

Practice HPE7-J02 Test - HPE7-J02 Test Simulator Fee

DOWNLOAD the newest Exam4Free HPE7-J02 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1uTwsEj93xEo6dvquSnHMwv82Dc_t6fkA

Compared with the education products of the same type, some users only for college students, some only provide for the use of employees, these limitations to some extent, the product covers group, while our HPE7-J02 study guide materials absorbed the lesson, it can satisfy the different study period of different cultural levels of the needs of the audience. For example, if you are a college student, you can study and use online resources through the student column of our HPE7-J02 learning guide, and you can choose to study our HPE7-J02 exam questions in your spare time.

We offer you free update for 365 days for HPE7-J02 study guide materials, so that you can have a better understanding of what you are going to buy. And update version for HPE7-J02 exam materials will be sent to your email automatically. In addition, HPE7-J02 exam materials are compiled by experienced experts, and they are quite familiar with the exam center, therefore if you choose us, you can get the latest information for the exam We also have online and offline chat service, if you have any questions about HPE7-J02 Study Guide, you can contact with us online or by email, and we will give you reply as quickly as we can.

>> Practice HPE7-J02 Test <<

HPE7-J02 Test Simulator Fee | Exam Sample HPE7-J02 Questions

This quality of our HPE7-J02 exam questions is so high that the content of our HPE7-J02 study guide polishes your skills and widens your horizons intellectually to ace challenges of a complex certification like the HPE7-J02 Exam Certification. And with our HPE7-J02 learning quiz, your success is 100% guaranteed. You can just look at the data on our website. Our pass rate of the worthy customers is high as 98% to 100%.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 2	<ul style="list-style-type: none"> • Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 3	<ul style="list-style-type: none"> • Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.
Topic 4	<ul style="list-style-type: none"> • Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 5	<ul style="list-style-type: none"> • Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.
Topic 6	<ul style="list-style-type: none"> • Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.
Topic 7	<ul style="list-style-type: none"> • Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 8	<ul style="list-style-type: none"> • Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

Your customer is beginning to convert their applications to cloud-native apps on Kubernetes. They are considering HPE GreenLake for Containers.

Which statement about this platform is true?

- A. Supports only cloud-native applications.
- **B. Provides open-source Kubernetes with simplified management.**
- C. Supports legacy virtualization technologies with manual configuration for containers.
- D. Provides tools for orchestration of containers without microservices support.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for Containers delivers an enterprise-grade Kubernetes platform, leveraging open-source Kubernetes but with simplified lifecycle management, monitoring, and integration with HPE infrastructure. It provides full support for containerized workloads, whether cloud-native or modernized traditional applications.

Distractors:

A: Incorrect - not about legacy virtualization.

B: Incorrect - microservices are supported; orchestration is Kubernetes-native.
D: Incorrect - it supports both cloud-native and modernized workloads.
Key Concept: GreenLake for Containers = Kubernetes with simplified enterprise management.
Reference: HPE GreenLake for Containers Overview.

NEW QUESTION # 43

A local startup company has grown rapidly and now needs block storage for enterprise workloads. They are virtualized with VMware and have a small IT staff. They are evaluating an HPE Alletra MP and a Pure FlashArray //X90R4.

Environment:

VMware 8.0

Cisco switches

Dell servers

HPE servers

What statement about HPE should you point out as a differentiator?

- A. HPE has the ability to disable garbage collection and overhead to meet workload requirements.
- **B. HPE provides full-stack visibility up to the app layer with prescriptive, actionable recommendations.**
- C. HPE can natively tier data on a software-only deployment.
- D. HPE has live workload migration via the ActiveWorkload feature, based on a stretch cluster.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra with InfoSight provides end-to-end visibility from infrastructure through to virtual machines and applications. It offers prescriptive, AI-driven recommendations to simplify management - a key differentiator for startups with small IT staff. Pure arrays do not offer the same level of integrated, cross-stack predictive analytics.

Distractors:

B: "ActiveWorkload" is not an HPE feature - HPE uses Peer Persistence for stretch clusters.

C: Garbage collection is managed automatically in HPE arrays; disabling it is not supported.

D: Data tiering is not natively provided as "software-only" - HPE uses GreenLake and Alletra services.

Key Concept: InfoSight = predictive analytics and app-to-infra visibility differentiator.

Reference: HPE InfoSight for Alletra Datasheet.

