This is because you have hands-on the most updated and most reliable Google Cloud-Digital-Leader Questions created under the supervision of 90,000 Google professionals.

Google Cloud Digital Leader Sample Questions (Q11-Q16):

NEW QUESTION # 11

You are running a data warehouse on BigQuery. A partner company is offering a recommendation engine based on the data in your data warehouse. The partner company is also running their application on Google Cloud. They manage the resources in their own project, but they need access to the BigQuery dataset in your project. You want to provide the partner company with access to the dataset. What should you do?

- A. Create a Service Account in your own project, and grant this Service Account access to BigQuery in your project.
- B. Create a Service Account in your own project, and ask the partner to grant this Service Account access to BigQuery in their project.
- C. Ask the partner to create a Service Account in their project, and have them give the Service Account access to BigQuery in their project.
- **D. Ask the partner to create a Service Account in their project, and grant their Service Account access to the BigQuery dataset in your project.**

Answer: D

Explanation:

- if the need is to authenticate the application to access your dataset, it's the application's service account that will be provided during the authentication, so the service account is to be created at their side to run the application

NEW QUESTION # 12

You are a program manager in a company you need to submit a bare metal solution order for a secure, high performance connection with a low-latency network fabric. What network information you need to submit the order to Bare Metal Solutions.

- A. Total number of VLANs you need in your Bare Metal Solution Environment.
- B. IP Ranges for example Client IP Address range used for communication between your Google Cloud and Bare Metal Solution environments.
- C. Google Cloud Project Id that you are using with your bare metal solution environment.
- **D. All of the above**

Answer: D

Explanation:

What Bare Metal Solution provides

Bare Metal Solution is a managed solution that provides purpose-built HPE or Atos bare-metal servers in regional extensions that are connected to Google Cloud by a managed, high-performance connection with a low-latency network fabric.

With Bare Metal Solution, Google Cloud provides and manages the core infrastructure, the network, the physical and network security, and hardware monitoring capabilities in an environment from which you can access all of the Google Cloud services. The core infrastructure includes secure, controlled-environment facilities, and power.

The Bare Metal Solution also includes the provisioning and maintenance of custom, sole-tenancy servers with local SAN, and smart hands support.

The network, which is managed by Google Cloud, includes a low-latency Partner Interconnect connection into the customer Bare Metal Solution environment.

The available Google Cloud services include private API access, management tools, support, and billing.

NEW QUESTION # 13

Your organization runs a distributed application in the Compute Engine virtual machines. Your organization needs redundancy, but it also needs extremely fast communication (less than 10 milliseconds) between the parts of the application in different virtual machines. Where should your organization locate this virtual machines?

- A. In a single zone within a single region
- **B. In different zones within a single region**
- C. In multiple regions, using one zone per region
- D. In multiple regions, using multiple zones per region

Answer: B

Explanation:

Multi zone is also redundant within the region and it provides the lowest latency.

NEW QUESTION # 14

What is generative AI?

- A. A machine learning model for language translation
- B. An AI model for labeling images
- C. An umbrella term that includes all types of machine learning algorithms
- **D. A specific field of AI that can be used to create content**

Answer: D

NEW QUESTION # 15

An organization needs to increase the speed at which they can train machine learning models. Which domain-specific hardware is designed for this task?

- **A. Cloud TPUs**
- B. Preemptible or Spot VMs
- C. Bare Metal Solution
- D. Containers

Answer: A

NEW QUESTION # 16

.....

The Cloud-Digital-Leader learning materials are of high quality, mainly reflected in the adoption rate. As for our Cloud-Digital-Leader exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our Cloud-Digital-Leader quiz torrent based on the progress of the letter and send it to you. 99% of people who use our Cloud-Digital-Leader Quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our Cloud-Digital-Leader exam question is 99%. So our Cloud-Digital-Leader study guide is a good choice for you.
