

100% Pass 2026 Microsoft AI-900: Marvelous Valid Microsoft Azure AI Fundamentals Exam Review

DOWNLOAD the newest Dumps4PDF AI-900 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1SojDGKUPNWXSAg2lQTXZq90RoalNFCDs>

If you decide to beat the exam, you must try our AI-900 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our Microsoft Azure AI Fundamentals prep torrent as the studying materials. So it is worthy for them to buy our product. The Microsoft Azure AI Fundamentals prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our AI-900 Exam Torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students.

Microsoft AI-900 (Microsoft Azure AI Fundamentals) Exam is a certification exam that focuses on the basics of Artificial Intelligence (AI) and its applications in Azure. AI-900 exam is designed to help professionals and students understand the core principles of AI, including machine learning, natural language processing, computer vision, and cognitive services. AI-900 Exam also covers the fundamentals of Azure AI services, including Azure Machine Learning, Azure Cognitive Services, and Azure Bot Service.

AI-900 Preparation Store & AI-900 Test Score Report

Free demo for AI-900 training materials is available, and you can have a try before buying, so that you can have a deeper understanding of what you are going to buy. We recommend you have a try before buying. In addition, AI-900 exam materials contain most of knowledge points of the exam, and you can master major knowledge points as well as improve your professional ability in the process of learning. We also pass guarantee and money back guarantee for AI-900 Training Materials, if you fail to pass the exam in your first attempt, we will give you full refund, and no other questions will be asked.

Passing the AI-900 certification exam demonstrates that the candidate has a fundamental understanding of AI technologies and their applications in the Azure ecosystem. It is an excellent way to showcase your skills and knowledge to potential employers and clients. Microsoft Azure AI Fundamentals certification also provides a solid foundation for further Microsoft Azure certifications in AI and data science. Overall, the Microsoft AI-900 Certification Exam is an excellent way to kickstart your career in AI and demonstrate your proficiency in the field.

Microsoft Azure AI Fundamentals Sample Questions (Q114-Q119):

NEW QUESTION # 114

Which statement is an example of a Microsoft responsible AI principle?

- A. AI systems must be understandable.
- B. AI systems must use only publicly available data.
- C. AI systems must protect the interests of the company
- D. AI systems must keep personal details public

Answer: A

Explanation:

The correct answer is C. AI systems must be understandable, which corresponds to the Transparency principle of Microsoft's Responsible AI framework.

According to the Microsoft Azure AI Fundamentals (AI-900) Official Study Guide and the Microsoft Learn module "Identify guiding principles for responsible AI", Microsoft defines six key principles for responsible AI:

- * Fairness - AI systems should treat everyone equitably.
- * Reliability and safety - AI should function as intended, even under unexpected conditions.
- * Privacy and security - AI must protect personal and business data.
- * Inclusiveness - AI should empower everyone and engage diverse users.
- * Transparency - AI systems should be understandable.
- * Accountability - People should be accountable for AI systems.

The statement "AI systems must be understandable" aligns directly with the Transparency principle, ensuring that AI decisions and behaviors can be explained and interpreted by developers, users, and stakeholders.

Microsoft emphasizes that transparent AI builds trust, allows debugging, and ensures ethical usage.

Other options are incorrect:

- * A. Use only publicly available data - Not a principle of Responsible AI.
- * B. Protect the interests of the company - Focused on business goals, not ethical AI.
- * D. Keep personal details public - Violates the Privacy and Security principle.

Final Answer (Q179): C. AI systems must be understandable.

NEW QUESTION # 115

To complete the sentence, select the appropriate option in the answer area.

Answer:

Explanation:

Explanation

To perform real-time inferencing, you must deploy a pipeline as a real-time endpoint.

Real-time endpoints must be deployed to an Azure Kubernetes Service cluster.

NEW QUESTION # 116

For each of the following statements, select Yes if the statement is True. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

< Smart home device answering questions # Yes

Webchat using Azure Bot Service # Yes

Auto-caption generation for videos # No

According to the Microsoft Azure AI Fundamentals (AI-900) official study guide and the Microsoft Learn module "Describe features of common AI workloads", Conversational AI refers to systems designed to engage in human-like dialogue through natural language-either text or speech. These systems include chatbots, virtual assistants, and voice-enabled smart devices, all of which can interpret user intent and respond meaningfully.

* A smart device in the home that responds to questions such as "When is my next appointment?" - Yes.

This is a classic example of Conversational AI. Devices like smart speakers or personal digital assistants use speech recognition, natural language understanding (NLU), and language generation to interpret spoken input and respond conversationally. The AI-900 study materials identify these as examples of voice-based conversational AI systems, which fall under the Speech and Language AI workloads.

* An interactive webchat feature on a company website can be implemented by using Azure Bot Service

- Yes. This statement is true. The Azure Bot Service is the primary Microsoft tool for creating and deploying conversational bots across various channels, including websites, Microsoft Teams, and other messaging platforms. The AI-900 syllabus specifically cites this as an example of implementing conversational AI for customer support or information retrieval.

* Automatically generating captions for pre-recorded videos is an example of conversational AI - No.

This is not conversational AI; instead, it falls under the Speech AI workload, specifically speech-to-text transcription. Automatically generating captions involves converting audio from video into written text but does not involve dialogue or interaction between a user and a system.

Thus, based on the official AI-900 guidance, only the first two scenarios describe conversational AI use cases.

NEW QUESTION # 117

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 118

You are building a tool that will process images from retail stores and identify the products of competitors.

The solution will use a custom model.

Which Azure Cognitive Services service should you use?

- A. Computer Vision
- **B. Face**
- C. Form Recognizer
- D. Custom Vision

Answer: B

Explanation:
