VMware 2V0-11.25 Latest Dumps Questions & 2V0-11.25 Valid Examcollection

PassLeaderVCE is a platform that will provide candidates with most effective 2V0-11.25 study materials to help them pass their 2V0-11.25 exam. It has been recognized by all of our customers, because it was compiled by many professional experts of our website. Not only did they pass their 2V0-11.25 Exam but also got a satisfactory score. These are due to the high quality of our 2V0-11.25 study torrent that leads to such a high pass rate as more than 98%. You will never feel dispointment about our 2V0-11.25 exam questions.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.
Topic 2	• IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 3	• Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.
Topic 4	• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 5	• VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.

2V0-11.25 Exam Prepare is a Stepping Stone for You to Pass 2V0-11.25 Exam - PassLeaderVCE

It is quite clear that most candidates are at their first try, therefore, in order to let you have a general idea about our 2V0-11.25 test engine, we have prepared the free demo in our website. The contents in our free demo are part of the real materials in our 2V0-11.25 study engine. Just like the old saying goes "True blue will never strain" You are really welcomed to download the free demo in our website to have the firsthand experience, and then you will find out the unique charm of our 2V0-11.25 Actual Exam by yourself.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q120-Q125):

NEW QUESTION # 120
After deploying the VMware Cloud Foundation management domain, an administrator needs to configure backup for the components within the domain.
Which two steps are involved in configuring the backup of VMware Cloud Foundation management components? (Choose two.)

- A. Manually export the NSX configuration to the SDDC Manager.
- B. Create a backup schedule on the SDDC manager to automate taking regular backups.

- C. Install a third-party backup solution on each ESXi host.
- D. Enable the vCenter Server snapshot manager on the SDDC Manager.
- E. Configure an external SFTP backup repository on the SDDC Manager.

Answer: B,E

NEW QUESTION # 121
Which two SDDC Manager operations can be executed on an NSX Edge cluster after it has been deployed?
(Choose two.)

- A. Delete
- B. Redeploy
- C. Expand
- D. Shrink
- E. |Sync

Answer: A,E

Explanation:
After an NSX Edge cluster has been deployed, you can perform a sync operation to ensure the NSX Edge cluster is in sync with the configuration in SDDC Manager.
Deleting an NSX Edge cluster can be done after it has been deployed if it is no longer required or needs to be removed from the environment.

NEW QUESTION # 122
What is the first step in downloading the vSphere CLI tools to a developer workstation?

- A. Install a compatible version of Java Runtime Environment
- B. Register the developer workstation with the Active Directory.
- C. Configure the workstation's network settings to connect to the vSphere environment.
- D. Visit the VMware Downloads page and locate the vSphere CLI tools.

Answer: D

Explanation:
The first step in downloading the vSphere CLI tools is to visit the VMware Downloads page, where the vSphere CLI tools are available. From there, you can select the appropriate version for your environment and begin the download process.

NEW QUESTION # 123
An organization is looking to streamline its IT service delivery by automating the deployment of applications and infrastructure across its hybrid cloud environment.
Which VMware Aria Suite component should they use?

- A. Aria Operations
- B. Aria Automation
- C. Aria Operations for Logs
- D. Aria Operations for Networks

Answer: B

Explanation:
Aria Automation (formerly vRealize Automation) is designed to automate the deployment of applications and infrastructure across hybrid cloud environments. It enables the provisioning, management, and orchestration of IT services, helping organizations streamline their service delivery.

NEW QUESTION # 124

An administrator is troubleshooting a high CPU usage issue of the SDDC Manager VM. Access to SDDC Manager UI is exhibiting degraded performance.

What two steps should the administrator take to diagnose the issue? (Choose two.)

- A. Reconfigure the DRS settings to be more aggressive in load balancing.
- B. Upgrade the vSphere version to the latest release.
- C. Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU.
- D. Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted.
- E. Reboot the SDDC Manager VM to clear any temporary issues.

Answer: C,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
When troubleshooting high CPU usage on the SDDC Manager VM, the recommended diagnostic steps are:
Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU (B): The official documentation instructs administrators to use system monitoring commands such as top or htop within the SDDC Manager appliance to determine if specific processes or services are causing elevated CPU usage. This helps pinpoint the root cause inside the VM.
Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted (D): High CPU usage within the SDDC Manager VM could also result from overall CPU contention on the physical ESXi hosts. Checking host-level CPU usage can help determine if the underlying infrastructure is contributing to the performance issue. The documentation emphasizes reviewing host resource metrics to ensure the management cluster is not overcommitted.
Other options such as rebooting the VM, upgrading vSphere, or modifying DRS settings are not recommended as initial diagnostic steps according to official guidance. Rebooting or changing configurations without proper analysis may disrupt services or not address the root cause.

NEW QUESTION # 125
......

PassLeaderVCE is committed to offering the real and valid VMware Cloud Foundation 5.2 Administrator 2V0-11.25 exam questions in three easy-to-use and compatible formats. These formats are VMware PDF Questions files, desktop practice test software, and web-based 2V0-11.25 practice test software. All these three 2V0-11.25 exam dumps formats contain the real and updated 2V0-11.25 Practice Test questions and are verified by qualified 2V0-11.25 exam experts. So you do not need to get worried about it choose the right PassLeaderVCE 2V0-11.25 exam questions formats and start this journey without wasting further time.
