Real 300-820 Exams, 300-820 Latest Braindumps Ebook

In order to meet the time requirement of our customers, our experts carefully designed our 300-820 test torrent to help customers pass the exam in a lot less time. We hope everyone can prepare for their exam with minimal time investment. If you purchase our Implementing Cisco Collaboration Cloud and Edge Solutions guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our 300-820 study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your Implementing Cisco Collaboration Cloud and Edge Solutions exam and get your certification in the shortest time.

Candidates who pass the Cisco 300-820 Exam will be able to design, configure, and troubleshoot cloud and edge solutions using Cisco collaboration technologies. They will have a deep understanding of Cisco Webex, Cisco Unified Communications Manager (CUCM), Cisco Expressway, and other Cisco collaboration products. Implementing Cisco Collaboration Cloud and Edge Solutions certification is recognized globally and is a valuable addition to any IT professional's resume.

Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q208-Q213):

NEW QUESTION # 208

What is the benefit of configuring ICE, TURN and STUN in a Cisco Unified Collaboration environment?

- A. The ICE protocol enables the use of MRA for Cisco endpoints to register behind the firewall.
- **B. The endpoints discover paths to optimize media flow and allows for peer-to-peer media traffic in some cases.**
- C. It can traverse firewalls without opening incoming ports.
- D. The endpoints use fewer ports to minimize the port range and allows for multiple connections in a high-density deployment.

Answer: B

NEW QUESTION # 209

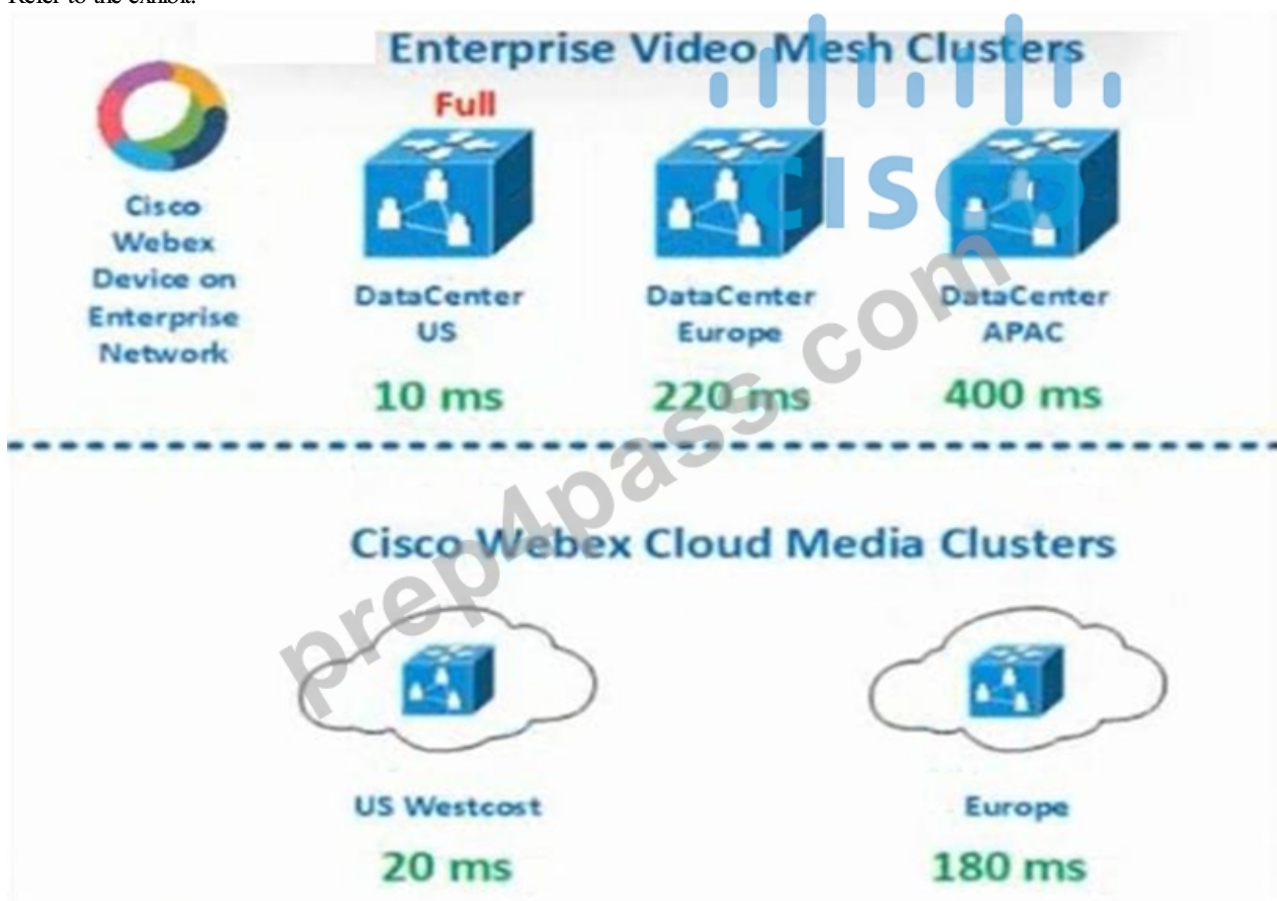

Which step is required when configuring cloud and hybrid deployments for Cisco Jabber?

- A. Add the Jabber user to Expressway-C.
- **B. Add Jabber Users to the Cisco Webex Administration Tool.**
- C. Add the Jabber user to Cisco Unity Connection.
- D. Add the Jabber user to Expressway-E.

Answer: B

NEW QUESTION # 210

Refer to the exhibit.

Refer to the exhibit. A Cisco Webex device on an enterprise network has identified the given STUN round-trip delays in milliseconds to the enterprise Video Mesh clusters and two Webex Cloud Media clusters during the call setup. Which correct sequence of clusters is the client connecting to?

- A. DC Europe. If DC Europe is full, US West Coast WCMC because clients select resources in the order of SRT delays but ignore SRTs greater than 250 ms.
- B. US West Coast WCMC. If US West Cost WCMC is full, then Europe WCMC because clients select clusters in the order of SRT delays.
- C. US West Coast WCMC. Clients continuously monitor DC US cluster and reconnect when DC US are available to save bandwidth.
- D. DC Europe. If DC Europe is full, DC APAC because clients select on-premises clusters in the order of SRT delays before using cloud resources.

Answer: A

NEW QUESTION # 211

A company is installing Cisco Collaboration infrastructure and one of the requirements is that they must be able to communicate with many external parties that are using H.323 and SIP. Internally they want to register the endpoints only on SIP. Which functionality would describe the feature that needs to be enabled and where to achieve this?

- A. Interworking in Expressway-C
- B. Transcoding in Expressway-C
- C. Transcoding in Cisco Unified Communications Manager
- D. Interworking in Cisco Unified Communications Manager

Answer: A

Explanation:

Interworking - interworking is required on expressway series to interwork H.323 to SIP calls.

CUCM is SIP only and does not support H.323 calls. Inteworking for B2B calls is always done at expressway level.

NEW QUESTION # 212

Drag and drop the services from the left onto their descriptions on the right. Some services are used more than once.

STUN	Clients use this protocol to obtain an IP address and port from a server.
ICE	Clients send requests to a server. The server responds with a packet, which contains client public source IP address and port in the payload.
TURN	Clients try to communicate to different candidate transport addresses of other clients to find a path they can use to exchange media.
	The service is a framework to interconnect clients behind different NAT devices.

Answer:

Explanation:
