#### NEW QUESTION # 165

What do Value Streams deliver?

- A. Solutions
- B. Agile Release Trains
- C. Strategic Themes
- D. Cyber-physical systems

**Answer: A**

### NEW QUESTION # 166

The teams on the ART just finished the second Iteration in the PI and have nothing to demonstrate at the System Demo. What steps should be taken next?

- A. Continue to work on new functionality and reserve time to fully integrate the system during the IP Iteration.
- B. Re-architect the system so that there are no dependencies between the teams, and integration is not needed
- C. Require every team to demonstrate their team increment to the stakeholders separately in the team branch
- D. Stop working on any new functionality and fully integrate and test the system; adjust scope based on learnings

#### Answer: D

Explanation:

SAFe recommends immediately integrating and testing the system when there is nothing to demonstrate, rather than continuing with new work. This helps surface integration issues early and allows for scope adjustment based on the learnings, supporting the principle of "integrating frequently" and "demonstrating working software."
