

Reliable FCSS_SASE_AD-25 Test Forum & Valid FCSS_SASE_AD-25 Test Vce

P.S. Free & New FCSS_SASE_AD-25 dumps are available on Google Drive shared by ITExamSimulator:
<https://drive.google.com/open?id=1AE1DVYUuXcVDxQ-RP0a3cglsXB3q9fNP>

We Promise we will very happy to answer your question on our FCSS_SASE_AD-25 exam braindumps with more patience and enthusiasm and try our utmost to help you out of some troubles. So don't hesitate to buy our {Examcode} study materials, we will give you the high-quality product and professional customer services. As long as you study with our FCSS_SASE_AD-25 learning guide, you will be sure to get your dreaming certification.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Topic 2	<ul style="list-style-type: none">• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

Topic 3	<ul style="list-style-type: none"> Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Topic 4	<ul style="list-style-type: none"> Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.

Correct Reliable FCSS_SASE_AD-25 Test Forum & Leader in Qualification Exams & Pass-Sure Valid FCSS_SASE_AD-25 Test Vce

All these three Fortinet FCSS_SASE_AD-25 practice exam formats provide a user-friendly interface to users. The Fortinet FCSS_SASE_AD-25 PDF questions file is very installed on any device and operating system. After the quick Fortinet FCSS_SASE_AD-25 Pdf Dumps file installation you can run this file anywhere and anytime and start FCSS_SASE_AD-25 exam preparation.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- **A. Log allowed traffic is set to Security Events for all policies.**
- B. Digital experience monitoring is not configured.
- C. The web filter security profile is not set to Monitor
- D. There are no security profile group applied to all policies.

Answer: A

Explanation:

If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.

Log Allowed Traffic Setting:

The "Log allowed traffic" setting determines which types of traffic are logged.

When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.

Impact on Report Data:

If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.

This results in reports with minimal data, as only security-related events are included.

FortiOS 7.2 Administration Guide: Provides details on configuring logging settings for traffic policies.

FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

NEW QUESTION # 55

In the Secure Private Access (SPA) use case, which two FortiSASE features facilitate access to corporate applications? (Choose two.)

- A. cloud access security broker (CASB)

- B. SD-WAN
- C. zero trust network access (ZTNA)
- D. thin edge

Answer: B,C

Explanation:

SD-WAN allows efficient and secure routing of traffic from users to corporate applications, while ZTNA enables secure access control and verification for users connecting to internal resources, both of which are essential for Secure Private Access (SPA) in FortiSASE.

NEW QUESTION # 56

Refer to the exhibits.

□ Antivirus is installed on a Windows 10 endpoint, but the windows application firewall is stopping it from running. What will the endpoint security posture check be?

- A. FortiClient will prompt the user to enable antivirus.
- B. FortiClient telemetry will be disconnected because of failed compliance.
- C. FortiClient will block the endpoint from getting access to the network.
- D. FortiClient will tag the endpoint as FortiSASE-Non-Compliant.

Answer: C

NEW QUESTION # 57

Refer to the exhibit.

□ In the user connection monitor, the FortiSASE administrator notices the user name is showing random characters. Which configuration change must the administrator make to get proper user information?

- A. Configure the username using FortiSASE naming convention.
- B. Change the deployment type from SWG to VPN.
- C. Add more endpoint licenses on FortiSASE.
- D. Turn off log anonymization on FortiSASE.

Answer: D

Explanation:

In the user connection monitor, the random characters shown for the username indicate that log anonymization is enabled. Log anonymization is a feature that hides the actual user information in the logs for privacy and security reasons. To display proper user information, you need to disable log anonymization.

Log Anonymization:

When log anonymization is turned on, the actual usernames are replaced with random characters to protect user privacy. This feature can be beneficial in certain environments but can cause issues when detailed user monitoring is required.

Disabling Log Anonymization:

Navigate to the FortiSASE settings.

Locate the log settings section.

Disable the log anonymization feature to ensure that actual usernames are displayed in the logs and user connection monitors.

FortiSASE 23.2 Documentation: Provides detailed steps on enabling and disabling log anonymization.

Fortinet Knowledge Base: Explains the impact of log anonymization on user monitoring and logging.

NEW QUESTION # 58

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be assigned to endpoint profiles based on user groups.
- B. Zero-trust tags can help monitor endpoint system resource usage.
- C. Zero-trust tags can be used to allow or deny access to network resources.
- D. Zero-trust tags can determine the security posture of an endpoint.

Answer: C,D

Explanation:

Zero-trust tags assess endpoint compliance based on defined posture rules and are used in access policies to control whether a device is permitted or denied access to specific network resources.

NEW QUESTION # 59

.....

You can install Fortinet FCSS_SASE_AD-25 PRACTICE TEST file and desktop practice test software on your devices and easily start FCSS - FortiSASE 25 Administrator (FCSS_SASE_AD-25) exam preparation right now. Whereas the "ITExamSimulator" FCSS_SASE_AD-25 web-based practice test software is concerned, it is a simple browser-based application that works with all the latest web browsers. Just put the link of ITExamSimulator FCSS_SASE_AD-25 web-based practice test application in your browser and start Fortinet FCSS_SASE_AD-25 exam preparation without wasting further time. The "ITExamSimulator" is quite confident that you will be the next successful FCSS - FortiSASE 25 Administrator exam candidate.