NEW QUESTION # 44

You need to evaluate a customer's virtual server environment to size an HCI solution based on HPE SimpliVity according to usage metrics over time. The environment consists of Dell servers and storage running VMware virtualization.

Which action can you use to gather the usage metrics of this setup?

- A. Use HPE InfoSight for SimpliVity to gather data from external compute clusters.
- **B. Import the HPE CloudPhysics Observer to the vCenter cluster to gather the analytics.**
- C. Use the HPE InfoSight Primary Storage sizing tool to calculate the competitive performance metrics.
- D. Use HPE NinjaOnline SimpliVity Sizer to gather the usage metrics of the current environment and have them imported directly into the sizer.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

For competitive or 3rd-party (non-HPE) environments like Dell + VMware, HPE CloudPhysics is the correct tool. The Observer VM is deployed into vCenter to gather real-world workload metrics (CPU, memory, storage I/O). These analytics can then be used for SimpliVity HCI sizing.

Distractors:

A: NinjaOnline SimpliVity Sizer requires input metrics, but it cannot directly collect from 3rd-party environments.

B: InfoSight sizing applies to HPE arrays, not competitive storage.

D: InfoSight for SimpliVity only monitors existing HPE SimpliVity clusters.

Key Concept: CloudPhysics Observer # gathers competitive workload metrics # feeds into SimpliVity sizing.

Reference: HPE CloudPhysics for HCI Sizing

NEW QUESTION # 45

You are meeting with a customer who wants to replace their current file storage system. You plan to recommend HPE GreenLake for File Storage. The customer asks whether the solution can provide cross-protocol access to the same data using both NFS and SMB simultaneously.

What is the impact on your design?

- A. Two different IP pools are required, one for each access protocol. The virtual IP pool address enables cross-protocol functionality
- **B. HPE GreenLake for File Storage supports native cross-protocol access with NFS, SMB, and S3. You must enable both protocols per share**
- C. This is perfectly possible with HPE GreenLake for File Storage by creating two file shares (one for each protocol) and setting up replication
- D. A 3rd-party SDS solution such as Qumulo or Scality should be discussed since the HPE GreenLake for File Storage does not support this

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage, powered by VAST Data software, natively supports cross-protocol access (NFS, SMB, and S3) to the same dataset. This means a file written via NFS can be accessed via SMB or S3 without replication. For cross-protocol access, both protocols must be enabled at the share/bucket level.

This is a core differentiator of HPE's GreenLake for File Storage solution.

Distractors:

A: Wrong, because GreenLake for File Storage already has native multi-protocol support - no need for 3rd party SDS.

C: Incorrect, as replication between separate shares is not required; it is a native capability.

D: Misleading - IP pools are used for load balancing and client connectivity, but not required to enable cross-protocol access.

Key Concept: Multi-protocol access in HPE GreenLake for File Storage (NFS/SMB/S3).

Reference: HPE GreenLake for File Storage Technical Overview, VAST Data Universal Storage white papers

NEW QUESTION # 46

Your customer is a regional bank with branches in two different cities. Each branch is run as an isolated independent business and IT manages their SANs as separate fabrics to limit the scope of any failure. They use B-Series Switches.

The customer has requested a disaster recovery option that will allow replication between the two sites without merging the fabrics.

Which SAN technology meets the requirements?

- A. FCIP
- B. NPIV
- C. Fabric partitioning
- **D. FC-FC routing**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

FC-FC routing (also known as Fibre Channel Routing / LSANs on B-Series switches) allows replication between separate SAN fabrics without merging them. This supports disaster recovery scenarios while preserving fabric isolation, exactly matching the bank's requirement.

Distractors:

A: FCIP tunnels extend Fibre Channel over IP networks, but this typically merges SAN domains.

C: NPIV (N_Port ID Virtualization) allows multiple virtual WWNs per port, not cross-fabric replication.

D: Fabric partitioning is zoning and segmentation within a single fabric, not between independent fabrics.

Key Concept: FC-FC routing on Brocade (B-Series) for SAN isolation with replication.

Reference: HPE B-Series SAN Design Guide, Brocade FCR/LSAN Concepts.

NEW QUESTION # 47

.....

Exam4Free aims to assist its clients in making them capable of passing the HP HPE7-J02 certification exam with flying colors. It fulfills its mission by giving them an entirely free Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) demo of the dumps. Thus, this demonstration will enable them to scrutinize the quality of the Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) study material.
