## Pass Guaranteed Quiz 2026 Perfect Palo Alto Networks CloudSec-Pro: Fresh Palo Alto Networks Cloud Security Professional Dumps

To succeed on the Palo Alto Networks CloudSec-Pro exam, you require a specific Palo Alto Networks CloudSec-Pro exam environment to practice. But before settling on any one method, you make sure that it addresses their specific concerns about the CloudSec-Pro exam, such as whether or not the platform they are joining will aid them in passing the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam on the first try, whether or not it will be worthwhile, and will it provide the necessary CloudSec-Pro Questions.

## Palo Alto Networks Cloud Security Professional Sample Questions (Q187-Q192):

### NEW QUESTION # 187

Which type of query is used for scanning Infrastructure as Code (IaC) templates?

- A. XML
- B. API
- C. JSON
- D. RQL

**Answer: C**

Explanation:

<https://www.paloaltonetworks.com/blog/prisma-cloud/cloud-iac-build-policies/>

### NEW QUESTION # 188

Which statement applies to Adoption Advisor?

- A. It includes security capabilities from subscriptions for CSPM, CWP, CCS, OEM, and Data Security.
- B. It only provides guidance during the deploy phase of the application lifecycle.
- C. It is only available for organizations that have completed the cloud adoption journey.
- D. It helps adopt security capabilities at a fixed pace regardless of the organization's needs.

**Answer: A**

Explanation:

Adoption Advisor is a feature within Prisma Cloud that provides organizations with guidance on adopting various security capabilities based on their unique needs and the stage they are at in their cloud security journey. It doesn't enforce a fixed pace but rather suggests a tailored path for enhancing security posture, taking into account the organization's specific requirements and the complexity of their cloud environment.

The Adoption Advisor supports a broad range of security capabilities, encompassing Cloud Security Posture Management (CSPM), Cloud Workload Protection (CWP), Cloud Code Security (CCS), Out-of-Band (OEM), and Data Security. This comprehensive approach ensures that organizations can secure their cloud environments effectively across different phases of the application lifecycle, from development to deployment, and across various cloud resources and services.

### NEW QUESTION # 189

A customer is interested in PCI requirements and needs to ensure that no privilege containers can start in the environment. Which action needs to be set for "do not use privileged containers"?

- A. Alert
- B. Block
- C. Prevent
- D. Fail

**Answer: B**

Explanation:

Block - Defender stops the entire container if a process that violates your policy attempts to run.

### NEW QUESTION # 191

Which policy type should be used to detect and alert on cryptominer network activity?

- A. Config-build
- B. Audit event
- C. Config-run
- **D. Anomaly**

**Answer: D**

Explanation:

To detect and alert on cryptominer network activity, the policy type that should be used is an Anomaly policy.

Anomaly policies in Prisma Cloud are designed to identify unusual and potentially malicious activities, including the network patterns typical of cryptomining operations. These policies leverage behavioral analytics to spot deviations from normal operations, making Option B the correct answer.

Suspicious network actors-Exposes suspicious connections by inspecting the network traffic to and from your cloud environment and correlating it with AutoFocus, Palo Alto Networks threat intelligence feed.

AutoFocus identifies IP addresses involved in suspicious or malicious activity and classifies them into one of eighteen categories.

Some examples of the categories are Backdoor, Botnet, Cryptominer, DDoS, Ransomware, Rootkit, and Worm. There are thirty-six policies, two for each of the eighteen categories- internal and external. <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-policies/anomaly-policies>

### NEW QUESTION # 192

.....

Based on our years of experience, taking the Palo Alto Networks CloudSec-Pro exam without proper preparation is such a suicidal move. The Palo Alto Networks Cloud Security Professional is not easy to achieve because you first need to pass the Palo Alto Networks Cloud Security Professional CloudSec-Pro exam. The only way to be successful with your Palo Alto Networks Cloud Security Professional exam is by preparing it well with Palo Alto Networks CloudSec-Pro Dumps. This Palo Alto Networks Cloud Security Professional CloudSec-Pro exam is not even easy to go through. Most people failed it due to a lack of preparation.
