An updated Cisco 300-425 study material is essential for the best preparation for the Cisco 300-425 exam and subsequently passing the Cisco 300-425 test. Students may find study resources on many websites, but they are likely to be outdated. ActualCollection resolved this issue by providing updated and real 300-425 PDF Questions.

To take the Cisco 300-425 exam, candidates must have a solid understanding of wireless networking concepts and technologies, as well as experience working with Cisco wireless solutions. Candidates should also be familiar with the Cisco Unified Wireless Network architecture and be able to design and deploy wireless networks that meet the needs of their organization. 300-425 Exam consists of multiple-choice questions and simulations, and candidates have 90 minutes to complete the exam. A passing score on the Cisco 300-425 exam demonstrates that a candidate has the skills and knowledge necessary to design and implement effective wireless networks using Cisco technologies.

300-425 Valid Guide Files | Latest Braindumps 300-425 Book

You may doubt about such an amazing data of our pass rate on our 300-425 learning prep, which is unimaginable in this industry. But our 300-425 exam questions have made it. You can imagine how much efforts we put into and how much we attach importance to the performance of our 300-425 Study Guide. We use the 99% pass rate to prove that our 300-425 practice materials have the power to help you go through the exam and achieve your dream.

Introduction of Cisco 300-425 Certification Exam

The Cisco 300-425 certification is primarily for individuals who want to work as network support staff. The exam design is split up into two sections, the router, and the switch section. The purpose of the Cisco 300-425 exam is to test your knowledge of network technologies. The courseware covers topics that are related to switch installation and configuration, router setup and configuration, WAN protocols and connection types, and network security fundamentals. The Cisco 300-425 exam is one of the few exams that are associated with the CCENT certification.

The CCENT certification is usually the first step in becoming a Cisco-certified individual. The exam consists of questions that are related to routing and switching fundamentals, basic security, and network troubleshooting. Every question on the exam has a single correct answer while some may add an alternative answer or explanation if there is more than one possible way to solve a problem. The exam is closed book. This means that the Cisco 300-425 certification candidates are not allowed to have any outside sources of

reference materials while answering the questions. **Cisco 300-425 Dumps** cover all questions of Cisco 300-425. They are only allowed to reference data stored in their brain.

The Cisco 300-425 Certification exam has a passing score of 250 out of 500 points. It is one of the most popular professional certifications in the IT industry and over 50,000 people pass it every year. The passing rate for this exam is approximately 54%.

The exam is known to be a challenge for most of the individuals who take it. It consists of distinctive content that is difficult to master and an even harder quiz. The questions have a variety of topics, including networking fundamentals and security topics.

There are many options available for those who want to obtain their CCENT certification. However, the two most popular options available are attending a classroom or online training course and preparing through self-study programs such as books, online study guides, and practice exams.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q227-Q232):

NEW QUESTION # 227

Two Cisco 5520 wireless LAN controllers are managing all access points throughout the network. The WLCs are in different locations to provide geographical redundancy. A mobility group has been configured on both WLCs and has a UP status on both controllers. The APs in location A are statically configured to use controller A as the primary and controller B as the secondary. If the WLC in location A goes offline, the APs successfully join the WLC in location B, but they do not fail over to their primary configured controller. Which configuration task fixes the issue?

- A. Configure the WLC in location A as primary using the CAPWAP AP Controller IP Address command on all the location A Access points.
- B. Use DHCP Option 43 and specify WLC in location A as primary.
- C. Change the AP Failover Priority to critical.
- D. Enable AP fallback globally on the WLC

Answer: A

NEW QUESTION # 228

A customer has a centralized wireless deployment with N+1 high availability and few open authentication SSIDs configured. After fail over, all APs are broadcasting all SSIDs, but the clients are assigned IP addresses from a different subnet. The WLANs on both WLCs are configured with the same dynamic interfaces. Which feature must be incorporated in the wireless design of the second controller?

- A. AAA Override
- B. RF Protocol
- C. VLAN Select
- D. AP Groups

Answer: C

Explanation:

VLAN Select is a feature that allows for the assignment of clients to different VLANs based on various criteria, such as user credentials or device type. In a centralized wireless deployment with N+1 high availability, incorporating VLAN Select can ensure that clients maintain consistent IP addressing across failovers, preventing them from being assigned IP addresses from a different subnet.

NEW QUESTION # 229

An engineer must configure the virtual IP address on multiple controllers in a mobility group. Which rule must the engineer follow to ensure proper roaming?

- A. Ensure that the DNS Host Name field is defined.
- B. Use a unique IP address for each WLC.
- C. Ensure that the DNS entry is tied to the virtual IP address of the WLC.
- D. Use the same IP address for each WLC.

Answer: C

Explanation:

Section: Mobility

NEW QUESTION # 230

Which three pieces of equipment are needed to conduct a fully measured wireless survey?

(Choose three.)

- A. goggles
- B. access point
- C. spirit level
- D. tall tripod
- E. ladder
- F. PoE battery

Answer: B,D,F

Explanation:

https://www.cisco.com/c/en/us/td/docs/wireless/technology/mesh/81/design/guide/b_mesh_81/Site_Preparation_and_Planning.html

NEW QUESTION # 231

A wireless engineer is designing a wireless network to support real-time applications over wireless. Which IEEE protocol must the engineer enable on the WLC so that the number of packets that are exchanged between an access point and client are reduced and fast roaming occurs?

- A. 802.11r
- B. 802.11w
- C. 802.11i
- D. 802.11k

Answer: D

Explanation:
