

# 100% Pass 2026 Marvelous Oracle 1z1-076 Reliable Braindumps Book

Oracle 1z0-1105-22 Oracle Cloud Data Management 2022 Foundations Associate 3

**NEW QUESTION # 31**  
Which two methods can you use to create or modify Oracle Cloud Infrastructure (OCI) re-sources? (Choose all correct answers)

- A. Secure Shell (SSH)
- B. Remote Desktop Protocol (RDP)
- C. OCI Command-line Interface (CLI)
- D. Serial console connection (SCC)
- E. OCI REST APIs

**Answer: C,E**

**NEW QUESTION # 32**  
What are two main benefits of Oracle APEX? (Choose all correct answers)

- A. Store data in PL/SQL objects
- B. Less productivity compared to hand coding
- C. Faster development time using hand coding
- D. Rapidly develop, customize, and deliver secure applications
- E. Develop responsive web apps

**Answer: D,E**

**NEW QUESTION # 33**  
Which two statements are true regarding MySQL Database Service HeatWave? (Choose all correct answers)

- A. HeatWave uses periodic long-running ETL batch jobs to refresh the data.
- B. HeatWave uses machine learning to automate operations, increasing DBA productivity and reducing costs.
- C. HeatWave is a in-memory, query-processing engine designed for fast execution of ana-lytic queries.
- D. HeatWave data which is needed for analytic processing is stored in disk files.

**Answer: B,C**

**NEW QUESTION # 34**

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples---viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the 1z0-1105-22 appearances, or in other words, candidates' educational background and relating 1z0-1105-22 professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged 1z0-1105-22 Certification, can they become popular employees. So for you, the 1z0-1105-22 latest braindumps complied by our company can offer you the best help.

Realistic 1z0-1105-22 Reliable Dumps Book - 100% Pass Oracle Instant Oracle Cloud Data Management 2022 Foundations Associate Download

DOWNLOAD the newest VCEPrep 1z1-076 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1O2NKQc2FJpXMnf7CaOvTUyH1G67N0P4d>

Oracle 1z1-076 is one of the important certification exams. VCEPrep's experienced IT experts through their extensive experience and professional IT expertise have come up with IT certification exam study materials to help people pass Oracle Certification 1z1-076 Exam successfully. VCEPrep's providing learning materials can not only help you 100% pass the exam, but also provide you a free one-year update service.

## Oracle 1z1-076 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Using Oracle Active Data Guard: Supported Workloads in Read-Only Standby Databases: Here, the usage of physical standby databases for real-time queries is discussed.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Oracle Data Guard Broker Basics: An overview of the Data Guard broker, its architecture, components, benefits, and configurations, is provided here. It serves as an introduction to the tool used for managing Data Guard configurations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Monitoring a Data Guard Broker Configuration: The topic covers the use of Enterprise Manager and DGMGRL to monitor Data Guard configurations and explains the various data protection modes available.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Managing Physical Standby Files After Structural Changes on the Primary Database: The topic covers managing structural changes in the primary database and their impact on physical standby files.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Using Flashback Database in a Data Guard Configuration: This topic covers the configuration and advantages of using Flashback Database in a Data Guard setup, as well as the process of enabling fast-start failover for seamless role changes.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Creating a Logical Standby Database: This topic guides users through the process of creating and managing a logical standby database, including SQL Apply filtering.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Performing Role Transitions: Here, the concept of database roles is explained, along with the steps for performing switchovers, failovers, and maintaining physical standby sessions during role transitions.</li> </ul>

## 2026 Trustable 1z1-076 Reliable Braindumps Book | Oracle Database 19c: Data Guard Administration 100% Free New Learning Materials

Passing the 1z1-076 exam in the shortest time is the voice of all the examinees. But how to select the most valuable information in overwhelming learning materials is a headache thing for all examiners. After our unrelenting efforts, our 1z1-076 learning guide comes in everybody's expectation. Our professional experts not only have simplified the content and grasp the key points for our customers, but also recompiled the 1z1-076 Preparation materials into simple language, you will get a leisure study experience as well as a doomed success on your coming 1z1-076 exam.

### Oracle Database 19c: Data Guard Administration Sample Questions (Q94-Q99):

#### NEW QUESTION # 94

You are monitoring your Data Guard broker configuration and issue this set of DGMGRL commands:

```
DGMGRL> SHOW CONFIGURATION;
```

Configuration - DRSolution

Protection Mode: MaxPerformance

Databases:

Close\_by - Primary database

FS\_inst - Far Sync

Far\_away - Physical standby database

Fast-Start Failover: DISABLED

Configuration Status:

SUCCESS

What is true concerning this configuration?

