New Lpi 101-500 Test Experience & Valid 101-500 Exam Dumps

Sometimes choice is greater than important. Good choice may do more with less. If you still worry about your exam, our 101-500 braindump materials will be your right choice. Our exam braindumps materials have high pass rate. Most candidates purchase our products and will pass exam certainly. If you want to fail exam and feel depressed, our 101-500 braindump materials can help you pass exam one-shot. Actual4Cert sells high passing-rate preparation products before the real test for candidates.

Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q229-Q234):

NEW QUESTION # 229

The USB device filesystem can be found under /proc/ _____ /usb/. (Please fill in the blank with the single word only)

Answer:

Explanation:
bus

NEW QUESTION # 230

What is the maximum niceness value that a regular user can assign to a process with the nice command when executing a new process?

- A. 0
- B. 1

- C. 2
- D. 3

Answer: A

NEW QUESTION # 231

Which of the following commands prints a list of usernames (first column) and their primary group (fourth column) from the /etc/passwd file?

- A. `cut -d : -f 1,4 /etc/passwd`
- B. `sort -t : -k 1,4 /etc/passwd`
- C. `paste -f 1,4 /etc/passwd`
- D. `split -c 1,4 /etc/passwd`
- E. `fmt -f 1,4 /etc/passwd`

Answer: A

NEW QUESTION # 232

Which is the default percentage of reserved space for the root user on new ext4 filesystems?

- A. 15%
- B. 3%
- C. 10%
- D. 0%
- E. 5%

Answer: E

NEW QUESTION # 233

Which of the following commands will mount an already inserted CD-ROM in /dev/sr0 onto an existing directory /mnt/cdrom when issued with root privileges?

- A. `mount -f /dev/sr0 /mnt/cdrom`
- B. `mount /dev/cdrom /mnt/cdrom`
- C. `mount -l cdrom /dev/sr0 /mnt/cdrom`
- D. `mount /dev/sr0 /mnt/cdrom`
- E. `mount -t cdrom /dev/sr0 /mnt/cdrom`

Answer: D

Explanation:

The mount command is used to attach a filesystem to a directory on the system, which is called a mount point.

The mount command requires the device name or the UUID of the filesystem as the first argument, and the mount point as the second argument. Optionally, the mount command can also take some options, such as the filesystem type, the mount options, and the label. The syntax of the mount command is:

```
mount [options] device mountpoint
```

In this question, the device name of the CD-ROM is /dev/sr0, and the mount point is /mnt/cdrom. Therefore, the correct command to mount the CD-ROM is:

```
mount /dev/sr0 /mnt/cdrom
```

This command will mount the CD-ROM as a read-only filesystem with the type iso9660, which is the standard format for optical discs. The mount command can automatically detect the filesystem type and the mount options, so there is no need to specify them explicitly. However, if you want to specify them, you can use the -t and -o options, respectively. For example, the following command is equivalent to the previous one:

```
mount -t iso9660 -o ro /dev/sr0 /mnt/cdrom
```

The other options are not correct because:

* A. `mount /dev/cdrom /mnt/cdrom`: This command may work on some systems, but it is not guaranteed to be correct. The /dev/cdrom is usually a symbolic link to the actual device name of the CD-ROM, which can vary depending on the system. For example, on some systems, the /dev/cdrom may point to

/dev/sr0, but on others, it may point to /dev/scd0 or /dev/hdc. Therefore, it is better to use the actual device name of the CD-ROM, which can be found by using the lsblk or the dmesg command.

* C. `mount -t cdrom /dev/sr0 /mnt/cdrom`: This command is not valid because cdrom is not a valid filesystem type. The filesystem type for optical discs is iso9660, not cdrom. The mount command will fail with an error message saying:
mount: unknown filesystem type 'cdrom'

* D. `mount -l cdrom /dev/sr0 /mnt/cdrom`: This command is not valid because -l is not a valid option for the mount command. The -l option is used to list all the mounted filesystems, not to mount a filesystem.

The mount command will fail with an error message saying:

mount: can't find /dev/sr0 in /etc/fstab

* E. `mount -f /dev/sr0 /mnt/cdrom`: This command is not valid because it is missing a space between the device name and the mount point. The mount command requires two separate arguments for the device name and the mount point, separated by a space. Also, the -f option is used to fake the mount operation, not to perform the actual mount. The mount command will fail with an error message saying:

mount: /dev/sr0/mnt/cdrom: mount point does not exist.
