Please don't worry about the purchase process because it's really simple for you. The first step is to select the C1000-185 test guide, choose your favorite version, the contents of different version of our C1000-185 exam questions are the same, but different in their ways of using. We have three different versions for you to choose: PDF, Soft and APP versions. The second step: fill in with your email and make sure it is correct, because we send our C1000-185 learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest C1000-185 version.

With the company of our C1000-185 study dumps, you will find the direction of success. There is nothing more exciting than an effective and useful C1000-185 question bank to study with for your coming exam. The sooner you use C1000-185 Training Materials, the more chance you will pass the C1000-185 exam, and the earlier you get your certificate. You definitely have to have a try and you will be satisfied without doubt.

## IBM Watsonx Generative AI Engineer - Associate Sample Questions (Q195-Q200):

**NEW QUESTION # 195**

You are building a generative AI model to assist with customer service responses. During evaluation, you notice that the responses generated tend to favor one specific demographic group, showing bias toward certain dialects and cultural references. How should you adjust the prompt and model parameters to reduce this bias?

- A. Switch to using deterministic (greedy) decoding to ensure more consistent outputs
- B. Incorporate additional training data from underrepresented demographic groups.
- C. Lower the temperature to reduce randomness in the model's response.
- D. Use a prompt that explicitly asks for neutrality across demographic groups.

**Answer: B**

#### **NEW QUESTION # 196**

A company is using IBM's InstructLab to fine-tune a large language model (LLM) to perform customer support tasks, such as answering frequently asked questions (FAQs) and troubleshooting product issues.

Which of the following components of InstructLab plays the most crucial role in ensuring the model learns to align its responses with the specific format and tone required for customer interactions?

- A. The user simulation environment, which provides real-time testing of model outputs.
- B. The prompt-tuning engine, which fine-tunes model outputs based on pre-defined instructions.
- C. The evaluation metrics dashboard, which tracks model performance on customer interaction tasks.
- D. The instruction optimizer, which tunes hyperparameters to improve task-specific performance.

**Answer: B**

#### **NEW QUESTION # 197**

You are tasked with fine-tuning a generative AI model for text data using synthetic data created through the IBM WatsonX platform's user interface. The data you are working with is skewed, containing mostly outliers, and you need to ensure that the synthetic data mimics the distribution accurately.

Which algorithm would be most appropriate for generating synthetic data that mirrors the original distribution, considering the Anderson-Darling test for normality?

- A. Anderson-Darling Based Synthetic Data Generation (ADS-DG)
- B. Bootstrapping
- C. Generative Adversarial Networks (GANs)
- D. Decision Trees

**Answer: A**

#### **NEW QUESTION # 198**

You are refining a prompt for an AI model that generates financial reports using IBM WatsonX Prompt Lab.

To ensure the AI produces structured outputs such as sections on "Revenue," "Expenses," and "Net Profit," which of the following is the most effective prompt editing option to achieve this goal?

- A. Adjust the temperature setting to generate more creative and detailed reports.
- B. Incorporate specific section headers as part of the prompt to guide the model in generating the desired report format.
- C. Use static prompt text and avoid variables to maintain a consistent structure for each report.
- D. Increase the randomness parameter to encourage diverse sections in the report structure.

**Answer: B**

#### **NEW QUESTION # 199**

A generative AI team is optimizing a model for text summarization. The team uses both hard prompts and soft prompts during training.

What is the primary reason a soft prompt might provide less explainability compared to a hard prompt?

- A. Soft prompts include manually designed templates that change dynamically, reducing transparency.

- B. Soft prompts are explicitly written by humans and include domain-specific instructions, making them harder to explain.
- C. Soft prompts are used exclusively in unsupervised learning settings, where explainability is inherently lower due to lack of labeled data.
- D. Soft prompts involve complex embedding vectors, which are learned and difficult for humans to interpret directly.

**Answer: D**

## NEW QUESTION # 200
