Topic 4, Contoso Suites

Background

Contoso Suites is an animal shelter that specializes in finding homes for dogs that have been given up by their owners. The shelter can house up to 20 dogs.

The shelter is implementing one model-driven Power Apps app to track the dogs and schedule meetings with potential adopters. No other apps will be created.

The model-driven app uses Dataverse with out-of-the-box functionality when possible. Dataverse is set up with the following configuration:

- * The solution prefix 'cs' is used for all new components.
- * Only the root business unit is used.
- * All tables are stored in Dataverse and do not require rapid scaling.
- * Exchange server-side sync is not configured.

Adopters

- * Adopter information is stored in a Contact table.
- * Contacts are considered to be duplicates if they have the same email address and last name.
- * Adopters are often late to meetings, so a reminder email is sent to them two hours before their meeting.
- * The email reminders must not be tracked in the system.

Dogs

- * Dog information is stored in a Dog table, which is organization owned.
- * Breed, size, and weight are fields in the table.

Dog residency

- * A Resident table tracks the stay of each dog.
- * Each resident record has a lookup for the dog and its food.
- * The food type and amount are logged on each resident record. Auto-posting is not configured for changes to food type and

amount.

- * A fee of \$120 is in a currency column named Adoption Fee. This fee can be changed depending on the adoption circumstances.
- * A formula column named Deposit is automatically populated with 20% of the adoption fee.
- * A resident record is generated automatically when a dog record is created. This is the only way a resident record can be created.

Exercise and feedings

- * Exercise for the dogs is tracked in an Exercise table.
- * Feedings are tracked in a Feeding table.
- * Exercise and feeding records appear in a resident record timeline.

Care staff

- * The care staff must be able to view who changed the food type and the amount that was given, for up to three months ago.
- * The staff must be able to update the weight of a dog on the resident record.
- * The staff report that the buttons are too small on the touch screen they use to log exercise and feeding.
- * The staff must be able to view who the adopters are for upcoming meetings. The staff must not be able to update adopter information.

Administrative staff

- * Administrative staff must receive a weekly list of duplicate contacts. Duplicate alerts must not appear when a staff member saves a new contact.
- * When an adopter wants to adopt a dog, the staff must perform a series of adoption duties in order. The following duty list must be displayed on the screen:
 - o Commitment:
 - o Obtain adopter signature in a commitment document.
 - o Collect deposit
 - o Pre-pickup:
 - o Document spay or neutering date.
 - o Perform spay or neutering.
 - o Document pickup date.
 - o Pickup:
 - o Collect full payment.
 - o Verify dog is picked up.
 - o A dog must be picked up no sooner than two days after spaying or neutering.
 - o A pop-up window must appear with an error message if the Pickup date is too soon.
 - o Only administrative staff must be able to add new adopters and dogs.

NEW QUESTION # 273

You are building a model-driven app. The environment has Advanced settings enabled.

A form in the app requires a custom interface.

You need to embed the custom interface onto the form without using custom code.

What should you do?

- **A. Use the classic experience to add a canvas app.**
- B. Create a canvas app and add it to a solution.
- C. Modify the model-driven app to use mobile form factor.
- D. Modify the model-driven app to use tablet form factor.

Answer: A

NEW QUESTION # 274

You are a Dynamics 365 Customer Services administrator. You have a Production instance and Sandbox instance.

Users record Production instance data in the Sandbox instance.

You need to ensure that the users only record data in the Production instance.

Which security function needs to be edited to prevent access to the Sandbox? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Application area	Security function
Microsoft 365 admin center	<div> <div></div> <div> Roles Groups Licenses Access rights </div> </div>
Dynamics 365 Sandbox instance	<div> <div></div> <div> Roles Groups Access rights </div> </div>

Microsoft

Answer:

Explanation:

Features	Answer Area	Feature
Topics	Requirement	Entities
Entities	Enable the chatbot to relate to a real-world object or topic in a dialog.	Topics
Variables	Define the path and triggers for a chatbot conversation.	Variables
Flows	Implement conditional logic to dynamically route a conversation across different paths.	

Explanation

Application area	Security function
Microsoft 365 admin center	<div> <div></div> <div> Roles Groups Licenses Access rights </div> </div>
Dynamics 365 Sandbox instance	<div> <div></div> <div> Roles Groups Access rights </div> </div>

NEW QUESTION # 275

You implement an editable grid for the Account entity.

The business team provides the following list of features that they would like you to implement:

- * Group by or sort columns in the current view.
- * Configure a business rule to show an error message.
- * Edit values in calculated fields.
- * Edit the Address composite field.
- * Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	<div><div></div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div></div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div></div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div></div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div></div><div>Yes</div><div>No</div></div>

Answer:

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	<div><div></div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div></div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div></div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div></div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div></div><div>Yes</div><div>No</div></div>

Explanation

Action	Can be performed?
Group by or sort columns in the current view.	<input type="text"/> <div> Yes No </div>
Configure a business rule to show an error message.	<input type="text"/> <div> Yes No </div>
 Edit values in calculated fields.	<input type="text"/> <div> Yes No </div>
Edit the Address composite field.	<input type="text"/> <div> Yes No </div>
Use the editable grid on mobile phones.	<input type="text"/> <div> Yes No </div>

NEW QUESTION # 276

A company has a canvas app that includes the following screens: Screen1 and Screen2.

The OnVisible property for Screen1 contains the following expression.

Set(AgeGroups, ["1-25", "26-54", "55+"])

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input type="radio"/>
 You can use the Update function to change values in AgeGroups.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:
