Employers are looking for professionals who can protect their organizations from such threats and ensure that their information and assets are secure.

ISACA Certified Information Security Manager Sample Questions (Q956-Q961):

NEW QUESTION # 956

In a multinational organization, local security regulations should be implemented over global security policy because:

- A. requirements of local regulations take precedence
- B. business objectives are defined by local business unit managers.
- C. deploying awareness of local regulations is more practical than of global policy.
- D. global security policies include unnecessary controls for local businesses

Answer: A

NEW QUESTION # 957

Which of the following will identify a deviation in the information security management process from generally accepted standards of good practices?

- A. impact analysis (BIA)
- B. Penetration testing
- C. Risk assessment
- D. Gap analysis
- E. Business

Answer: D

NEW QUESTION # 958

Which of the following features is normally missing when using Secure Sockets Layer (SSL) in a web browser?

- A. Certificate-based authentication of web client
- B. Data confidentiality between client and web server
- C. Certificate-based authentication of web server
- D. Multiple encryption algorithms

Answer: A

Explanation:

Explanation/Reference:

Explanation:

Web browsers have the capability of authenticating through client-based certificates; nevertheless, it is not commonly used. When using https, servers always authenticate with a certificate and, once the connection is established, confidentiality will be maintained between client and server. By default, web browsers and servers support multiple encryption algorithms and negotiate the best option upon connection.

NEW QUESTION # 959

Which of the following BEST indicates a successful risk management practice?

- A. Inherent risk is eliminated
- B. Overall risk is quantified
- C. Residual risk is minimized
- D. Control risk is tied to business units

Answer: C

Explanation:

Explanation

A successful risk management practice minimizes the residual risk to the organization. Choice A is incorrect because the fact that overall risk has been quantified does not necessarily indicate the existence of a successful risk management practice. Choice B is incorrect since it is virtually impossible to eliminate inherent risk.

Choice D is incorrect because, although the tying of control risks to business may improve accountability, this is not as desirable as minimizing residual risk.

NEW QUESTION # 960

Which of the following is the MOST important factor in an organization's selection of a key risk indicator (KRI)?

- A. Return on investment
- **B. Criticality of information**
- C. Organizational culture
- D. Compliance requirements

Answer: B

NEW QUESTION # 961

.....
