2025 Latest iPassleader C\_ACDET\_2506 PDF Dumps and C\_ACDET\_2506 Exam Engine Free Share:  
[https://drive.google.com/open?id=1-guCze\\_FXeOwHgAgr43-Bo00avta7Mhe](https://drive.google.com/open?id=1-guCze_FXeOwHgAgr43-Bo00avta7Mhe)

In light of the truth that different people have various learning habits, we launch three C\_ACDET\_2506 training questions versions for your guidance. In addition, you can freely download the demo of C\_ACDET\_2506 learning materials for your consideration. We promise there will be no extra charges for such a try, on the contrary, we sincerely suggest you to try the demos of our C\_ACDET\_2506 Exam Questions and make a well-content choice. You will find that our C\_ACDET\_2506 training guide is worthy to buy for you time and money!

## SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Project Overview, Roles and Responsibilities:</b> This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>

## **C\_ACDET\_2506 Learning materials: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite & C\_ACDET\_2506 Exam Preparation**

In the mass job market, if you desire to be an outstanding person, an exam certificate is a necessity. Just as an old saying goes, “It’s never too old to learn”, so preparing for a C\_ACDET\_2506 certification is becoming a common occurrence. Especially in the workplace of today, a variety of training materials and tools always makes you confused and spend much extra time to test its quality, which in turn wastes your time in learning. In fact, you can totally believe in our C\_ACDET\_2506 Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our C\_ACDET\_2506 test questions, you will also get a full refund from our company by virtue of the proof certificate.

### **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q32-Q37):**

#### **NEW QUESTION # 32**

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. User with Partner Administrator can configure translation.
- B. Create a package to migrate translations by ICM.
- **C. Translations are included in migrations and are listed as AMLStringResource in the migration**
- D. Contact an SAP Deployment lead for customization help.

**Answer: C**

#### **NEW QUESTION # 33**

Which key technical activities occur during the Deploy phase? (Select 3 correct answers)

- **A. Migration to production**
- B. Execute change management plans
- C. Rebuild all custom header fields in production
- **D. Apply the bundle in production**
- **E. Go-live**

**Answer: A,D,E**

Explanation:

During the Deploy phase, key technical activities include:

\* A. Apply the bundle in production: Using Intelligent Configuration Manager (ICM) to migrate configuration bundles to the production environment.

\* B. Go-live: Transitioning from project mode to operational live usage of the SAP Ariba solution.

\* D. Migration to production: Performing final configuration migration, data loads, and cutover activities per the deployment plan. Rebuilding custom header fields manually (C) is not required because configuration is migrated rather than rebuilt. Executing change management plans (E) is important but considered a business/change activity, not a technical migration activity. These technical tasks ensure the system is correctly configured and operationally ready for end users.

#### NEW QUESTION # 34

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields.

What is the recommended way to handle this scenario?

- A. Suggest the customer put a word document on the template and capture all information in that document.
- **B. Create a dynamic form (dform) where common data can be synced with the project header through customization.**
- C. Create a Microsoft Form from the Actions menu for managing all the requirements.
- D. Configure as many custom fields as possible for data capture purposes.

**Answer: B**

#### NEW QUESTION # 35

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Enable field property "Use relationship chooser" in the Advanced tab
- B. Define a Visibility Condition in the Conditions tab
- C. Load Relation types and Relation entries
- **D. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab**
- E. Enable field property "Enable for Template Field Setter" in the Advanced tab

**Answer: D**

Explanation:

To filter a custom field's available values based on another field's value in SAP Ariba, you populate the "Relation Name" and "NameTableConstraintFieldPath" properties in the field's Advanced tab. This configuration links the field to a predefined relation type and specifies the constraint field used for filtering.

Simply loading relation types (B) is a prerequisite but does not configure filtering on the field itself. Visibility conditions (C) control whether a field is shown, not the filtering of its values. Enabling "Use relationship chooser" (D) is necessary but insufficient alone without defining the relation and constraint field. The "Enable for Template Field Setter" (E) option is unrelated to filtering. This filtering enables dynamic picklists where options depend on another field's selection, improving data accuracy and user experience.

#### NEW QUESTION # 36

When you create a custom field, how do you define where the field is added?

- A. The field is added to a class, identified by the record ID
- **B. The field is added to a class, identified by a class name**
- C. The field is added to a project header, identified by the templateClass ID
- D. Each field can be linked to multiple screens, identified via UI GroupClass ID

**Answer: B**

Explanation:

In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

#### NEW QUESTION # 37

.....

The C\_ACDET\_2506 exam real questions are the ideal and recommended study material for quick and complete SAP C\_ACDET\_2506 exam preparation. As a C\_ACDET\_2506 Exam candidate you should not ignore the C\_ACDET\_2506 exam questions and must add the SAP C\_ACDET\_2506 exam questions in preparation.
