C-S4CPB-2508 Latest Exam Pass4sure, Latest C-S4CPB-2508 Exam

Bootcamp

May be you will meet some difficult or problems when you prepare for your C-S4CPB-2508 exam, you even want to give it up. That is why I suggest that you must try our study materials. Because C-S4CPB-2508 guide torrent can help you to solve all the problems encountered in the learning process, C-S4CPB-2508 Study Tool will provide you with very flexible learning time so that you can easily pass the exam. I believe that after you try our products, you will love it soon.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q56-Q61):

NEW QUESTION # 56
Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Conduct the Fit-to-Standard analysis to gather configuration values.
- B. Define the organizational structure and chart of accounts.
- C. Use the Test system to demonstrate SAP Best Practice processes.
- D. Conduct the Digital Discovery Assessment to identify extension requirements.

Answer: A,C

NEW QUESTION # 57
What defines the organizational entities that are required in SAP Central Business Configuration?
Note:
There are 2 correct answers to this question

- A. Added partner content
- B. System consistency checks
- C. The selected deployment target
- D. The selected scope

Answer: C,D

Explanation:
The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.
These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S
/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S
/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 58
In which of the following systems do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Operations
- B. SAP Central Business Configuration

- C. SAP Cloud ALM for Implementation
- D. SAP Cloud ALM for Service

Answer: B

NEW QUESTION # 59
Where is the initial list of known integrations documented?

- A. In the Digital Discovery Assessment
- B. In SAP Cloud ALM
- C. In the Business Driven Configuration Questionnaire
- D. In the Fit-to-Standard Workshops

Answer: C

Explanation:
The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S
/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project12.
One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM13.
The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles13.
Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ. NEW QUESTION # 60
Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- B. Upload customer master data in the Starter system using migration templates.
- C. Review the integration requirements collected from the Digital Discovery Assessment.
- D. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.

Answer: C,D

Explanation:
Before the first Fit-to-Standard workshop, the consultant should do the following activities:
* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items1.
* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios2.
The consultant should NOT do the following activities before the first Fit-to-Standard workshop:
* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to- Standard workshop, using the SAP S/4HANA Migration Cockpit3.
* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the

L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.
