As we all know, it is a must for all of the candidates to pass the exam if they want to get the related C-BCBTM-2509 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. Our C-BCBTM-2509 Exam Question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Now I would like to give you some detailed information about the advantages of our C-BCBTM-2509 guide torrent.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q28-Q33):

NEW QUESTION # 28

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- **A. Not knowing how and where to start their transformation journey**
- B. Inability to generate financial reports due to a lack of data analytics capabilities
- **C. Lack of transparency into processes and system landscapes**
- **D. Alignment between business and IT**
- E. Significant reduction in product quality

Answer: A,C,D

Explanation:

According to SAP's Business Transformation Management (BTM²) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

NEW QUESTION # 29

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. Business processes are directly controlled by SAP LeanIX applications.
- B. The tools only provide visualization without actionable insights.
- **C. The integration allows linking of business applications to business processes.**
- D. Integration solely enhances reporting capabilities.

Answer: C

Explanation:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

NEW QUESTION # 30

What are the benefits of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- **A. They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.**
- **B. They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.**
- C. They are tools limited to IT landscape analysis and financial reporting.
- D. They are process mining tools which can help identifying process and IT infrastructure bottlenecks.

Answer: A,B

Explanation:

SAP Business Transformation Management (BTM) Solutions are comprehensive, cross-functional tools designed to give organizations visibility across business processes, people, and technology - empowering them to manage digital transformation effectively.

"SAP BTM solutions provide end-to-end visibility across processes, people, and applications, helping organizations streamline ERP transformation initiatives." Reference:

Visibility Across the Enterprise (Answer B):

SAP BTM combines the analytical power of SAP Signavio (process intelligence), SAP LeanIX (enterprise architecture), and WalkMe (adoption enablement) to support holistic transformation initiatives.

"BTM solutions provide a unified view of the business and IT landscape, ensuring transparency across processes, systems, and stakeholders." Driving Digital Transformation and Efficiency (Answer C):

These solutions enable companies to improve process performance and IT infrastructure through insight-driven optimization and modernization.

"By enhancing process efficiency and IT infrastructure management, SAP BTM empowers organizations to drive digital transformation with measurable business outcomes." Incorrect Options:

A: BTM solutions go far beyond IT analysis; they connect business, IT, and people perspectives.

D: While process mining is part of the suite (via Signavio), BTM offers much broader transformation management beyond mining alone.

Therefore, the verified answers are:

B: They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.

C: They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.

NEW QUESTION # 31

What roles do SAP Business Transformation Management solutions play in transformation scenarios?

(Note: There are 2 correct answers to this question.)

- A. They are limited to the operate phase of transformations.
- **B. They provide a data-driven approach for Enterprise Observability.**
- **C. They support change management.**
- D. They analyze as-is processes and IT landscapes only.

Answer: B,C

Explanation:

SAP Business Transformation Management (BTM) Solutions are designed to guide organizations through the complete transformation lifecycle, from strategy and planning to implementation and adoption. They combine process analysis, enterprise architecture management, and user adoption capabilities through solutions such as SAP Signavio, SAP LeanIX, and WalkMe. "SAP's Business Transformation Management Solutions deliver an integrated, data-driven foundation that provides visibility, transparency, and governance across all phases of business transformation while supporting organizational change management."

Reference:

Supporting Change Management (Answer B):

A core objective of SAP BTM solutions is to enable and sustain change across people, processes, and technology. Through SAP Signavio's collaborative design tools and WalkMe's adoption capabilities, organizations can manage stakeholder engagement, communication, and behavior alignment effectively.

"BTM Solutions provide tools to manage the human side of transformation, ensuring that employees adapt successfully to new processes and technologies." Providing a Data-Driven Approach for Enterprise Observability (Answer C):

BTM Solutions deliver data-based visibility into business and IT landscapes through SAP LeanIX and SAP Signavio integration. This allows organizations to observe and measure transformation progress, dependencies, and business value using live data.

"SAP BTM Solutions integrate business process intelligence with enterprise architecture management, providing a data-driven approach to enterprise observability for informed transformation decisions." Why Other Options Are Incorrect:

A: Incorrect - BTM Solutions are not limited to the operate phase; they span discover, design, deliver, and run phases of transformation.

D: Incorrect - They analyze both as-is and to-be states to enable continuous improvement and future-state optimization.

Therefore, the verified and correct answers according to SAP BTM documentation are:

B: They support change management.

C: They provide a data-driven approach for Enterprise Observability.

NEW QUESTION # 32

What makes SAP Signavio and SAP LeanIX a powerful combination?

(Note: There are 2 correct answers to this question.)

- A. We can reduce the time for financial reporting by 70% on average.
- **B. Both solutions focus on transforming businesses from a current state to a future state.**
- C. We can help our customers lay off 20 to 30 percent of their workforce and therefore reduce costs tremendously.
- **D. They help our customers understand the important aspects of a transformation: processes, people, systems, and applications.**

Answer: B,D

NEW QUESTION # 33
