

Exam AI-900 Success - AI-900 Testdump

DOWNLOAD the newest TestPassKing AI-900 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1YVe9oc92_6SxNe0WftHnlPodlr_z8eQZ

All of our considerate designs have a strong practicability. We are still researching on adding more useful buttons on our AI-900 test answers. The aim of our design is to improve your learning and all of the functions of our products are completely real. Then the learning plan of the AI-900 exam torrent can be arranged reasonably. The scores are calculated by every question of the AI-900 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

The Microsoft AI-900 exam is designed to be taken by individuals who have a basic understanding of cloud computing and programming languages such as Python, R, or .NET. AI-900 exam is available in multiple languages, including English, French, German, Japanese, and Spanish, to cater to a global audience.

Microsoft AI-900, also known as Microsoft Azure AI Fundamentals Exam, is a certification exam that tests knowledge of artificial intelligence concepts and their applications in Microsoft Azure. AI-900 Exam is designed for individuals looking to gain an understanding of AI, its potential use cases, and how to leverage Azure AI services to build intelligent solutions.

High-quality Exam AI-900 Success offer you accurate Testdump | Microsoft Azure AI Fundamentals

To attempt the Microsoft AI-900 exam optimally and ace it on the first attempt, proper exam planning is crucial. Since the Microsoft Azure AI Fundamentals (AI-900) exam demands a lot of time and effort, we designed the Microsoft Azure AI Fundamentals (AI-900) exam dumps in such a way that you won't have to go through sleepless study nights or disturb your schedule. Before starting the Microsoft Azure AI Fundamentals (AI-900) preparation, plan the amount of time you will allot to each topic, determine the topics that demand more effort and prioritize the components that possess more weightage in the Microsoft Azure AI Fundamentals (AI-900) exam.

Microsoft Azure AI Fundamentals Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which parameter should you configure to produce more verbose responses from a chat solution that uses the Azure OpenAI GPT-3.5 model?

- A. Stop sequence
- **B. Presence penalty**
- C. Max response
- D. Temperature

Answer: B

NEW QUESTION # 30

Match the Azure Cognitive Services to the appropriate AI workloads.

To answer, drag the appropriate service from the column on the left to its workload on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Services	Answer Area
Custom Vision	Identify objects in an image.
Face	Automatically import data from an invoice to a database.
Form Recognizer	Identify people in an image.

Answer:

Explanation:

Services	Answer Area
Custom Vision	Identify objects in an image.
Form Recognizer	Automatically import data from an invoice to a database.
Face	Identify people in an image.

NEW QUESTION # 31

Match the services to the appropriate descriptions.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Services	Answer Area
Azure Storage	Enables the use of natural language to query a knowledge base.
Language Understanding (LUIS)	Enables the real-time transcription of speech-to-text.
QnA Maker	
Speech	

Answer:

Explanation:

Services	Answer Area
QnA Maker	Enables the use of natural language to query a knowledge base.
Language Understanding (LUIS)	Enables the real-time transcription of speech-to-text.

Explanation

Graphical user interface, application Description automatically generated.

Services

- Azure Storage
- Language Understanding (LUIS)
- QnA Maker
- Speech

Answer Area

- QnA Maker: Enables the use of natural language to query a knowledge base.
- Language Understanding (LUIS): Enables the real-time transcription of speech-to-text.

NEW QUESTION # 32

Match the services to the appropriate descriptions.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Services

- Azure Storage
- Language Understanding (LUIS)
- QnA Maker
- Speech

Answer Area

- Enables the use of natural language to query a knowledge base.
- Enables the real-time transcription of speech-to-text.

Answer:

Explanation:

Services

- Azure Storage
- Language Understanding (LUIS)
- QnA Maker
- Speech

Answer Area

- QnA Maker: Enables the use of natural language to query a knowledge base.
- Language Understanding (LUIS): Enables the real-time transcription of speech-to-text.

NEW QUESTION # 33

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Providing an explanation of the outcome of a credit loan application is an example of the Microsoft transparency principle for responsible AI.	<input type="radio"/>	<input type="radio"/>
A triage bot that prioritizes insurance claims based on injuries is an example of the Microsoft reliability and safety principle for responsible AI.	<input type="radio"/>	<input type="radio"/>
An AI solution that is offered at different prices for different sales territories is an example of the Microsoft inclusiveness principle for responsible AI.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Providing an explanation of the outcome of a credit loan application is an example of the Microsoft transparency principle for responsible AI.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
A triage bot that prioritizes insurance claims based on injuries is an example of the Microsoft reliability and safety principle for responsible AI.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
An AI solution that is offered at different prices for different sales territories is an example of the Microsoft inclusiveness principle for responsible AI.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Explanation:

Statement

Yes / No

Providing an explanation of the outcome of a credit loan application is an example of the Microsoft transparency principle for responsible AI.

Yes

A triage bot that prioritizes insurance claims based on injuries is an example of the Microsoft reliability and safety principle for responsible AI.

Yes

An AI solution that is offered at different prices for different sales territories is an example of the Microsoft inclusiveness principle for responsible AI.

No

This question is based on the Responsible AI principles defined by Microsoft, which are part of the AI-900 Microsoft Azure AI Fundamentals curriculum. Microsoft's Responsible AI framework consists of six key principles: Fairness, Reliability and Safety, Privacy and Security, Inclusiveness, Transparency, and Accountability. Each principle ensures that AI systems are developed and used in a way that benefits people and society responsibly.

* Transparency Principle - Yes Providing an explanation for a loan decision aligns with the Transparency principle. Microsoft defines transparency as helping users and stakeholders understand how AI systems make decisions. For example, when a credit scoring AI model approves or denies a loan, explaining the factors that influenced that outcome (such as credit history or income level) ensures that customers understand the reasoning process. This builds trust and supports responsible deployment.

* Reliability and Safety Principle - Yes A triage bot that prioritizes insurance claims based on injury severity relates directly to Reliability and Safety. This principle ensures AI systems operate consistently, perform accurately, and produce dependable outcomes. In the case of the triage bot, it must reliably assess the input data (injury descriptions) and rank claims appropriately to avoid harm or misjudgment, aligning with Microsoft's emphasis on designing AI systems that are safe and robust.

* Inclusiveness Principle - No An AI solution priced differently across sales territories is not related to Inclusiveness. Inclusiveness focuses on ensuring accessibility and eliminating bias or exclusion for all users-especially those with disabilities or underrepresented groups. Pricing strategy is a business decision, not an inclusiveness issue. Therefore, this statement is No.

In summary, based on the AI-900 Responsible AI principles, the correct selections are:

NEW QUESTION # 34

.....

Choosing our AI-900 exam quiz will be a wise decision that you make, because this decision may have a great impact in your future development. Having the AI-900 certificate may be something you have always dreamed of, because it can prove that you have certain strength. Our AI-900 Exam Questions can provide you with services with pretty quality and help you obtain a certificate. The quality of our AI-900 learning materials can withstand the test of practice.
