P.S. Free & New CMMC-CCA dumps are available on Google Drive shared by DumpsTorrent: <https://drive.google.com/open?id=1cWUGIYdtLrdXM7ebuDNTiv9cEeX0zBit>

Candidates are looking for valid CMMC-CCA questions which belong to CMMC-CCA urgently. If you need valid exam questions and answers, our high quality is standing out. We are confident that our CMMC-CCA training online materials and services are competitive. Every year we spend much money and labor relationship on remaining competitive. We are trying to offer the best high passing-rate CMMC-CCA Training Online materials with low price. Our exam materials will help you pass exam one shot without any doubt.

## Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.</li> </ul>

## Exam Cyber AB CMMC-CCA Discount & CMMC-CCA Flexible Testing Engine

The web-based Certified CMMC Assessor (CCA) Exam (CMMC-CCA) practice exam is accessible from any major OS. These Cyber AB CMMC-CCA exam questions are browser-based, so there's no need to install anything on your computer. Chrome, IE, Firefox, and Opera all support this Certified CMMC Assessor (CCA) Exam (CMMC-CCA) web-based practice exam. You can take this Certified CMMC Assessor (CCA) Exam (CMMC-CCA) practice exam without plugins and software installation.

## Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q66-Q71):

### NEW QUESTION # 66

As a CCA on a C3PAO Assessment Team, you have determined that the assessment scope provided by an OSC indicates plans to subcontract some elements of their contract to DeITech Inc. The OSC plans to bid on a DoD contract to develop guidance and targeting software. However, the software needs testing after installing a new surface-to-air defense system. Unfortunately, the OSC lacks the means to test the software, which is where DeITech comes in. As a CCA, what must you do in this scenario?

- A. Confirm that the OSC has flowdown requirements in their subcontract with DeITech Inc. and that DeITech is CMMC Certified at a level commensurate with the risk of information they will handle
- B. Assess DeITech Inc.'s CMMC compliance status
- C. Inform the OSC that they cannot subcontract
- D. Continue assessing the OSC's implementation of the CMMC practices

**Answer: A**

Explanation:

Comprehensive and Detailed in Depth Explanation:

DFARS 252.204-7012 requires subcontractors handling CUI (like DeITech testing software with CUI) to meet CMMC requirements via flowdown clauses. The CCA must confirm these clauses exist and that DeITech's certification matches the risk level (likely Level 2 for CUI), per CAP. Option A is incorrect- subcontracting is allowed with compliance. Option B exceeds the CCA's scope. Option C ignores subcontractor requirements. Option D is the correct answer.

Reference Extract:

\* DFARS 252.204-7012(b)(2):"Flow down CMMC requirements to subcontractors handling CUI."

\* CMMC Assessment Process (CAP) v1.0, Section 3.2:"Verify subcontractor certification aligns with information risk."Resources:<https://www.acquisition.gov/dfars/252.204-7012>;<https://cyberab.org/Portals/0/Documents/Process-Documents/CMMC-Assessment-Process-CAP-v1.0.pdf>

### NEW QUESTION # 67

During a CMMC Level 2 assessment, an OSC receives a Conditional Certification with several practices placed on a Plan of Action and Milestones (POA&M). After implementing corrective actions, the OSC requests the Assessment Team to conduct a POA&M Close-Out Assessment. Which of the following is the correct action for the Team's Lead Assessor during the POA&M Close-Out Assessment?

- A. Recommend the organization for CMMC Level 2 Final Certification if all POA&M items have been fully implemented and meet the required criteria.
- B. Recommend the organization for CMMC Level 2 Final Certification regardless of the POA&M items' impact on other practices.
- C. Recommend the organization reapply for CMMC Level 2 Certification, even if all POA&M items are fully implemented.
- **D. Recommend the organization for CMMC Level 2 Final Certification if all POA&M items are fully implemented and do not limit the effectiveness of other practices scored as 'MET' during the initial assessment.**

**Answer: D**

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP requires ensuring corrective actions do not impair 'MET' practices for Final Certification (Option A). Option B omits this, Option C ignores it, and Option D is unnecessary.

Extract from Official Document (CAP v1.0):

\* Section 3.4 - POA&M Closeout (pg. 35): "Recommend Final Certification only if all POA&M items are fully implemented and do not diminish the effectiveness of other 'MET' practices." References:

CMMC Assessment Process (CAP) v1.0, Section 3.4.

### NEW QUESTION # 68

In order to perform an interview, the Lead Assessor MUST ensure interview questions are:

- A. Yes/no questions
- **B. Asked to those who implement, perform, or support the practices**
- C. Asked with multiple people simultaneously to limit the number of interviews needed
- D. Asked by any member of the OSC's team

**Answer: B**

Explanation:

\* Applicable Requirement: CAP - Interview Guidance.

\* Why C is Correct: Interviews must be directed to personnel responsible for implementing, performing, or supporting practices to ensure accurate and objective evidence is collected.

\* Why Other Options Are Insufficient:

\* A: Yes/no questions do not provide sufficient evidence detail.

\* B: OSC personnel cannot ask themselves assessment questions; only assessors may conduct interviews.

\* D: Group interviews may be used in some cases, but CAP stresses targeted interviews for evidence reliability.

References (CCA Official Sources):

\* CMMC Assessment Process (CAP) v1.0 - Interview Requirements

\* NIST SP 800-171A - Use of Interview as an Assessment Method

### NEW QUESTION # 69

When a new employee is issued a laptop, only the user's credentials need to be set up. According to the IT department, the IT manager is the only person who can change laptop setup and user privileges. What documentation should be examined to determine if this is the case?

- A. Remote access procedures
- B. Acceptable use policy
- C. Inventory records
- **D. System audit logs**

**Answer: D**

Explanation:

\* Applicable Requirement: AC.L2-3.1.5 - "Employ the principle of least privilege, including for specific security functions and privileged accounts."

\* Why A is Correct: Audit logs document when privileged functions (such as account creation, privilege changes, or configuration changes) occur, who performed them, and whether access control restrictions are enforced. Reviewing logs is the only way to confirm the IT manager alone has the capability.

Why Other Options Are Insufficient:

\* B (Inventory records): Shows ownership, not privilege changes.

\* C (Acceptable use): Policy guidance, not enforcement evidence.

\* D (Remote access): Deals with remote connections, not privilege management.

References (CCA Official Sources):

\* NIST SP 800-171 Rev. 2 - AC.L2-3.1.5

\* NIST SP 800-171A - AC.L2-3.1.5 Assessment Methods

\* CMMC Assessment Guide - Level 2

### NEW QUESTION # 70

You decide to interview the IT security team to understand if and how a contractor has implemented audit failure alerting. You learn they have deployed AlienVault OSSIM, a feature-rich security information and event management (SIEM) tool. The SIEM tool has been configured to send automatic alerts to system and network administrators if an event affects the audit logging process. Alerts are generated for the defined events that lead to failure in audit logging and can be found in the notification section of the SIEM portal.

However, the alerts are sent to the specified personnel 24 hours after the occurrence of an event. As an assessor evaluating the implementation of AU.L2-3.3.4 - Audit Failure Alerting, which of the following would be a key consideration regarding the evidence provided by the contractor?

- A. Checking if the alert notification process integrates with third-party monitoring services
- B. Determining if the documented personnel roles for alert notification align with the organization's hierarchy
- C. Verifying that the types of audit logging failures defined cover a comprehensive range of potential scenarios
- D. Ensuring the defined alert notification methods (e.g., email, SMS) are secure and encrypted

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

AU.L2-3.3.4 requires "alerting personnel when audit logging fails." A 24-hour delay is concerning, but the key consideration is whether defined failure types (B) are comprehensive (e.g., software, hardware, capacity issues), ensuring effective detection. Notification methods (A), roles (C), and third-party integration (D) are secondary to failure coverage, per CMMC guidance.

Extract from Official CMMC Documentation:

\* CMMC Assessment Guide Level 2 (v2.0), AU.L2-3.3.4: "Verify defined failure types are comprehensive."

\* NIST SP 800-171A, 3.3.4: "Examine failure scenarios covered."
