Latest MTCNA Exam Dump Must Be a Great Beginning to Prepare for Your MTCNA Exam

What is more difficult is not only passing the Financials in MikroTik Certified Network Associate Exam (MTCNA) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the MikroTik Certified Network Associate Exam (MTCNA) certification. If you are going through the same tough challenge, do not worry because Lead2Passed is here to assist you.

MikroTik MTCNA Certification is an excellent starting point for anyone who wants to start their career in the field of networking. MikroTik Certified Network Associate Exam certification provides candidates with the skills and knowledge required to configure, manage, and troubleshoot a MikroTik RouterOS-based network. With this certification, candidates can demonstrate their expertise in MikroTik RouterOS and increase their chances of getting hired in the networking industry.

MTCNA Study Reference | MTCNA Reliable Exam Materials

Our MikroTik Certified Network Associate Exam (MTCNA) PDF file is portable which means customers can carry this real questions document to any place. You just need smartphones, or laptops, to access this MikroTik Certified Network Associate Exam (MTCNA) PDF format. These MikroTik Certified Network Associate Exam (MTCNA) questions PDFs are also printable. So candidates who prefer to study in the old way which is paper study can print MikroTik Certified Network Associate Exam (MTCNA) questions PDF as well.

MikroTik Certified Network Associate Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34
Can you manually add drivers to RouterOS in case your PCI Ethernet card is not recognized, and you suspect it is a driver issue?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 35
What command will display the line, protocol, DLCI, and LMI information of an interface?

- A. show run
- B. sh pvc
- C. show frame-relay pvc
- D. show interface

Answer: C

Explanation:
In Cisco IOS, to display detailed Frame Relay virtual circuit information, including the line status, protocol status, DLCI (Data Link Connection Identifier), and LMI (Local Management Interface) details, the correct command is:
show frame-relay pvc
Cisco IOS Command Reference - Frame Relay:
"The show frame-relay pvc command displays information about PVC status, including DLCI numbers and LMI statistics."
Breakdown:
* A: sh pvc - shorthand and ambiguous, may not be recognized
* B: show interface - general interface stats but lacks detailed LMI/DLCI info
* C: show frame-relay pvc -#correct, provides detailed DLCI/LMI info
* D: show run - shows current configuration, not real-time PVC status

NEW QUESTION # 36
Which of these are possible solutions to bridge two networks over a wireless link:

- A. One device in AP mode, another one in station
- B. One device in AP mode, another one in station-pseudobridge-clone
- C. Both devices in AP mode and enable WDS mode
- D. One device in AP mode, another one in station-pseudobridge

Answer: C

NEW QUESTION # 37
A client uses a RouterBOARD1000. The clock is configured in '/system clock'. The clock resets to default after each reboot. Select the best solution for the problem.

- A. Write a script in '/system script' to set the clock
- B. Configure '/system ntp server' and set a valid and reachable NTP client address
- C. Open the router and ensure the CMOS battery is fine
- D. Configure '/system ntp client' and set a valid and reachable NTP server address

Answer: D

Explanation:
RouterBOARD devices (such as RB1000) typically do not have a battery-backed hardware clock (RTC). This means the system time resets after each reboot. To keep time accurate, you must configure the router to synchronize with an external NTP (Network Time Protocol) server.
* A.#Inefficient and non-scalable solution.
* B.#The /system ntp server is used to act as an NTP server for others - not for receiving time.
* C.#Correct - You must enable /system ntp client and point to a reachable NTP server to get the correct time on boot.
* D.#Irrelevant - RouterBOARDs do not have CMOS batteries for timekeeping like traditional PCs.
Extract from MTCNA Course Material - Time Synchronization:
"To maintain correct system time, configure NTP client to sync with a public or internal time server after reboot." Extract from Rene Meneses Study Guide - Clock and Scheduler:
"RouterBOARD devices don't have battery-backed RTC. Use the NTP client to update time after reboot." Extract from MikroTik Wiki - NTP Setup:
"Use /system ntp client to sync time. /system clock alone will reset on reboot without NTP."

NEW QUESTION # 38
The basic unit of a physical network (OSI Layer 1) is the:

- A. Header
- B. Frame
- C. Byte
- D. Bit

Answer: D

Explanation:
The OSI Layer 1, also known as the Physical Layer, is responsible for the transmission and reception of raw binary data over a physical medium. The most fundamental unit at this layer is the bit.
* Bit = Binary Digit (0 or 1)
* It is transmitted over physical media (cables, radio signals, etc.)
* Frames (A) exist at Layer 2 (Data Link Layer), not Layer 1.
* Bytes (C) are groups of 8 bits, but bits are still the smallest indivisible transmission unit.
* Headers (D) are metadata used at Layers 2-7; not relevant to Layer 1.
MTCNA Official Training Manual - OSI Model Chapter:
"Layer 1 transmits raw bits over a transmission medium. These bits form the foundation for higher-layer data structures." Rene Meneses MTCNA Guide - OSI Model Breakdown:
"Physical Layer (Layer 1) carries bits, not frames or bytes. It's concerned with voltages, cables, connectors, and signal encoding."
Terry Combs Notes - OSI Layers:
"Layer 1 = Bits. Nothing more. Frames come into play in Layer 2."
answer: B

NEW QUESTION # 39
......

Lead2Passed MikroTik Certified Network Associate Exam (MTCNA) exam questions are the best because these are so realistic! It feels just like taking a real MTCNA exam, but without the stress! Our MTCNA Practice Test software is the answer if you want to score higher on your real MikroTik MTCNA certification exam and achieve your academic goals.
