

# 100% Pass High Hit-Rate CISSP - Certified Information Systems Security Professional (CISSP) Reliable Source

2026 Latest Exam4Docs CISSP PDF Dumps and CISSP Exam Engine Free Share: <https://drive.google.com/open?id=1U-NUrEGwHPncOoxwKCzHmUdaH91bOTxN>

For candidates who are going to buy CISSP learning materials online, they may have the concern about the money safety. We apply international recognition third party for payment, therefore if you choose us, your safety of money and account can be guaranteed. Moreover, we have a professional team to compile and verify the CISSP Exam Torrent, therefore the quality can be guaranteed. We offer you free demo to have a try before buying, and you know the content of the complete version through the free demo. We have professional service staff for CISSP exam dumps, and if you have any questions, you can have a conversation with us.

ISC CISSP (Certified Information Systems Security Professional) Exam is a globally recognized certification program that is designed to test the skills and knowledge of information security professionals. CISSP exam is intended for individuals who have extensive experience in the field of information security and want to demonstrate their expertise to potential employers. It covers a wide range of topics, including risk management, access control, cryptography, and network security.

## How to earn CISSP Credential?

The candidate must earn 120 continuing education units (CEUs) for the CISSP certification. The CEUs may be earned through participation in the ISSA-certified training course, obtaining CEUs from any other Information Systems Security Association (ISSA) member, obtaining certification credits for passing the exam, or through participating in many other online sites.

## New Guide ISC CISSP Files, Valid Test CISSP Testking

Each candidate will enjoy one-year free update after purchased our CISSP dumps collection. We will send you the latest CISSP dumps pdf to your email immediately once we have any updating about the certification exam. And there are free demo of CISSP Exam Questions in our website for your reference. Our ISC exam torrent is the best partner for your exam preparation.

## ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q494-Q499):

### NEW QUESTION # 494

The best technique to authenticate to a system is to:

- A. Ensure the person is authenticated by something he knows and something he has.
- B. Establish biometric access through a secured server or Web site.
- C. Allow access only through user ID and password.
- D. Maintain correct and accurate ACLs (access control lists) to allow access to applications.

**Answer: A**

Explanation:

Something you know and something you have is two authentication factors and is better than a single authentication factor. Strong Authentication or Two Factor Authentication is widely accepted as the best practice for authentication.

There are three type of authentication factors:

Type 1 - Something you know (password, pin)

Type 2 - Something you have (token, smart card, magnetic card)

Type 3 - Something you are (biometrics)

Whenever two of the three types of factors are used together, this is called strong authentication or two factors authentication

The following answers are incorrect:

Establish biometric access through a secured server or Web site:

This is a single factor authentication and it could be weaker than two factors, in most cases it is .

Biometric devices can be tricked or circumvented in some cases, this is why they MUST be supplemented with a second factor of authentication. Multiple attacks have been done on different types of biometric devices. Two factors is always the best to authenticate a user.

Maintain correct and accurate ACLs (access control lists) to allow access to applications:

ACL are attached to objects. They are used within the access control matrix to define what level of access each of the subjects have on the object. It is a column within the Access Control matrix.

This is related to authorization and not authentication.

Allow access only through user ID and password:

This is once again a single factor of authentication because both are something the person knows.

#### NEW QUESTION # 495

What is the primary reason why some sites choose not to implement Trivial File Transfer Protocol (TFTP)?

- A. It is too complex to manage user access restrictions under TFTP
- **B. Due to the inherent security risks**
- C. It cannot support the Lightweight Directory Access Protocol (LDAP)
- D. It does not offer high level encryption like FTP

**Answer: B**

Explanation:

Some sites choose not to implement Trivial File Transfer Protocol (TFTP) due to the inherent security risks. TFTP is a UDP-based file transfer program that provides no security. There is no user authentication.

#### NEW QUESTION # 496

Which of the following is the BEST reason to review audit logs periodically?

- A. Meet compliance regulations
- B. Verify they are operating properly
- **C. Identify anomalies in use patterns**
- D. Monitor employee productivity

**Answer: C**

Explanation:

The best reason to review audit logs periodically is to identify anomalies in use patterns that may indicate unauthorized or malicious activities, such as intrusion attempts, data breaches, policy violations, or system errors. Audit logs record the events and actions that occur on a system or network, and can provide valuable information for security analysis, investigation, and response.

#### NEW QUESTION # 497

Which of the following is NOT a proper media control?

- A. All data storage media should be accurately marked.
- B. A proper storage environment should be provided for the media.
- C. The data media should be logged to provide a physical inventory control.
- **D. The media that is reused in a sensitive environment does not need sanitization.**

**Answer: D**
