

# F5 F5CAB5 Valid Test Forum & Latest F5CAB5 Exam Cost

## Valid f5 Automating BIG-IP with Ansible learning program Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-f5-automating-big-ip-with-ansible-learning-program-certification-exam-educationry>

Before proceeding, one should also see all the essential features offered by us to get the right dumps material and that benefit as well. It includes two very easy format, one is the dumps and the other is an online practice test. Both have its own importance. One should have the actual questions and answers that help to get through the exam. For the comfort of the candidate, the real questions and answers are provided so that can easily learn the exam. The practice questions can be easily accessible and one can easily go through such material easily. The best part about the dumps is that one can download them easily anywhere like in the PC, laptop, or even on the smartphone device from where one can even prepare Exam when they are outside and away from home.

To clear the Exam, one should learn the dumps but it is also very important to enhance confidence and skills. For this purpose one should use the online practice test engine in order to get success. This helps the candidate to get through the exam easily. There is learning mode as well as test mode both of which will help at the same time. Experts had made the right dumps for the candidate in order to get success in the Exam. One can easily work hard by learning from these dumps and this won't waste time as well. The best thing is that these exam dumps help to clear all the concepts that helps the candidate proceed and clear the Exam in no time.

Often the syllabus of Exam gets updated. Because of which the candidate might get in trouble. But we take the responsibility to provide with all the recent information and exam syllabus changes to those who purchased the dumps for three months. This latest updates will help the candidate to prepare Exam as per the requirement. And with this update one can easily learn the exam. Searching for this type of dump can normally result in an error. So, to save as much time as you can, we suggest you use authentic exam dumps. The Dumps contain all the information that is required to pass the certification exam. They contain all the topics and questions that are asked during the certification exam and they are fully researched and verified by many people who have taken these exams previously. It means that they

Our company is a multinational company with sales and after-sale service of F5CAB5 exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related certification, then the BIG-IP Administration Support and Troubleshooting exam question compiled by our company is your solid choice. We have always set great store by superior after sale service, since we all tend to take responsibility for our customers who decide to choose our F5CAB5 Training Materials. We pride ourselves on our industry-leading standards of customer care.

So rest assured that with the Pass4Leader BIG-IP Administration Support and Troubleshooting (F5CAB5) practice questions, you will not only make the entire F5 F5CAB5 exam dumps preparation process and enable you to perform well in the final BIG-IP Administration Support and Troubleshooting (F5CAB5) certification exam with good scores. To provide you with the updated F5CAB5 Exam Questions the Pass4Leader offers three months updated BIG-IP Administration Support and Troubleshooting (F5CAB5) exam dumps download facility, Now you can download our updated F5CAB5 practice questions up to three months from the date of Pass4Leader BIG-IP Administration Support and Troubleshooting (F5CAB5) exam purchase.

## Latest F5CAB5 Exam Cost, F5CAB5 Valid Exam Test

Our Software version of F5CAB5 study materials has the advantage of simulating the real exam. The timing function in this Software of our F5CAB5 guide questions helps them adjust their speeds to answer the questions and the function of simulating the F5CAB5 Exam can help the learners adapt themselves to the atmosphere and pace of the exam. Thus the learners can master our F5CAB5 practice engine fast, conveniently and efficiently.

## F5 BIG-IP Administration Support and Troubleshooting Sample Questions (Q14-Q19):

### NEW QUESTION # 14

An organization is reporting slow performance accessing their Intranet website, hosted in a public cloud. All employees use a single Proxy Server with the public IP of 104.219.110.168 to connect to the Internet. What should the BIG-IP Administrator of the Intranet website do to fix this issue?

- A. Change Default Persistence Profile to cookie
- B. Change Source Address to 104.219.110.168/32
- C. Change Load Balancing Method to Least Connection
- D. Change Fallback Persistence Profile to source\_addr

**Answer: A**

Explanation:

This scenario describes a classic network performance issue known as the "Mega-Proxy" problem. When an organization routes all employee traffic through a single proxy server, the BIG-IP sees thousands of unique users as having the exact same source IP address. If the administrator has configured "Source Address Affinity" persistence, the BIG-IP will correctly follow the rule but incorrectly route all users to the same single backend pool member. This creates a severe load imbalance where one server is overwhelmed while others remain idle, leading to poor application response times. To resolve this, the administrator must change the persistence profile to "HTTP Cookie". Cookie-based persistence allows the BIG-IP to place a unique identifier in each user's browser, allowing the system to distinguish between individual sessions even if they share the same source IP. This fix ensures that traffic is distributed evenly across the pool members, restoring4 the expected load balancing functionality and resolving the slow performance reported by users behind the corporate proxy.

### NEW QUESTION # 15

Which two methods should the BIG-IP Administrator use to troubleshoot a pool member that has been marked DOWN by its health monitor? (Choose two answers)

- A. Enable monitor logging for the pool member that is DOWN.
- B. Review the BIG-IP routing table using netstat -m to show all routes.
- C. Review the pool and pool-member statistics table for error data.
- D. Collect a TCPdump packet capture for the DOWN pool member.

**Answer: A,D**

Explanation:

When a pool member is marked DOWN, it indicates that the configured health monitor is failing. The most effective troubleshooting approach is to focus on the monitor behavior and the actual traffic between BIG-IP and the pool member.

Enabling monitor logging (Option B) is a recommended first step. Monitor logging provides detailed information about why the health check is failing, such as timeouts, connection refusals, incorrect responses, or unexpected status codes. This directly correlates with BIG-IP troubleshooting best practices and allows administrators to confirm whether the failure is due to application behavior, incorrect monitor configuration, or network reachability.

Collecting a TCPdump packet capture (Option D) is also a highly effective method. A packet capture allows the administrator to verify whether the monitor probes are being sent, whether responses are received, and whether packets are being dropped, reset, or malformed. This is especially valuable when diagnosing firewall issues, SSL problems, or application-level failures.

Reviewing pool statistics (Option C) is useful for general monitoring but does not explain why a health monitor is failing. Reviewing the routing table (Option A) is typically unnecessary unless there is evidence of a broader routing issue affecting multiple destinations.

### NEW QUESTION # 16

resume is enabled and a health check first fails and then passes?

- A. Available (Enabled)
- B. Offline (Enabled)
- C. Available (Disabled)
- D. Offline (Disabled)

## Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Support and Troubleshooting documents: The "Manual Resume" feature is a safety mechanism used when a pool is not working as expected due to flapping services or unstable backend applications. Normally, when a health monitor fails, the pool member is marked "Offline" (Red), and when the monitor passes, it automatically returns to "Available" (Green)<sup>47</sup>. However, if "Manual Resume" is enabled, the BIG-IP will not automatically put the member back into rotation after a failure<sup>48</sup>. Even if the health check begins to pass again, the member remains in an "Offline (Disabled)" state<sup>49</sup>. This requires an administrator to manually intervene and re-enable the member. This is a common point of confusion when troubleshooting; a member may show passing health checks but still not receive traffic because it is waiting for a manual administrative "resume" command. This feature is intended to prevent "unhealthy" servers from receiving traffic until an engineer has confirmed the root cause of the initial failure was resolved.

## NEW QUESTION # 17

A BIG-IP Administrator configured the following virtual server to pass traffic on all addresses and ports. After configuration is completed, the BIG-IP Administrator notices that the virtual server is unable to pass traffic.

```
ltm virtual forwarding_any_vs {  
    destination 0.0.0.0:any  
    ip-forward  
    mask 255.255.255.255  
    profiles {  
        fastL4 {}  
    }  
    serverssl-use-sni disabled  
    source 0.0.0.0/0  
    translate-address disabled  
    translate-port disabled  
}
```

Which part of the configuration is the cause of the issue? (Choose one answer)

- A. Incorrect destination configured
- B. **Incorrect mask 255.255.255.255**
- C. Incorrect translate-address configured

## Answer: B

Explanation:

This virtual server is intended to function as a forwarding (IP-forwarding) virtual server, which is commonly used for routing or firewall-style deployments where BIG-IP forwards traffic transparently without load balancing or address translation. For a forwarding virtual server to match and pass all traffic, the destination must be configured as 0.0.0.0:any with a mask of 0.0.0.0, not 255.255.255.255.

