## Top Pass4sure JN0-336 Exam Prep 100% Pass | High Pass-Rate Lab JN0-336 Questions: Security, Specialist (JNCIS-SEC)

You can get 365 days of free JN0-336 real dumps updates and free demos. Save your time and money. Start Juniper JN0-336 exam preparation with JN0-336 actual dumps. Our firm provides real, up-to-date, and expert-verified Security, Specialist (JNCIS-SEC) JN0-336 Exam Questions. We make certain that consumers pass the Security, Specialist (JNCIS-SEC) JN0-336 certification exam on their first attempt. Furthermore, we want you to trust the Security, Specialist (JNCIS-SEC) JN0-336 practice questions that we created.

### Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q51-Q56):

#### NEW QUESTION # 51

Click the Exhibit button.

You have implemented SSL client protection proxy. Employees are receiving the error shown in the exhibit. How do you solve this problem?

- A. Install a new SRX Series device to act as the client proxy
- B. Import the existing certificate to each client device.
- C. Reboot the SRX Series device.
- D. Load a known good, but expired. CA certificate onto the SRX Series device.

**Answer: B**

Explanation:

SSL client protection proxy is a feature that allows you to decrypt and inspect the SSL traffic from clients to servers. To do this, you

need to install a certificate authority (CA) certificate on the SRX Series device and import the same certificate to each client device. This way, the SRX Series device can act as a proxy between the client and the server and perform security checks on the decrypted traffic. If the client device does not have the certificate installed, it will receive an error message like the one shown in the exhibit. Reference: = JNCIS-SEC Certification, Open Learning - Security, Specialist (JNCIS-SEC), SSL Proxy Configuration

#### NEW QUESTION # 52

You need to deploy an SRX Series device in your virtual environment. In this scenario, what are two benefits of using a cSRX? (Choose two.)

- A. The cSRX has low memory requirements.
- B. The cSRX supports firewall, NAT, IPS, and UTM services.
- C. The cSRX default configuration contains three default zones: trust, untrust, and management.
- D. The cSRX supports Layer 2 and Layer 3 deployments.

**Answer: A,B**

Explanation:

Two benefits of using a cSRX in your virtual environment are:

The cSRX supports firewall, NAT, IPS, and UTM services: The cSRX is a containerized version of the SRX Series firewall that runs as a Docker container on Linux hosts. It provides the same features and functionality as the SRX Series physical firewalls, such as firewall, NAT, IPS, and UTM services. The cSRX can protect your virtual workloads and applications from various threats and attacks.

The cSRX has low memory requirements: The cSRX is designed to be lightweight and efficient, with low memory and CPU requirements. The cSRX can run on as little as 1 GB of RAM and 1 vCPU, making it suitable for resource-constrained environments. Reference: = cSRX Overview, cSRX Container Firewall Datasheet

#### NEW QUESTION # 53

You are asked to create an IPS-exempt rule base to eliminate false positives from happening. Which two configuration parameters are available to exclude traffic from being examined? (Choose two.)

- A. destination IP address
- B. source port
- C. source IP address
- D. destination port

**Answer: A,C**

Explanation:

You can specify the source IP address or a range of IP addresses to exclude certain traffic originating from specific network segments or devices. This is useful for whitelisting traffic from known, secure sources that are otherwise triggering false positives in the IPS system.

Similarly, you can specify the destination IP address or a range of addresses to exclude traffic destined for particular network hosts or segments. This helps in reducing false positives for traffic directed towards trusted internal resources or specific external services that are known to be safe.

#### NEW QUESTION # 54

Which two statements are correct about a policy scheduler? (Choose two.)

- A. A policy scheduler can be dynamically activated based on traffic flow volumes.
- B. A policy scheduler can be defined using a daily schedule.
- C. A policy scheduler determines the time frame that a security policy is actively evaluated.
- D. A policy scheduler can only be applied when using the policy-rematch feature.

**Answer: B,C**

Explanation:

A policy scheduler is a feature that allows a security policy to be activated or deactivated for a specified time period. You can define schedulers for a single or recurrent time slot within which a policy is active.

Two statements that are correct about a policy scheduler are:

A policy scheduler can be defined using a daily schedule: You can configure a scheduler to be active every day for a certain time interval, such as from 8:00 AM to 5:00 PM. You can also exclude specific days from the daily schedule, such as weekends or holidays.

A policy scheduler determines the time frame that a security policy is actively evaluated: When you associate a scheduler with a security policy, the policy is only available for policy lookup during the time frame specified by the scheduler. When the scheduler is off, the policy is inactive and cannot be matched by any traffic.

Reference: = Scheduling Security Policies, Configuring Schedulers for a Daily Schedule Excluding One Day

### NEW QUESTION # 55

Which method does the IoT Security feature use to identify traffic sourced from IoT devices?

- A. The SRX Series device streams metadata from the IoT device transit traffic to Juniper ATP Cloud Juniper ATP Cloud.
- **B. The SRX Series device identifies IoT devices from metadata extracted from their transit traffic.**
- C. The SRX Series device identifies IoT devices using their MAC address.
- D. The SRX Series device streams transit traffic received from the IoT device to Juniper ATP Cloud.

**Answer: B**

Explanation:

The metadata is used to identify the type of device, its associated activities and its threat profile. This information is used to determine the appropriate security policy for the device. For more information on IoT Security, please refer to the Juniper Security, Specialist (JNCIS-SEC) study guide.

### NEW QUESTION # 56

.....

ExamBoosts has launched the JN0-336 exam dumps with the collaboration of world-renowned professionals. ExamBoosts Juniper JN0-336 exam study material has three formats: JN0-336 PDF Questions, desktop Juniper JN0-336 practice test software, and a JN0-336 web-based practice exam. You can easily download these formats of Security, Specialist (JNCIS-SEC) (JN0-336) actual dumps and use them to prepare for the Juniper JN0-336 certification test.

**Lab JN0-336 Questions:** <https://www.examboosts.com/Juniper/JN0-336-practice-exam-dumps.html>

We always provide the latest and newest version for every IT candidates, aiming to help you pass exam and get the JN0-336 certification, The update version for JN0-336 exam materials will be sent to your email automatically, Juniper Pass4sure JN0-336 Exam Prep All our real test dumps remain valid for one year from the date of purchase, The scope of the JN0-336 exam is to focus exclusively on design and architecture elements and eliminate tactical implementation details best covered in the earlier JN0-336 exam

There are Web sites that act as corporate directories, and others that function JN0-336 as direct-mail catalogs, In this project, you'll learn more about the Mixer brushes and how they interact with the Wacom tablet and its Grip Pen.
