We guarantee that you can pass the exam at one time even within one week based on AZ-305 Exam Braindumps regularly 98 to 100 percent of former exam candidates have achieved their success by them. We provide tracking services to all customers who purchase our AZ-305 learning questions 24/7.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q317-Q322):

### NEW QUESTION # 317

You plan to deploy multiple instances of an Azure web app across several Azure regions.

You need to design an access solution for the app. The solution must meet the following replication requirements:

- \* Support rate limiting
  - \* Balance requests between all instances.
  - \* Ensure that users can access the app in the event of a regional outage
- Solution: You use Azure Load Balancer to provide access to the app.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

### NEW QUESTION # 318

You need to ensure that users managing the production environment are registered for Azure MFA and must authenticate by using Azure MFA when they sign in to the Azure portal. The solution must meet the authentication and authorization requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

### NEW QUESTION # 319

You plan to use Azure Storage to store data assets.

You need to identify the procedure to fail over a general-purpose v2 account as part of a disaster recovery plan. The solution must meet the following requirements:

\* Apps must be able to access the storage account after a failover.

\* You must be able to fail back the storage account to the original location.

\* Downtime must be minimized.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Answer:

Explanation:

1 - Before a failover, configure zone-redundant storage (ZRS) replication for the storage account.

2 - Initiate failover.

3 - After a failover, configure geo-redundant storage (GRS) replication for the storage account.

### NEW QUESTION # 320

You have an on-premises named App 1.

Customers use App 1 to manage digital images.

You plan to migrate App 1 to Azure.

You need to recommend a data storage solution for App 1. The solution must meet the following image storage requirements:

Encrypt images at rest.

Allow files up to 50M

#### Answer:

Explanation:

### NEW QUESTION # 321

You need to recommend a solution that meets the file storage requirements for App 2.

What should you deploy to the Azure subscription and the on-premises network? To answer, drag the appropriate services to the correct locations. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:
