EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q20-Q25):

NEW QUESTION # 20

Table translations can be either case sensitive or not case sensitive.

- A. True
- B. False

Answer: A

Explanation:

Bridges provides a configuration toggle for Case Sensitivity within translation tables. This is crucial because some external systems might send values like "M" and "m" interchangeably, while others might use case to distinguish between two different codes. Setting this correctly ensures that the interface accurately matches the incoming string to the intended internal value.

NEW QUESTION # 21

An interface can be started if one or more of the profile variables say " Review Required. "

- A. False
- B. True

Answer: A

Explanation:

The " Review Required " status acts as a safety hard-stop in Bridges. This status usually appears after a system upgrade or when a new interface is created from a template. Bridges prevents the daemons from starting as long as a variable is marked for review to ensure that an analyst has verified that the settings are appropriate for the specific environment, preventing potential data filing errors.

NEW QUESTION # 22

The Communications Daemon translates the HL7 data it receives into Chronicles.

- A. False
- B. True

Answer: A

Explanation:

The Communications Daemon is only responsible for the transport of the message (connecting to the external system and moving raw data). The process of translating that data and filing it into Epic's database (Chronicles) is handled by the Filer Daemon .

NEW QUESTION # 23

Which documents can be shared with other software vendors interested in integrating with Epic interfaces?

- A. EDI101 Training Companion
- B. [Technical Specifications on open.epic.com](https://open.epic.com)
- C. Interface Reference Guides in Hyperspace
- D. Interface Reference Guides in Galaxy

Answer: B

Explanation:

Epic maintains a public-facing portal (open.epic.com) specifically for third-party vendors and developers.

While Interface Reference Guides (IRGs) in Hyperspace or Galaxy contain proprietary information intended for Epic customers, the Technical Specifications on open.epic.com are designed to be shared to facilitate interoperability and standards-based integration.

NEW QUESTION # 24

When applying a filter on a related record in the message companion, you notice that a message for a particular patient is not showing up in your results. Which of the following could be a reason for this behavior?

- A. The message was retriggered from another message.
- B. The message companion only works for outgoing messages.
- C. The patient is not linked to the message due to a failure error in message processing.
- D. You must specify "contains" instead of "equals" in your message search criteria.

Answer: C

Explanation:

The Message Companion relies on a successful link between a message and a specific record (like a Patient or Encounter). If a message encounters a failure error during processing (e.g., a critical identification error), Bridges may be unable to definitively link that message to the patient record in Chronicles. Because the link is missing, the message will not appear in tools like the Message Companion that filter specifically by that patient's ID.
