

C_SEC_2405공부문제 - C_SEC_2405시험대비최신덤프

SAP C_SEC_2405 Certification: Exam Details, Syllabus and Questions

SAP C_SEC_2405 Exam Guide

www.ERPPrep.com
Prepare for the SAP C_SEC_2405 Security Administrator exam with this comprehensive guide. Explore detailed exam topics, practice questions, and expert tips to boost your chances of success. Master key areas like authorization, cybersecurity, and infrastructure security with in-depth coverage and real-world scenarios.

Fast2test는 많은 분들이 SAP C_SEC_2405인증시험을 응시하여 성공하도록 도와주는 사이트입니다. Fast2test의 C_SEC_2405덤프는 모두 엘리트한 전문가들이 만들어낸 만큼 시험문제의 적중률은 아주 높습니다. 거의 100%의 정확도를 자랑하고 있습니다. 아마 많은 유사한 사이트들도 많습니다. 이러한 사이트에서 학습가이드와 온라인서비스도 지원되고 있습니다만 Fast2test는 이미 이러한 C_SEC_2405 사이트를 뛰어넘은 실력으로 업계에서 우리만의 이미지를 지키고 있습니다. Fast2test는 정확한 문제와 답만 제공하고 또한 그 어느 사이트보다도 빠른 업데이트로 여러분의 인증시험을 안전하게 패스하도록 합니다.

우리사이트가 다른 덤프사이트보다 우수한 점은 바로 자료들이 모두 전면적이고 적중률과 정확입니다. 때문에 우리Fast2test를 선택함으로써SAP인증C_SEC_2405시험준비에는 최고의 자료입니다. 여러분이 성공을 위한 최고의 자료입니다.

C_SEC_2405시험대비 최신 덤프 - C_SEC_2405최신 업데이트 인증덤프

그렇게 많은 IT인증덤프공부자료를 제공하는 사이트중Fast2test의 인지도가 제일 높은 원인은 무엇일까요?그건 Fast2test의 제품이 가장 좋다는 것을 의미합니다. Fast2test에서 제공해드리는 SAP인증 C_SEC_2405덤프공부자료는 SAP인증 C_SEC_2405실제시험문제에 초점을 맞추어 시험커버율이 거의 100%입니다. 이 덤프만 공부하시면SAP인증 C_SEC_2405시험패스에 자신을 느끼게 됩니다.

SAP C_SEC_2405 시험요강:

주제	소개
----	----

주제 1	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
주제 2	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
주제 3	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
주제 4	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

최신 SAP Certified Associate C_SEC_2405 무료 샘플문제 (Q58-Q63):

질문 # 58

Which of the following user types are excluded from some general password-related rules, such as password validity or initial password? Note: There are 2 correct answers to this question.

- A. System
- B. Service
- C. Communication
- D. Dialog

정답: A,B

질문 # 59

Which cryptographic libraries are provided by SAP? Note: There are 2 correct answers to this question.

- A. SAPCRYPTOLIB
- B. CommonCryptoLib
- C. SecLib
- D. Cryptlib

정답: A,C

설명:

SAP provides cryptographic libraries to ensure secure communication and data protection in its systems:

* SecLib (B): This library is part of SAP's security infrastructure and is used for various cryptographic operations.

* SAPCRYPTOLIB (C): SAPCRYPTOLIB is a critical component for enabling Secure Sockets Layer (SSL) and Transport Layer Security (TLS) encryption in SAP systems.

SAP Security References:

* SAP Note on Cryptographic Libraries (SAPCRYPTOLIB)

* SAP Help Portal: Cryptographic Infrastructure

질문 # 60

Which levels of security protection are provided by Secure Network Communication (SNC)? Note: There are 3 correct answers to this question.

- A. Integrity
- B. Privacy
- C. Authentication
- D. Authorization
- E. Availability

정답: A,B,C

설명:

Secure Network Communication (SNC) in SAP systems provides three key levels of security protection:

Authentication, Privacy, and Integrity. Authentication ensures that the communicating parties, such as users or systems, are verified as legitimate, preventing unauthorized access. Privacy protects data during transmission by encrypting it, safeguarding sensitive information from interception or eavesdropping.

Integrity ensures that data is not altered or tampered with during transmission, guaranteeing that the received data matches the sent data. These protections are critical for secure communication in SAP environments, particularly for external interfaces or remote connections. Availability, while important, is not a direct function of SNC, as it relates to system uptime rather than communication security. Authorization, which controls access rights, is managed by SAP's authorization framework, not SNC. By implementing SNC, SAP systems achieve a robust security posture for network communications, ensuring trust and data protection across distributed landscapes.

질문 # 61

If you want to evaluate catalog menu entries and authorization default values of IWSG and IWSV applications, which SUIM reports would you use? Note: There are 2 correct answers to this question.

- A. By Authorization Object
- B. By Transaction Assignment in Menu
- C. Search Startable Applications in Roles
- D. Search Applications in Roles

정답: A,C

설명:

To evaluate catalog menu entries and authorization default values for IWSG (SAP Gateway Service Groups Metadata) and IWSV (SAP Gateway Business Suite Enablement-Service) applications, the SUIM (System User Information System) reports "Search Startable Applications in Roles" and "By Authorization Object" are used. The "Search Startable Applications in Roles" report identifies roles that include startable applications, such as IWSG and IWSV, by analyzing menu entries in PFCG roles, providing insight into which applications users can access. The "By Authorization Object" report allows administrators to review authorization objects, including those associated with IWSG and IWSV, and their default values, ensuring that the correct permissions are assigned. These reports are critical for auditing and maintaining secure access to SAP Fiori and Gateway applications. The "Search Applications in Roles" report is less specific, and "By Transaction Assignment in Menu" focuses on transaction codes, not IWSG/IWSV applications, making them unsuitable for this purpose. These tools enhance transparency and control over application access in SAP systems.

질문 # 62

In S/4HANA on-premise, which of the following combinations is required to grant a business user access to data from a Core Data Services (CDS) view using the standard ABAP authorization concept and authorization object S_RS_AUTH?

- A.
- B.
- C.
- D.

정답: D

질문 # 63
