier is for entire subnets, ip isn't a valid filter keyword by itself, and addr is not recognized in `tcpdump`'s filter syntax.

NEW QUESTION # 62

A systems administrator needs to enable routing of IP packets between network interfaces. Which of the following kernel parameters should the administrator change?

- A. `net.ipv4.ip_forward`
- B. `net.ipv4.ip_local_port_range`
- C. `net.ipv4.ip_multicast`
- D. `net.ipv4.ip_route`

Answer: A

Explanation:

The `net.ipv4.ip_forward` kernel parameter controls whether the Linux kernel can forward IP packets between network interfaces, enabling routing functionality when set to 1.

NEW QUESTION # 63

A systems administrator wants to prevent the current contents of a file from being overwritten and wants to allow new additions at the end of the file. Which of the following commands should the administrator use?

- A. `chmod +t file`
- B. `setenforce file`
- C. `setfacl -m m:t file`
- D. `chattr +a file`

Answer: D

Explanation:

The `chattr +a` command sets the append-only attribute on a file. This prevents overwriting or deletion of existing contents, while still allowing new data to be appended to the end of the file.

NEW QUESTION # 64

A systems administrator receives reports about connection issues to a secure web server. Given the following firewall and web server outputs:

Which of the following commands best resolves this issue?

- A. `ufw delete deny https/tcp`
- B. `ufw allow 80/tcp`

- C. ufw allow 4096/tcp
- D. ufw disable

Answer: A

Explanation:

The firewall output shows that port 443/tcp (HTTPS) is explicitly denied, even though the web server is correctly listening on it. Removing the deny rule for HTTPS (ufw delete deny https/tcp) resolves the issue while still keeping the firewall active and secure.

NEW QUESTION # 65

A Linux administrator needs to securely erase the contents of a hard disk. Which of the following commands is the best for this task?

- A. sudo dd if=/dev/null of=/dev/sda1
- **B. sudo shred /dev/sda1**
- C. sudo rm -rf /dev/sda1
- D. sudo parted rm /dev/sda1

Answer: B

Explanation:

The shred command securely erases data by overwriting the specified device or file multiple times, making recovery nearly impossible. This is the best option for securely erasing a hard disk.

NEW QUESTION # 66

.....

As we all know that the higher position always ask for the more capable man. So your strength and efficiency will really bring you more job opportunities. You must complete your goals in the shortest possible time. How to make it? Our XK0-006 exam materials can give you a lot of help. Our XK0-006 Study Guide is famous for its high-effective and high-efficiency advantages. If you study with our XK0-006 practice engine, you can get the latest and specialized information in the subject and you will be rewarded with the certification.
