## Guaranteed HPE0-S59 Questions Answers | Vce HPE0-S59 Torrent

You can get a sense of the actual HPE0-S59 exam by attempting our HPE0-S59 practice tests. Desktop and web-based practice exams are identical to the real HPE0-S59 exam and simulate the HPE0-S59 exam environment. Practice exams (desktop and web-based) can be customized according to your needs. One benefit of taking HPE0-S59 Practice Tests multiple times is that it enables you to concentrate on your weak areas.

### HPE Compute Solutions Sample Questions (Q55-Q60):

#### NEW QUESTION # 55

Your customer has the following HPE Synergy setup

- Three frames fully populated with HPE Synergy 480 Gen10 Plus modules and 25Gb/s downlink speed formulating a single logical enclosure
- Two HPE Virtual Connect SE 100Gb F32 Module for Synergy
- Four HPE Synergy 50Gb interconnect Link Module
- Six HPE Synergy Virtual Connect SE 32Gb FC Modules

The customer needs to add a frame.

Which statement about the expansion of this setup is true?

- A. The additional frame cannot have 12Gb SAS connection modules installed
- B. The additional frame must have HPE Virtual Connect FC modules installed
- C. The customer has to create a new logical enclosure for the additional frame
- **D. The customer can grow the existing logical enclosure up to 5 frames**

**Answer: D**

Explanation:

HPE Synergy allows scaling of logical enclosures up to 5 frames. Given the current setup of three frames fully populated with HPE Synergy 480 Gen10 Plus modules and other specified components, the customer can add another frame to the existing logical enclosure. This flexibility in scaling ensures that the logical enclosure can be expanded without the need to create a new logical enclosure, provided that the necessary interconnect modules are in place.

#### **NEW QUESTION # 56**

Admins want to use HPE Compute Ops Management to apply a custom BIOS/Workload profile to several servers. What is a required part of the setup?

- A. They must use the HPE Compute Ops Management API to create the custom profile.
- B. They must use iLO to configure the servers to boot in optimized UEFI mode.
- **C. They must ensure that the servers' OS does not attempt to control any of the settings that the custom profile controls.**
- D. They must ensure that the servers' BIOS settings are first set to factory defaults.

**Answer: C**

Explanation:

When applying a custom BIOS or workload profile through HPE Compute Ops Management, the system firmware must remain in control of those settings. If the operating system or its agents attempt to manage the same parameters, it can override or conflict with the applied profile, preventing consistent enforcement.

#### **NEW QUESTION # 57**

Which statement about login redistribution is true?

- **A. Login redistribution is used for login balancing when they are not distributed evenly over the FC links**
- B. Login redistribution is supported only on the HPE Synergy Virtual Connect SE 32Gb FC Modules
- C. Login redistribution is a licensed feature and the number of licenses required depends on the number of active ports
- D. Login redistribution is available only if HPE Primera or HPE Alletra is connected directly to the HPE Synergy frame

**Answer: A**

Explanation:

Login redistribution is a feature used in Fibre Channel (FC) environments - particularly within HPE Synergy and Virtual Connect configurations - to help balance the distribution of device logins (like from servers or HBAs) across all available FC uplinks. This helps avoid performance bottlenecks and ensures efficient use of available bandwidth.

#### **NEW QUESTION # 58**

You are troubleshooting an HPE OneView server profile that presents a critical state.

The server profile was configured with a Link Aggregation Group.

What should you check to fix the issue?

- A. If the logical enclosure is built on at least three HPE Synergy frames
- **B. if both FlexNICs are configured with the same speed**
- C. if the logical enclosure is configured with redundant master modules
- D. if both FlexNICs are connected to different networks

**Answer: B**

Explanation:

When troubleshooting a server profile in HPE OneView that is in a critical state due to a Link Aggregation Group (LAG), it is important to check if both FlexNICs are configured with the same speed. Inconsistent speeds can cause issues with link aggregation, leading to network instability and performance degradation.

## NEW QUESTION # 59

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade. Click the parameter that the customer should configure within an uplink set to meet this requirement

### Answer:

Explanation:

Explanation:

To prevent a timeout and loss of communication during an external switch firmware upgrade, the customer should configure the LACP failover trigger within the uplink set. By setting the LACP failover trigger to "All active uplinks transition to offline," the configuration ensures that the traffic will be redirected to available uplinks in the event of an uplink failure or during the upgrade process, maintaining communication and preventing timeouts.

## NEW QUESTION # 60

.....

We UpdateDumps are growing faster and faster owing to our high-quality latest HPE0-S59 certification guide materials with high pass rate. Based on our past data, our pass rate of HPE0-S59 training guide is high up to 99% to 100% recently years. Many customer will become regular customer and think of us once they have exams to clear after choosing our HPE0-S59 Exam Guide one time. So we have no need to spend much spirits to advertise but only put most into researching and after-sale service. As long as you study with our HPE0-S59 learning questions, you will find that it is a right choice.
