Mit der Entwicklung der IT-Industrie nimmt die Zahl der IT-Lerner seit Jahren immer zu. Das führt zu immer stärkerer Konkurrenz. Und es ist undenkbar, dass Sie in IT-Industrie von anderen überschritten sind. Deshalb sollen Sie Ihre Fähigkeit ständig erhöhen und Ihre Stärke zu anderen beweisen. Wie können Sie Ihre Fähigkeit zu anderen beweisen? Immer mehr Leute wählen IT-Zertifizierungen, Ihre Fähigkeit zu beweisen. Wollen Sie auch? Kommen Sie zuerst zu Microsoft MB-500 Zertifizierungsprüfung. Das ist die wichtigste Microsoft Prüfung und auch von vielen Unternehmen anerkannt.

Um die Microsoft MB-500-Zertifizierungsprüfung zu bestehen, müssen die Kandidaten ihre Fähigkeit demonstrieren, Sicherheits-, Entwerfen und Entwicklung von Lösungen mithilfe der Power-Plattform zu konfigurieren und zu implementieren und mit anderen Anwendungen und Diensten Dynamics 365-Finanzierungen zu integrieren. Die Prüfung umfasst auch Themen wie Datenmigration, Datenmanagement und Leistungsoptimierung. Das Bestehen dieser Prüfung wird das Wissen und die Fähigkeiten des Kandidaten im Zusammenhang mit Dynamics 365 Finance and Operations Application -Entwicklung validieren und es ermöglichen, zu einem zertifizierten Microsoft Dynamics 365: Finance and Operations Apps Developer zu werden.

>> MB-500 Probesfragen <<

Die seit kurzem aktuellsten Microsoft Dynamics 365: Finance and Operations Apps Developer Prüfungsunterlagen, 100% Garantie für Ihren Erfolg in der Microsoft MB-500 Prüfungen!

Es ist Ihnen weis, ZertPruefung zu wählen, um die Microsoft MB-500 Zertifizierungsprüfung zu bestehen. Sie können im Internet die Fragenkataloge zur Microsoft MB-500 Zertifizierungsprüfung von ZertPruefung teilweise kostenlos herunterladen. Dann werden Sie mehr Vertrauen in unsere Produkte haben. Sie können sich dann gut auf Ihre Microsoft MB-500 Zertifizierungsprüfung vorbereiten. Für den Durchfall in der Prüfung, zahlen wir Ihnen die gesamte Summe zurück.

Microsoft Dynamics 365: Finance and Operations Apps Developer MB-500 Prüfungsfragen mit Lösungen (Q39-Q44):

39. Frage

A company is implementing Dynamics 365 Finance. Vendors receive a risk rating that is determined by their on-time delivery performance as well as their credit rating.

You need to implement the following risk rating functionality:

- * The risk rating must accompany the credit rating when the credit rating is used.
- * The risk rating must be able to be used in other areas of the solution to determine processing outcomes.
- * The risk rating must consist of the following values:

- 1 = Good
- 2 = Medium
- 3 = Risky

- * The risk rating must be displayed in the Miscellaneous Details tab below the Credit Rating and Credit Limit fields in the Vendor

form.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Create values for the risk ratings.	▼ Create a composite entity. Create a new enum base data type. Create a new enum extension. Create an option set.
Create the risk rating field.	▼ Create a table extension. Create an aggregate data entity. Create an enum extension.
Ensure that credit limit and risk rating are always used together.	▼ Use a field group Use a relationship. Use an index.

Antwort:

Begründung:

Requirement	Action
Create values for the risk ratings.	▼ Create a composite entity. Create a new enum base data type. Create a new enum extension. Create an option set.
Create the risk rating field.	▼ Create a table extension. Create an aggregate data entity. Create an enum extension.
Ensure that credit limit and risk rating are always used together.	▼ Use a field group Use a relationship. Use an index.

Explanation:

Graphical user interface, text, application, email Description automatically generated

Create values for the risk ratings.

	▼
Create a composite entity.	
Create a new enum base data type.	
Create a new enum extension.	
Create an option set.	

Create the risk rating field.

	▼
Create a table extension.	
Create an aggregate data entity.	
Create an enum extension.	

