Amazon AWS Certified Cloud Practitioner Sample Questions (Q424-Q429):

NEW QUESTION # 424

A company needs a firewall that will control network connections to and from a single Amazon EC2 instance. This firewall will not control network connections to and from other instances that are in the same subnet.

Which AWS service or feature can the company use to meet these requirements?

- A. Route table
- B. Security group
- C. Network ACL
- D. AWS WAF

Answer: C

Explanation:

A network access control list (ACL) is an optional layer of security for your VPC that acts as a firewall for controlling traffic in and out of one or more subnets. You might set up network ACLs with rules similar to your security groups in order to add an additional layer of security to your VPC.