The configured mask 255.255.255.255 represents a /32 host mask, which restricts the virtual server to matching traffic destined only for the exact IP address 0.0.0.0. Since 0.0.0.0 is not a valid routable destination for normal traffic, no packets will ever match the virtual server, causing it to pass no traffic at all.

This is a well-documented BIG-IP behavior:

```
destination 0.0.0.0:any  
mask 0.0.0.0
```

together define a catch-all forwarding virtual server.

The destination itself (Option A) is correct for a forwarding VS, and disabling address translation (Option C) is expected and required for IP-forwarding mode. Therefore, the incorrect subnet mask is the sole reason the virtual server is not functioning as expected.

## NEW QUESTION # 18

A BIG-IP Administrator is receiving intermittent reports from users that SSL connections to the BIG-IP device are failing. Upon checking the log files, the administrator notices: SSL transaction (TPS) rate limit reached. Reviewing stats shows a max of 1200 client-side SSL TPS and 800 server-side SSL TPS. What is the minimum SSL license limit capacity required to handle this peak?

- A. 0
- B. 1

- C. 2
- D. 3

#### Answer: D

Explanation:

Troubleshooting SSL connection resets often involves verifying license limits against actual resource utilization. F5 devices use a "Transactions Per Second" (TPS) license to control the amount of SSL processing the device can handle. The log entry SSL transaction (TPS) rate limit reached is a clear indicator that the traffic volume has exceeded the licensed capacity. When determining the necessary license level, it is important to know that F5 primarily licenses and limits the "Client-side" SSL TPS—which represents the encrypted connections between the users and the virtual servers. In this specific scenario, the peak demand reached 1200 client-side transactions per second. Although there were also 800 server-side transactions (re-encryption from the BIG-IP to the pool), these typically do not count against the primary TPS license limit in the same manner. Therefore, to ensure that the virtual server works as expected during peak load, the administrator must upgrade the license to at least 1200 TPS. This troubleshooting process links system log errors to license-enforced resource constraints.

#### NEW QUESTION # 19

.....

We know that the standard for most workers become higher and higher; so we also set higher goal on our F5CAB5 guide questions. Our training materials put customers' interests in front of other points, committing us to the advanced F5CAB5 learning materials all along. Until now, we have simplified the most complicated F5CAB5 Guide questions and designed a straightforward operation system, with the natural and seamless user interfaces of F5CAB5 exam question grown to be more fluent, we assure that our practice materials provide you a total ease of use.

**Latest F5CAB5 Exam Cost:** <https://www.pass4leader.com/F5/F5CAB5-exam.html>

It is better than F5CAB5 vce dumps questions, F5 F5CAB5 Valid Test Forum However great the difficulties may be, we can overcome them, Our F5CAB5 best questions are based on one-hand information resource and professional education experience, The latest Latest F5CAB5 Exam Cost - BIG-IP Administration Support and Troubleshooting study guide will be sent to you by e-mail, With these offers, our customers can be assured that they have the latest and most reliable prepare for your BIG-IP Administration Support and Troubleshooting (F5CAB5) preparation material.

Everything I did fed my hunger to learn more and become a better web designer, Debugging: Your Key to Successful Development, Downloadable Version, It is better than F5CAB5 VCE Dumps questions.

#### Top F5CAB5 Valid Test Forum 100% Pass | High Pass-Rate Latest F5CAB5 Exam Cost: BIG-IP Administration Support and Troubleshooting

However great the difficulties may be, we can overcome them, Our F5CAB5 best questions are based on one-hand information resource and professional education experience.

The latest BIG-IP Administration Support and Troubleshooting study guide will be sent to you by e-mail, With these offers, our customers can be assured that they have the latest and most reliable prepare for your BIG-IP Administration Support and Troubleshooting (F5CAB5) preparation material.