Ensure that credit limit and risk rating are always used together.

	▼
Use a field group	
Use a relationship.	
Use an index.	

Box 1: Create a new enum base data type.

An enum is a list of literals.

Box 2: Create a table extension

After base enums and EDTs are created, they are usually added to a table to enable data capture.

Box 3: Use a field group

Field and Field Groups is the most common data entry subpattern and uses a dynamic number of columns to present multiple fields or groups of fields.

The group controls within this pattern can be used either to group fields under a label or to bind to a table field group.

40. Frage

A user reports that a form takes a long time to load. You suspect that the issue relates to a display method.

You need to resolve the issue.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action	Improves performance
Add the following attribute to the display method: [SysClientCachedataMethodAttribute(true)]	▼ true false
Set the value of the Enabled property to No for any display fields that are not needed.	▼ true false
Set the value of the Visible property to No for any display fields that are not needed.	▼ true false
Set the value of the Skip property to Yes for any display fields that are not needed.	▼ true false

Antwort:

Begründung:

Action	Improves performance
Add the following attribute to the display method: [SysClientCachedataMethodAttribute(true)]	▼ true false
Set the value of the Enabled property to No for any display fields that are not needed.	▼ true false
Set the value of the Visible property to No for any display fields that are not needed.	▼ true false
Set the value of the Skip property to Yes for any display fields that are not needed.	▼ true false

Explanation:

Action	Improves performance
Add the following attribute to the display method: [SysClientCachedataMethodAttribute(true)]	☐ ☒ true ☐ false
Set the value of the Enabled property to No for any display fields that are not needed.	☐ ☐ true ☒ false
Set the value of the Visible property to No for any display fields that are not needed.	☐ ☐ true ☒ false
Set the value of the Skip property to Yes for any display fields that are not needed.	☐ ☐ true ☒ false

Box 1: Yes

The caching will avoid executing the display method unnecessarily.

To improve the performance of a display method, you can cache the method.

Box 2: No

Box 3: No

Box 4: No

41. Frage

You are a Dynamics 365 Finance developer.

You need to troubleshoot performance issues for a client.

Which Lifecycle Services (LCS) tools should you use for each environment? To answer, drag the appropriate environment types to the correct tools. Each environment type may be used once, more than once, or not at all. You may need to drag the split bar between panes scroll to view content.

NOTE: Each correct selection is worth one point.

Environment types	Tool	Environment type
User Acceptance Testing (UAT) only	Activity Monitoring	
Build only	SQL Insights	
User Acceptance Testing (UAT) and Build	System Diagnostics	

Antwort:

Begründung:

Answer Area

Environment types	Tool	Environment type
User Acceptance Testing (UAT) only	Activity Monitoring	User Acceptance Testing (UAT) and Build
Build only	SQL Insights	User Acceptance Testing (UAT) only
User Acceptance Testing (UAT) and Build	System Diagnostics	Build only

Explanation:

Box 1: User Acceptance Testing (UAT) and Build

Box 2: User Acceptance Testing (UAT) Only

Not all environments contain all the tools. The following table shows the tools that are available for each type of environment.

Environment type	Tools
Production systems	- Activity monitoring - Environment monitoring - SQL insights - System diagnostics
User acceptance testing (UAT)/sandbox	- Activity monitoring - SQL insights - System diagnostics
Demo/build	- Activity monitoring - System diagnostics

Box 3: Build only

42. Frage

You need to design integrations for the freight processing source system Which integration strategies should you implement? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is with one point.

Answer Area

Microsoft

Element	Value
Integration type	☐ Asynchronous ☐ Synchronous
Job type	☐ One time job ☐ Recurring job
Process type	☐ Real time ☐ Non-real time

These are the selections for the job type.

43. Frage

D18912E1457D5D1DDC'BD40AB3BF70D5D

You are a Dynamics 365 Finance and Operations developer.

You need to deploy a new report in a development environment.

From which two locations can you deploy the report? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Application Explorer
- B. Build Models options
- C. Package deployment
- D. Solution Explorer
- E. Build project

Antwort: C,D

Begründung:

A: An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources.

D:
