ExamCost is regarded as an acclaimed ISTQB-CTAL-TA dumps study material provider for certification exams that includes a range of helping materials, programs and pathways to ease your tensions of ISTQB-CTAL-TA exam preparation. The prime objective in developing ISTQB-CTAL-TA exam dumps is to provide you the unique opportunity of getting the best information in the possibly lesser content. It not only saves your time but also frees you from the hassle of going through tomes of books and other study material. Shorn of unnecessary burden, you better focus what is extremely important to pass exam; hence you increase your chances of success with ISTQB-CTAL-TA Exam Questions than other that of candidates.

Our ISTQB-CTAL-TA learning quiz can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality ISTQB-CTAL-TA exam materials may bring discredit on the company. Our ISTQB-CTAL-TA learning questions are undeniable excellent products full of benefits, so our ISTQB-CTAL-TA exam materials can spruce up our own image and our exam questions are your best choice.

## Examcollection ISTQB-CTAL-TA Dumps Torrent - ISTQB-CTAL-TA Reliable Test Topics

If you study with our ISTQB-CTAL-TA exam questions, then you will be surprised to find that our ISTQB-CTAL-TA training material is well-written and excellently-organised. That is because our experts fully considered the differences in learning methods and ISTQB-CTAL-TA examination models between different majors and eventually formed a complete review system. It will help you to Pass ISTQB-CTAL-TA Exam successfully after a series of exercises, correction of errors, and self-improvement. Our ISTQB-CTAL-TA exam questions contain everything you need to pass the exam.

## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q59-Q64):

### NEW QUESTION # 59
Which test technique is MOST closely associated with classification tree diagrams?
SELECT ONE OPTION

- A. State transition testing
- B. Equivalence partitioning
- C. Use case testing
- D. Decision table testing

**Answer: B**

Explanation:
Comprehensive and Detailed in Depth Explanation:
* Classification tree diagramsare used to visualize combinations of input classes or partitions, helping in identifying and selecting test cases.
* They are closely associated withEquivalence Partitioningbecause they help in identifying classes (partitions) and their combinations.
* State transition testing (A)involves states and transitions, not combinations of classes.
* Decision table testing (C)involves logical conditions and outcomes, rather than class combinations.
* Use case testing (D)focuses on user interactions and scenarios.
Therefore, the correct answer isB (Equivalence partitioning).

### NEW QUESTION # 60
Which ONE of the following test tools would MOST likely be used as part of test design?
SELECT ONE OPTION

- A. Coverage tools
- B. Comparison tools
- C. Classification tree tools
- D. Dynamic analysis tools

**Answer: C**

Explanation:
Comprehensive and Detailed in Depth Explanation:
* Classification tree toolsare specifically used during thetest designphase to visualize combinations of input data and generate test cases.
* Coverage tools (A)are used during test execution to measure how much of the code has been tested.
* Dynamic analysis tools (B)are used to find runtime issues, not during test design.
* Comparison tools (D)are used to compare expected and actual outputs during test execution.
Therefore, the correct answer isC (Classification tree tools).

### NEW QUESTION # 61
A tablet manufacturer offers the following options for its customers:
* Colour:Black, White, Silver, Gold
* Model:Standard, Mini, Pro
* Gigabytes:32, 64, 128, 256
* Connectivity:Wifi-only, Wifi+Cellular
When applying the pairwise test technique, how many TEST CASES would be needed to ensure that ALL pair combinations are tested?

SELECT ONE OPTION

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:
Comprehensive and Detailed in Depth Explanation:
Pairwise testing is a combinatorial test design technique in which test cases are designed to execute all possible discrete combinations of each pair of input parameters. This technique significantly reduces the number of test cases compared to exhaustive testing while still covering pairwise interactions.
To calculate the number of test cases:
* Colour: 4 options
* Model: 3 options
* Gigabytes: 4 options
* Connectivity: 2 options
Pairwise testing does not necessarily involve multiplying all options, as it aims to cover all pairs. Using an orthogonal array or pairwise tool, the minimum number of test cases that cover all pairs for these parameters is
16. Hence, the answer isC (16).

# NEW QUESTION # 62
What are ways in which classification trees support the application of pairwise testing?
a. They help to identify inputs to be used by the pairwise test technique b. They show the combinations needed to cover all-pairs c. They help to identify particular combinations of interest d. They show both typical and atypical behavior e. They show the expected results for the various test cases

- A. c and e
- B. a, b and c
- C. b and c
- D. b, d and e

**Answer: B**

Explanation:
Classification trees support the application of pairwise testing in the following ways:
a. They help to identify inputs to be used by the pairwise test technique - This is true because classification trees show the classes and subclasses of inputs for a given scenario in a graphical way.
b. They show the combinations needed to cover all-pairs - This is true because classification trees can be used to generate the combinations of inputs that cover all pairs using a mathematical algorithm.
c. They help to identify particular combinations of interest - This is true because classification trees can be used to highlight or prioritize certain combinations of inputs that are more relevant or important for the scenario.
d. They show both typical and atypical behavior - This is false because classification trees do not show the behavior or the expected results of the system under test, only the inputs and outputs.
e. They show the expected results for the various test cases - This is false because classification trees do not show the expected results or the verification criteria for the test cases, only the inputs and outputs. # NEW QUESTION # 63
Although usability is an important aspect for a new planning system, due to availability constraints, the usability evaluation shall be performed without Which of the following is a usability technique that can be applied in this situation?

- A. Usability lab sessions
- B. Usability survey
- C. Usability review, e.g., heuristic evaluation
- D. Usability prototyping

**Answer: C**

Explanation:
The usability technique that can be applied in this situation is usability review, e.g., heuristic evaluation.
Usability review is a technique that evaluates the usability of a system or component based on a set of criteria or guidelines, such as heuristics, standards, or checklists. Usability review can be performed without users, as it relies on the expertise and judgment of the reviewers.
