Salesforce Certified Experience Cloud Consultant Sample Questions (Q101-Q106):

NEW QUESTION # 101
Bloomington Caregivers (BC) has created a customer Experience site using Experience Cloud that gives customers the ability to pay this, manage appointments, and open cases with support. BC also has a partner Experience site on Experience Cloud. The company's leadership has now decided to extend access to the customer Experience site to its partners and internal Salesforce users so they can collaborate more effectively.

What is the recommended way to add partners and internal users to the customer Experience site?

- A. Configure SSO between the partner site and customer site so partners get access. Also configure SSO between internal org and the customer site so internal users get access to the customer site.
- B. Enable the partner accounts and the internal accounts as customers; the users under these accounts will then automatically gam access to the customer site.
- C. Create business accounts for partners and internal users, enable the accounts as customers, and then create users under these accounts by creating contacts.
- D. Add the existing partner profiles and internal user profiles to the customer Experience site; this will automatically give users access to the customer site.

Answer: B

Explanation:
To add partners and internal users to the customer Experience site, the recommended way is to enable the partner accounts and the internal accounts as customers; the users under these accounts will then automatically gain access to the customer site. A customer account is an account that has the Is Customer checkbox enabled. This indicates that the account is part of your customer network and can access your customer Experience site. To enable an existing account as a customer, you need to edit the account record and check the Is Customer checkbox. This will automatically grant access to the customer site to all the users under that account, without creating new user records or profiles.

NEW QUESTION # 102
How can Sharing Sets be used to share records with Customer Community users?

- A. Create one Sharing Set, select the 'All Objects options for the Sharing Set, and add the Customer Community profiles to the Sharing Set.
- B. Create one Sharing Set and add the objects to share in the Sharing Set.
- C. Create one Sharing Set and use a Sharing Rule to share records with users in the Sharing Set.
- D. Create one Set per object and add the Customer Community profiles to each Sharing Set.

Answer: B

NEW QUESTION # 103
Cloud Kicks (CK) is planning to build a social intranet site as well as an HR help site for its employees using Experience Cloud. Most employees either work in sales or service and currently use Salesforce.
Which user license should be recommended for CK's employees to access Experience Cloud sites?

- A. Platform Portal
- B. Salesforce Unlimited
- C. Customer Community
- D. Salesforce Authenticated Site

Answer: B

Explanation:
To access Experience Cloud sites, CK's employees should use the Salesforce Unlimited user license. This license allows employees to access Salesforce and Experience Cloud sites with the same login and credentials.
It also provides unlimited custom objects, tabs, and apps, as well as enhanced storage and support. The Salesforce Unlimited user license is the most comprehensive and flexible license for Salesforce users.

NEW QUESTION # 104
Ursa Major Solar (UMS) is building a portal for its premium B2B customers, Customer will be able to access their account information, open cases, download NDAs, and create dashboards Which user license allows UMS to meet these requirements?

- A. Platform Portal
- B. Commerce Portal
- C. Customer Community
- D. Channel Account

Answer: D

NEW QUESTION # 105
Which three items are reportable by a site administrator through Google Analytics for Experience Cloud sites?
Choose 3 answers

- A. Page View by Salesforce Object
- B. Contact Support page Activity
- C. Search Activity
- D. Number of Case Created by user
- E. User Login History Option

Answer: B,C,E

Explanation:
Three items that are reportable by a site administrator through Google Analytics for Experience Cloud sites are B, C, and E. Google Analytics is a tool that allows you to measure and analyze the traffic and behavior of your Experience Cloud site visitors. Google Analytics can report on various items, such as:
Search Activity: This item shows how users search for content on your site, such as the number of searches, the search terms used, the number of results returned, and the click-through rate.
User Login History Option: This item shows how users log in to your site, such as the number of logins, the login methods used, the login duration, and the login frequency.
Contact Support page Activity: This item shows how users interact with your contact support page, such as the number of visits, the bounce rate, the average time on page, and the conversion rate.
