

# CCRN-Pediatric Valid Exam Test & CCRN-Pediatric Reliable Braindumps Questions

## Pediatric CCRN Exam Study Guide Questions with Complete Solutions 2025

SIADH Labs/Diagnostics - Correct Answer -Hyponatremia (yet euovolemic) Na<135

- Decreased serum osmolality (<280)
- Increased serum urine osmolality (>100)
- Urine sodium >20
- Renal, cardiac, thyroid function normal
- Spec grav INCREASED

DI labs - Correct Answer \*urine chemistry\*:

- think \*DILUTE\*
- >>decreased spec gravity (<1.005)
- >>decreased urine osmolality
- >>decreased urine pH, Na, and K

\*Serum chemistry\*

- think \*CONCENTRATED\*
- >>increased serum osmolality (>300mOsm/l)
- >>increased serum Na and K

\*Radioimmunoassay\*: decreased ADH

SIADH causes - Correct Answer TBI, HIE, Injury to hypothalamus or post pituitary

SIADH Patho - Correct Answer excess ADH= fluid retention, decreased serum osm (low solute to H2O ratio), dilutional hyponatremia (a fast drop leads to neuro change)

SIADH tx - Correct Answer Fluid restriction, IV hypertonic saline SLOWLY to prevent central pontine myelinolysis,  
conivaptan/tolvaptan, \*demeclocycline\*  
Stop cyclophosphamide  
Loop diuretics

## Pass Guaranteed Quiz 2026 Valid AACN CCRN-Pediatric Valid Exam Test

We invited a large group of professional experts who dedicated in this CCRN-Pediatric training guide for more than ten years. To improve the accuracy of the CCRN-Pediatric guide preparations, they keep up with the trend closely. Every page is carefully

arranged by them with high efficiency and high quality. Up to now, there are three versions of CCRN-Pediatric Exam Materials for your choice. So high-quality contents and flexible choices of CCRN-Pediatric learning mode will bring about the excellent learning experience for you.

AACN CCRN-Pediatric exam is a critical care nursing certification that is specifically designed for pediatric nurses. CCRN-Pediatric exam is intended to assess the knowledge and competency of nurses who work in the field of pediatric critical care. Becoming certified through CCRN-Pediatric Exam can be a valuable credential for nurses and can demonstrate a commitment to providing high-quality care to critically ill children.

## **AACN Critical Care Nursing Exam Sample Questions (Q123-Q128):**

### **NEW QUESTION # 123**

During an exchange transfusion for sickle cell crisis, the patient becomes anxious and reports tingling and numbness around the mouth. The nurse should administer:

- A. Potassium
- B. Lorazepam
- **C. Calcium**
- D. Magnesium

**Answer: C**

Explanation:

Citrate, a preservative used in banked blood, binds with calcium, causing hypocalcemia-a known complication of rapid or large-volume transfusions like exchange transfusion. Symptoms include perioral tingling, numbness, muscle twitching, and anxiety. Administration of IV calcium gluconate or calcium chloride is indicated.

"Rapid transfusion of blood products can result in hypocalcemia due to citrate toxicity. Signs include tingling, muscle irritability, and anxiety. Calcium replacement is required." (Referenced from CCRN Pediatric - Direct Care: Hematology, Transfusion Reactions and Electrolyte Management)

### **NEW QUESTION # 124**

A 9 year old child who has a sickle cell anemia is admitted to the pediatric unit with a pain episode.

When assigning a roommate it is not appropriate for a nurse to place a child who has:

- A. Thalassemia
- B. acute myelogenous leukemia
- **C. chronic osteomyelitis**
- D. sever asthma

**Answer: C**

Explanation:

Explanation: A child with sickle cell anemia is prone to infection so it is not advisable to assign a roommate who has an infection of the bones.

### **NEW QUESTION # 125**

A pre-schooler is being prepared for an ear surgery in an ambulatory care facility. When the child is called to go to the operating room, the nurse should:

- A. Remove the child's toy.
- **B. Allow the parents to accompany the child until he is sedated.**
- C. Allow the child to walk from the unit.
- D. Ask the parents to leave the room and wait outside.

**Answer: B**

Explanation:

Explanation: Most health institutions allow the parents accompany the child until he is sedated and to stay with the child as long as possible. This minimizes the stress related to fearful events. Also, current theory is consistent that parents should remain during the

induction of anesthesia due to parent's positive feedback.

#### **NEW QUESTION # 126**

Which of the following nursing diagnosis would the nurse identify as the priority for a 4-month-old infant with heart failure and congenital heart disease:

- A. risk for infection
- **B. activity intolerance**
- C. ineffective health maintenance
- D. impaired mobility

**Answer: B**

Explanation:

Explanation: An infant with congenital heart disease and congestive heart failure tires very easily, leading to a priority nursing diagnosis of Activity Intolerance. Nursing care needs to focus on allowing the infant to have frequent rest periods. Infants with congenital heart disease and congestive heart failure are not necessarily at risk for more infections than other infants. Impaired Mobility usually is not a problem because an infant with congenital heart disease usually exhibits normal physical mobility. Ineffective Health Maintenance usually is not a problem because these infants still need regular and routine health check-ups

#### **NEW QUESTION # 127**

A mother tells the nurse "the doctor said that my child has pulmonic stenosis. What does it mean?" The nurse's best response should be:

- A. "Let me call your doctor so that your questions will be answered correctly"
- B. "You seemed very concerned. Your baby has a great doctor anyway"
- C. "It means that the baby has a heart failure"
- **D. "What else did the doctor say about the disease"**

**Answer: D**

Explanation:

Explanation: The nurse needs to know how much information the mother has before giving any information. We know that the disease is narrowing at the entrance to the pulmonary artery and may vary in severity and treatment. Calling the doctor at this point abdicates the role of the nurse.

#### **NEW QUESTION # 128**
