Salesforce Certified Experience Cloud Consultant Sample Questions (Q135-Q140):

NEW QUESTION # 135

Cloud Kicks has packaged its Customer Support Community. The community includes navigation menu items that link to standard and custom objects.

Which two points should the Experience Cloud consultant consider when reviewing the package? Choose 2 answers

- **A. Custom list views for standard objects are not included as dependencies.**
- B. Custom list views for custom objects are not included as dependencies.
- **C. Custom list views for custom objects are included as dependencies.**
- D. Custom list views for standard objects are included as dependencies.

Answer: A,C

NEW QUESTION # 136

An administrator for Cloud Kicks wants to create a new partner user for an existing site.

Which step does the administrator need to perform right before providing user details and saving the user record?

- A. Click "Manage Partner User" on the Contact detail page, then click "Enable Customer User".
- B. Click "Manage Partner User" on the Account detail page, then click "Enable Partner User".
- **C. Click "Manage External User" on the Contact detail page, then click "Enable Partner User".**
- D. Click "New" on the User Setup page in Lightning Experience.

Answer: C

Explanation:

To create a new partner user for an existing site, you need to first create a contact record for the partner user, then click "Manage External User" on the contact detail page, and then click "Enable Partner User". This will allow you to provide user details and save the user record.

NEW QUESTION # 137

Universal Containers (UC) maintains multiple customer experiences, but only one profile for No customer has access to more than one experience Which two steps should the UC admin take to grant access to each customer?

Choose 2 answers

- **A. Select a permission set for a given experience**
- **B. Select the profile for a given experience**
- C. Create a permission Set
- D. Edit the applicable user profile

Answer: A,B

Explanation:

Two steps that the UC admin should take to grant access to each customer are B and C. To grant access to an Experience Cloud site, you need to assign a license type, a profile, and a permission set to each user. A license type determines what features and functionality a user can access on the site. A profile determines what objects and fields a user can see and edit on the site. A permission set determines what additional permissions and settings a user can have on the site. To assign a profile and a permission set for a given experience, you need to select them from the drop-down menus in the Admin Workspace of your Experience Builder tool.

NEW QUESTION # 138

Choose 3 answers

- A. Guest user external organization-wide defaults are always set to Public.
- B. Guest user external organization-wide default are always set to Private.
- C. Guest user can't be members of public groups or queues.
- D. Guest user can't records via manual existing records
- E. Guest user can't access records via manual sharing

Answer: B,C,E

NEW QUESTION # 139

Universal Containers (UC) maintains multiple customer-facing sites, but only one profile for all customer users. No customer has access to more than one site.
Which step should the UC system administrator take to grant customers access to the appropriate site?

- A. Assign the profile to the site membership.
- B. Enable the Customer Identity profile or permission set.
- C. Create and assign a permission set to the users and site.
- D. Add user to the All Customer Portal Users public group.

Answer: A

Explanation:

This option allows UC to grant customers access to the appropriate site. Site membership is a feature that defines which users can access a site and what permissions they have. UC can assign the profile for all customer users to the site membership of each site and specify the default page access and object permissions for that profile. UC can also assign permission sets to the site membership to grant additional permissions to specific users⁴
