High Pass-Rate XK0-006 Exam Blueprint | 100% Free XK0-006 PDF Questions

Our company has spent more than 10 years on compiling XK0-006 study materials for the exam in this field, and now we are delighted to be here to share our XK0-006 learnign guide with all of the candidates for the exam in this field. There are so many striking points of our XK0-006 Preparation exam. If you want to have a better understanding of our XK0-006 exam braindumps, just come and have a try!

CompTIA Linux+ Certification Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

Which of the following utilities supports the automation of security compliance and vulnerability management?

- A. SELinux
- B. Nmap
- **C. OpenSCAP**
- D. AIDE

Answer: C

Explanation:

OpenSCAP is a framework that automates security compliance checking and vulnerability management by using standardized security content (SCAP). It helps administrators enforce policies and detect vulnerabilities.

NEW QUESTION # 57

A Linux server is not starting up because files in the /boot/partition are corrupt. After the initial GRUB screen, the following message is displayed:

Probing EDD (edd=off to disable)... ok
uncompression error
--system halted

Which of the following steps should the Linux administrator take to recover the system without destroying the existing installation? (Choose two.)

- A. Replace the hard drive.
- B. Start up in single-user mode.
- C. Increase the amount of swap memory.
- D. Start up the system using rescue boot media.
- E. Reinstall the kernel packages.
- F. Reinstall the OS.

Answer: D,E

Explanation:

Using rescue boot media lets you boot the machine, mount the existing partitions, and access the corrupted /boot files without reinstalling the OS.

Reinstalling the kernel packages restores the missing or corrupt files in /boot (e.g., vmlinuz and initramfs), allowing GRUB to load and uncompress the kernel properly.

NEW QUESTION # 58

Which of the following best describes the role of initrd?

- A. It contains basic kernel modules and drivers required to start the system
- B. It is required to connect to the system via SSH.
- C. It is required to initialize a random device within a Linux system
- D. It contains trusted certificates and secret keys of the system

Answer: A

Explanation:

initrd (initial ramdisk) provides essential kernel modules and drivers (e.g., for storage and filesystems) needed during the early boot process before the root filesystem is mounted.

NEW QUESTION # 59

Which of the following commands should a Linux administrator use to determine the version of a kernel module?

- A. depmod bluetooth
- B. lsmod bluetooth
- C. modprobe bluetooth
- D. modinfo bluetooth

Answer: D

Explanation:

The modinfo command displays detailed information about a kernel module, including its version, author, description, and parameters.

NEW QUESTION # 60

A Linux administrator receives reports about MySQL service availability issues. The administrator observes the following information:

Which of the following explains why the server was offline?

- A. The process was intentionally terminated by a privileged user.
- B. The process exhausted server memory.

- C. A network outage caused a service availability issue.
- D. The process crashed because of a filesystem error.

Answer: B

Explanation:

The logs show mysqld invoked oom-killer, which is the Linux Out-Of-Memory (OOM) killer. This indicates MySQL consumed too much memory, forcing the kernel to terminate it to protect the system, which caused the service outage.

NEW QUESTION # 61

.....

In this Desktop-based CompTIA XK0-006 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the CompTIA Linux+ Certification Exam (XK0-006) practice exams according to the time and types of CompTIA Linux+ Certification Exam (XK0-006) practice test questions will contribute to your ease.
