

Reliable NGFW-Engineer Test Testking - NGFW-Engineer Answers Free

2026 Latest ValidExam NGFW-Engineer PDF Dumps and NGFW-Engineer Exam Engine Free Share:
https://drive.google.com/open?id=1GLNvfW_Om5U2cQuJR52Qfl4mb6VjPRIS

Now are you in preparation for NGFW-Engineer exam? If so, you must be a man with targets. Our ValidExam are committed to help such a man with targets to achieve the goal. NGFW-Engineer exam simulation software developed by us are filled with the latest and comprehensive questions. If you buy our product, we will offer one year free update of the questions for you. With our software, passing NGFW-Engineer Exam will no longer be the problem.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.
Topic 2	<ul style="list-style-type: none">• PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active• active and active• passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPsec, quantum-resistant cryptography, and GRE tunnels.

Topic 3	<ul style="list-style-type: none"> • PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.

NGFW-Engineer Answers Free | NGFW-Engineer Reliable Dumps Questions

The ValidExam wants to win the trust of Palo Alto Networks NGFW-Engineer exam candidates at any cost. To fulfill this objective the ValidExam is offering top-rated and real NGFW-Engineer exam practice test in three different formats. These NGFW-Engineer Exam Question formats are PDF dumps, web-based practice test software, and web-based practice test software.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q44-Q49):

NEW QUESTION # 44

A PA-Series firewall with all licensable features is being installed. The customer's Security policy requires that users do not directly access websites. Instead, a security device must create the connection, and there must be authentication back to the Active Directory servers for all sessions.

Which action meets the requirements in this scenario?

- **A. Deploy the explicit proxy with Kerberos authentication scheme.**
- B. Deploy the Advanced URL Filtering license and captive portal.
- C. Deploy the Next-Generation Firewalls as normal and install the User-ID agent.
- D. Deploy the transparent proxy with Web Cache Communications Protocol (WCCP).

Answer: A

Explanation:

In this scenario, the customer requires that users do not directly access websites and that a security device (the firewall) manages the connection, while also ensuring that there is authentication back to the Active Directory (AD) servers for all sessions. The explicit proxy with Kerberos authentication is the best solution because:

The explicit proxy allows the firewall to intercept user web traffic and manage the connections on behalf of users.

Kerberos authentication ensures that the user's identity is validated against the Active Directory servers before the session is allowed, fulfilling the authentication requirement.

NEW QUESTION # 45

Which CLI command is used to configure the management interface as a DHCP client?

- A. set deviceconfig system type dhcp-client
- B. set network dhcp type management-interface
- C. set network dhcp interface management
- **D. set deviceconfig management type dhcp-client**

Answer: D

Explanation:

To configure the management interface as a DHCP client on a Palo Alto Networks NGFW, the correct CLI command is set deviceconfig management type dhcp-client. This command configures the management interface to obtain an IP address dynamically using DHCP.

NEW QUESTION # 46

What is a result of enabling split tunneling in the GlobalProtect portal configuration with the "Both Network Traffic and DNS" option?

- A. It specifies when the secondary DNS server is used for resolution to allow access to specific domains that are not managed by the VPN.
- B. It allows users to access internal resources when connected locally and external resources when connected remotely using the same FQDN.
- **C. It specifies which domains are resolved by the VPN-assigned DNS servers and which domains are resolved by the local DNS servers.**
- D. It allows devices on a local network to access blocked websites by changing which DNS server resolves certain domain names.

Answer: C

Explanation:

When split tunneling is enabled with the "Both Network Traffic and DNS" option in the GlobalProtect portal configuration, it allows the firewall to control which traffic is sent over the VPN tunnel and which is not. Specifically, it determines which domains are resolved by the VPN-assigned DNS servers (for domains requiring VPN access) and which are resolved by local DNS servers (for domains that can be accessed without the VPN tunnel).

NEW QUESTION # 47

During an upgrade to the routing infrastructure in a customer environment, the network administrator wants to implement Advanced Routing Engine (ARE) on a Palo Alto Networks firewall.

Which firewall models support this configuration?

- **A. PA-3260, PA-5410, PA-850, PA-460**
- B. PA-7050, PA-1420, VM-Series, CN-Series
- C. PA-5280, PA-7080, PA-3250, VM-Series
- D. PA-455, VM-Series, PA-1410, PA-5450

Answer: A

Explanation:

The Advanced Routing Engine (ARE) is supported on Palo Alto Networks firewalls that utilize the PAN-OS 11.0+ software and have the required hardware architecture. The supported models include PA-3200 Series, PA-5400 Series, PA-800 Series, and PA-400 Series. These models provide enhanced routing capabilities, including BGP, OSPF, and more complex routing policies. PA-3260 and PA-5410 are part of the PA-3200 and PA-5400 Series, which are known to support ARE. PA-850 and PA-460 are within the PA-800 and PA-400 Series, which also support ARE.

NEW QUESTION # 48

Which two actions in the IKE Gateways will allow implementation of post-quantum cryptography when building VPNs between multiple Palo Alto Networks NGFWs? (Choose two.)

- **A. Select IKE v2, enable the Advanced Options * PQ KEM, then create an IKE Crypto Profile with Advanced Options adding one or more "Rounds."**
- B. Ensure Authentication is set to "certificate," then import a post-quantum derived certificate.
- **C. Select IKE v2 Preferred, enable the Advanced Options * PQ KEM, then add one or more "Rounds."**
- D. Select IKE v2, enable the Advanced Options * PQ PPK, then set a 64+ character string for the post-quantum pre shared key.

Answer: A,C

Explanation:

To implement post-quantum cryptography (PQC) in VPNs between Palo Alto Networks NGFWs, you would enable the PQ KEM (Post-Quantum Key Encapsulation Mechanism) in the IKE gateway configuration. This enables the firewall to use quantum-resistant encryption for key exchange, which is an essential part of securing communications against the potential future threats posed by quantum computing.

By selecting IKE v2 Preferred and enabling the PQ KEM option under Advanced Options, you can add specific Rounds for the post-quantum cryptography process, which will help in implementing quantum-resistant key exchange methods.

This option similarly selects IKE v2 and enables PQ KEM while also creating a dedicated IKE Crypto Profile with the necessary Rounds configured for post-quantum cryptography.

NEW QUESTION # 49

.....

AS the most popular NGFW-Engineer learning braindumps in the market, our customers are all over the world. So the content of NGFW-Engineer exam questions you see are very comprehensive, but it is by no means a simple display. In order to ensure your learning efficiency, we have made scientific arrangements for the content of the NGFW-Engineer Actual Exam. Our system is also built by professional and specialized staff and you will have a very good user experience.
