可靠的Analytics-Con-201考題和資格考試的領導者與更正的Salesforce Salesforce Certified CRM Analytics and Einstein Discovery Consultant

VCESoft是個可以為所有有關於IT認證考試提供資料的網站。VCESoft可以為你提供最好最新的考試資源。選擇VCESoft你可以安心的準備你的Salesforce Analytics-Con-201考試。我們的培訓材料可以保證你100%的通過Salesforce Analytics-Con-201認證考試，如果沒有通過我們將全額退款並且會迅速的更新考試練習題和答案，但這幾乎是不可能發生的。VCESoft可以為你通過Salesforce Analytics-Con-201的認證考試提供幫助，也可以為你以後的工作提供幫助。雖然有很多方法可以幫你達到你的這些目的，但是選擇VCESoft是你最明智的選擇，VCESoft可以使你花時間更短金錢更少並且更有把握地通過考試，而且我們還會為你提供一年的免費售後服務。

最新的 Salesforce Consultant Analytics-Con-201 免費考試真題 (Q65-Q70):

問題 #65

Cloud Kicks has informed CRM Analytics developers that they have two scenarios with restricted row-level security. The parameters being:

1. Non-CXOs and VPs working in EMEA can have access to EMEA records only.
2. CXOs and VPs should have access to all data irrespective of the region (APAC, EMEA, etc.).

Which sharing method works for this scenario?

- A. Use a field on the user record like Department/Region, and apply row-level security based on that field.
- B. Create two sets of dashboards; one for EMEA, and one for CXOs and VPs while filtering the dashboard on the region.
- C. Create two separate datasets; one for EMEA, and one for CXOs and VPs.

答案: A

解題說明:

For Cloud Kicks' requirements regarding access to data based on roles and geographic regions, the most efficient and scalable approach is to implement row-level security using fields on the user record, like Department or Region. Here's the rationale for choosing this approach:

* Scalability and Maintenance: By applying security rules based on user record fields, Cloud Kicks can manage access dynamically without needing to maintain multiple dashboards or datasets. This reduces administrative overhead and simplifies updates as roles or regional structures change.

* Flexibility: Using a field on the user record to control access allows for easy expansion or modification of security policies as new regions or roles are added.

* Simplicity: This method ensures a clear and straightforward security model that can be easily audited and understood by administrators and compliance teams.

問題 #66

A CRM Analytics consultant is performing column profiling on dimension column in a recipe. Newly-added rows are not being considered in the Results tab of the profile even though a sync was run for that specific object.

What is causing the issue?

- A. The sample does not include changes to the connected object data within the last 24 hours.
- B. Sync operation has not run properly with the new dimension column in the recipe.
- C. Column profiling is not applicable on a dimension column in a recipe.

答案: A

問題 #67

A CRM Analytics administrator is working on deploying a dashboard and a dataset from a developer sandbox to a full sandbox. They have deployed the dataset via change set and manually copy-pasted the dashboard JSON into the target org. However, they notice that the conditional formatting and the widget-specific number formats have been lost in the target environment.

What is causing this issue?

- A. Analytics Dataset XMD was NOT included as part of the deployment package.
- B. The recipe that generated the dataset also needs to be included as part of the package.
- C. Analytics Dashboard XMD was NOT included as part of the deployment package.

答案: A

解題說明:

When deploying a dataset and dashboard between environments in CRM Analytics, it's essential to include the Extended Metadata (XMD) file, which controls aspects such as conditional formatting and number formatting. In this case, the administrator manually copied the dashboard JSON but did not deploy the Analytics Dataset XMD, which leads to the loss of conditional formatting and widget-specific number formats in the target environment. Including the XMD ensures that all formatting and metadata are transferred correctly.

問題 #68

A CRM Analytics consultant at Cloud Kicks wants to create a new dashboard that uses custom GeoJSON to display data; however, they are unable to upload the file via the user interface (UI).

Which action should the consultant take?

- A. Add the system permission "Manage Analytics Custom Maps" to the permission set used.
- B. Upload the GeoJSON via the API because it is NOT a function in the UI.
- C. Enable Custom maps with GeoJSON in the analytics settings.

答案： B

解題說明：

If a consultant at Cloud Kicks needs to use custom GeoJSON files for dashboard visualization and cannot upload the file via the CRM Analytics user interface (UI), the recommended action is to use the API for this purpose. Here's why this approach is suggested:

* **Functionality Limitation in UI:** Currently, the CRM Analytics UI does not support direct uploads of GeoJSON files, which necessitates an alternative method.

* **API Flexibility:** The API provides a more flexible route for uploading custom GeoJSON files, allowing consultants to integrate more complex or larger datasets that are not supported through standard UI functionalities.

* **Customization and Control:** Using the API also offers greater control over how GeoJSON data is handled, processed, and utilized within CRM Analytics, catering to more advanced customization needs.

This method ensures that the consultant can fully utilize CRM Analytics' capabilities for creating highly customized geographic visualizations, thereby enhancing the analytical value of the dashboards.

問題 #69

A user is able to access the dashboards, lenses, and datasets of a particular app but is unable to change the name of the specific app.

What is causing the issue?

- A. The user does not have Editor access for that app.
- B. The app name cannot be changed once created.
- **C. The user does not have Manager access for that app.**

答案： C

解題說明：

In CRM Analytics, the ability to modify the name of an app or make other significant changes typically requires Manager access. This level of access is distinct from Editor or Viewer permissions, which may allow for modifications to contents within the app but not to the app's core properties like its name. Here's the reasoning:

* **Access Restrictions:** Manager access is specifically designed to control structural changes within the app, including renaming the app, which is considered a higher privilege operation.

* **Role-Based Access Control:** This ensures that only users with the necessary permissions can make significant changes, protecting the integrity and configuration of the app.

Ensuring users have the appropriate level of access based on their responsibilities is a fundamental aspect of managing security and functionality in CRM Analytics.

問題 #70

.....

不要再因為準備一個考試浪費太多的時間了。快點購買VCESoft的Analytics-Con-201考古題吧。有了這個考古題，你將更好地知道該怎麼準備考試才更有效率。這是一個可以讓你輕鬆就通過考試的難得的工具，錯過這個機會你將會後悔。所以，不要猶豫趕緊行動吧。