- A. The Far Sync instance will not forward redo to the Far\_away physical standby because the Protection mode is not MaxProtection.
- B. The FS\_inst Far Sync instance forwards redo to the Far\_away physical standby only if the Close\_by primary database is not able to do so.

- C. The Close\_by primary database instance forwards redo to the FS\_inst Far Sync instance, which forwards the redo in turn to the Far\_away physical standby database instance.
- D. The Far Sync instance will not forward redo to the Far\_away physical standby because Fast-Start Failover is disabled.
- E. The Close\_by primary database forwards redo to the Far\_away physical standby directly and also sends redo to the FS\_inst Far Sync instance.

**Answer: C**

#### NEW QUESTION # 95

Which three Data Guard monitoring activities may be performed using Enterprise Manager Cloud Control?

- A. You can monitor the redo apply rate on a snapshot standby database.
- B. You can set a warning threshold on the redo generation rate metric for a physical standby database.
- C. You can set a critical threshold on the redo generation rate metric for a primary database.
- D. You can monitor the redo apply rate on a logical standby database.
- E. You can check the potential data loss in the event of a disaster.
- F. You can check if redo apply needs to be tuned.

**Answer: C,D,E**

#### NEW QUESTION # 96

Which two statements are true regarding asynchronous redo transport in a Data Guard

- A. A transaction can commit without waiting for redo to be sent to any standby database in the data guard configuration.
- B. Real-time query performance on a physical standby database improves for current read requests when using this transport mode.
- C. This transport mode satisfies the minimum requirements for Maximum Availability data protection mode.
- D. The performance of SQL apply on a logical standby database always improves when using this transport mode.
- E. This transport mode satisfies the minimum requirements for Maximum Performance data protection mode.

**Answer: A,E**

Explanation:

Asynchronous redo transport is a method where the primary database does not wait for an acknowledgment from the standby database before committing transactions, which helps in minimizing the impact on the primary database's performance (B). This transport mode is associated with the Maximum Performance data protection mode, which prioritizes performance over synchronicity of data between the primary and standby databases (C). While it provides a level of data protection, there could be some data loss in the event of a primary database failure because redo data may not have been transmitted to the standby database at the time of the failure.

Reference:

Oracle Data Guard Concepts and Administration documentation provides detailed explanations of different redo transport modes and their implications on data protection and performance. Asynchronous transport mode's behavior and association with Maximum Performance mode are outlined explicitly.

#### NEW QUESTION # 97

Which TWO observations are true about the Far Sync instance?

- A. Can only be created using a series of SQL commands
- B. Applies redo received
- C. Includes a standby control file, password file, data files, standby redo logs, and archive logs
- D. Receives redo synchronously from the primary database
- E. Can be created using the RMAN DUPLICATE command

**Answer: B,D**

Explanation:

A Far Sync instance is a special kind of Oracle Data Guard configuration that allows synchronous redo transport from a primary database to a remote standby database with minimum impact on the primary database's performance. The Far Sync instance

receives redo data synchronously from the primary database (A), then ships it asynchronously to the remote standby database, thus extending zero data loss protection over longer distances and higher network latency environments than would be practical with a synchronous standby alone. The Far Sync instance does not apply the redo data; it just receives and ships it (E). A Far Sync instance does not have data files, and it cannot apply redo to stay synchronized with the primary database.

Reference:

Oracle Database High Availability Overview and Oracle Data Guard Concepts and Administration documentation detail the role and configuration of Far Sync instances, including how they contribute to achieving zero data loss disaster recovery over long distances.

### NEW QUESTION # 98

Which feature is available when monitoring a Data Guard configuration using Enterprise Manager Cloud Control, but is not available using DGMGRL or by using SQL?

- A. Viewing a logical standby database apply lag
- B. Creating a broker configuration before creating the databases
- C. Automatic creation of standby redo logs
- D. Performing a verify operation
- E. Analyzing the dmon process trace file

Answer: A

### NEW QUESTION # 99

.....

If you want to advance in this fast-growing technological world, Oracle 1z1-076 certification is a must. Yet, the common problem the aspiring candidates undergo is seeking updated, authentic, and trustworthy Oracle 1z1-076 Dumps for the most cherished 1z1-076 certification exam.
