## Salesforce Certified User Experience Designer Sample Questions (Q91-Q96):

### NEW QUESTION # 91

Cloud Kicks is planning to build a custom Lightning Web Component (LWC) that needs to be implemented quickly. Where should the team go to explore Lightning component code, documentation, and specifications?

- A. Salesforce Extensions for V5 Code
- B. Design Tokens on SLDS website
- C. A Components Library on developer.salesforce.com is item for later review.

**Answer: C**

Explanation:

Explanation

The best place for the team to explore Lightning component code, documentation, and specifications is the Components Library on developer.salesforce.com<sup>1</sup>. The Components Library is the Lightning components developer reference, where the team can find code samples, SDKs, tools, metadata coverage information, and a developer guide for Lightning Web Components<sup>1</sup>. The team can also use the live code environment to code their first Lightning web component and see the results in real time<sup>2</sup>. Salesforce Extensions for VS Code (A) is a powerful tool for developing Lightning components, but it is not a source of code, documentation, and specifications. Design Tokens on SLDS website (B) are a way to store and maintain consistent design attributes across different platforms, but they are not specific to Lightning Web Components. References:

#### NEW QUESTION # 92

A UX Designer at Cloud Kicks (CK) recommends a Salesforce Console application for CK's service representatives.

The service representatives work on multiple support cases hour, accessing them via queues, calls, or live chat.

Which console navigation feature would NOT be relevant to the designer recommendation?

- A. Multiple subtabs can be beneath a single parent record.
- B. More than one detail item can be open at a time.
- C. A split list of records and individual record detail can see on the same screen.
- D. Service representatives with lower resolution monitors will have a better user experience.

**Answer: A**

#### NEW QUESTION # 93

During user interviews, a UX Designer discovers that the most common daily task for users is to look for and view commonly used reports using the global search bar.

What should be done to improve their experience?

- A. Add the Daily Task component to the Home page.
- B. Make the global search bar bigger on every page.
- C. Create a mood board to communicate the visual style of the UI.
- D. Update the Home page with access to commonly used reports.

**Answer: B**

#### NEW QUESTION # 94

A UX Designer at Cloud Kicks is having difficulty getting its developers to see why the design changes would improve the user experience.

How should the designer help mitigate pushback from developers?

- A. Get buy-in from the development lead first and let them persuade others.
- B. Share research notes from previous projects with them
- C. Work together on setting up UX Indicators.

**Answer: C**

Explanation:

Explanation

The best way for the designer to help mitigate pushback from developers is to work together on setting up UX Indicators. UX Indicators are a set of metrics that measure the user experience of a product or feature, such as usability, satisfaction, engagement, and adoption<sup>1</sup>. By working together on setting up UX Indicators, the designer and the developers can align on the goals and

expectations of the design changes, and use data and evidence to evaluate their impact. This can help to reduce the subjective opinions and assumptions that might cause pushback, and foster a collaborative and user-centered culture. Sharing research notes from previous projects with them (A) might not be very helpful, as the research might not be relevant or applicable to the current project, and the developers might not trust or understand the research methods or findings. Getting buy-in from the development lead first and let them persuade others (B) might not be very effective, as it might create a top-down or hierarchical approach that does not involve the developers in the design process, and might make them feel excluded or ignored.
