Relevant C-SEC-2405 Answers | Reliable C-SEC-2405 Exam Syllabus

These SAP C-SEC-2405 exam practice tests identify your mistakes and generate your result report on the spot.To make your success a certainty, iPassleader offers free updates on our SAP C-SEC-2405 real dumps for up to three months. It means all users get the latest and updated SAP C-SEC-2405 practice material to clear the SAP Certified Associate - Security Administrator C-SEC-2405 certification test on the first try. We are a genuine brand working to smoothen up your C-SEC-2405 exam preparation.

SAP Certified Associate - Security Administrator Sample Questions (Q81-Q86):

NEW QUESTION # 81
Which object type is assigned to activated OData services in transaction SU24?

- A. IWSG
- B. G4BA
- C. IWSV
- D. HTTP

Answer: C

Explanation:
* Context:Activated OData services are linked with specific object types for authorization maintenance.
* Solution Explanation:
* IWSV:Assigned to activated OData services in SU24, representing individual service definitions.
SAP Security References:
* SAP SU24 Role Maintenance Guide
* SAP Gateway and OData Authorization Documentation

NEW QUESTION # 82
To connect to data sources that are NOT all based on OData, which of the following options does SAP recommend you use?

- A. OData Provisioning service
- B. SAP Integration Suite
- C. SAP Process Integration
- D. Cloud connector

Answer: B

Explanation:
TheSAP Integration Suiteis recommended for connecting to data sources that are not solely based on OData.
It provides:
* Support for Multiple Protocols:
* Integrates with SOAP, REST, OData, and non-OData-based services.
* Prebuilt Content:
* Includes prebuilt integration flows to connect with a variety of systems and applications.
* Scalability and Flexibility:
* Designed for hybrid landscapes, supporting both cloud and on-premise systems.
SAP Security References:
* SAP Integration Suite Overview
* SAP Help Portal: Multi-Protocol Integration with SAP Integration Suite

NEW QUESTION # 83
What happens to data within SAP Enterprise Threat Detection during the aggregation process? Note: There are 3 correct answers to this question.

- A. It is categorized.
- B. It is prioritized.
- C. It is normalized.
- D. It is enriched.
- E. It is pseudonymized.

Answer: C,D,E

Explanation:
During the aggregation process in SAP Enterprise Threat Detection, data undergoes several transformations to enhance security analysis. It is pseudonymized, replacing sensitive identifiers (e.g., user IDs) with pseudonyms to protect privacy while maintaining data utility for threat detection. Data is normalized, converting heterogeneous data formats from various sources into a standardized structure, ensuring consistency for analysis across systems. Additionally, data is enriched by adding contextual information, such as system metadata or threat intelligence, to improve the accuracy of threat identification. These processes enable SAP Enterprise Threat Detection to efficiently analyze large volumes of data while safeguarding sensitive information. Prioritization is not part of aggregation, as it relates to post-analysis actions, and categorization occurs during analysis, not aggregation. By pseudonymizing, normalizing, and enriching data, SAP Enterprise Threat Detection ensures robust threat detection capabilities, supporting real-time monitoring and compliance with data protection regulations in SAP environments.

NEW QUESTION # 84

Which authorization objects can be used to restrict access to SAP Enterprise Search models in the SAP Fiori launchpad? Note: There are 2 correct answers to this question.

- A. S_ESH_CONN
- B. SDDLVIEW
- C. S_ESH_ADM
- D. RSDDLTIP

Answer: A,B

Explanation:
To restrict access to SAP Enterprise Search models in the SAP Fiori launchpad, the authorization objects SDDLVIEW and S_ESH_CONN are used. SDDLVIEW controls access to data definition language (DDL) views, which are often underlying components of search models, ensuring that only authorized users can access or execute these views within the Fiori environment. S_ESH_CONN governs access to enterprise search connectors, which link search models to the Fiori launchpad, allowing administrators to restrict which users can utilize specific search functionalities. These objects provide granular control over search model access, aligning with security and segregation of duties requirements. S_ESH_ADM is used for administrative tasks related to enterprise search, not direct model access, and RSDDLTIP is not a standard SAP authorization object. By leveraging SDDLVIEW and S_ESH_CONN, SAP ensures that search capabilities in the Fiori launchpad are securely managed, preventing unauthorized access to sensitive data while enabling efficient search functionality for authorized users.

NEW QUESTION # 85
In the SAP BTP Cockpit, at which level is Trust Configuration available? Note: There are 2 correct answers to this question.

- A. Subaccount
- B. Global Account
- C. Organization
- D. Directory

Answer: A,B

Explanation:
In the SAP Business Technology Platform (BTP) Cockpit, Trust Configuration is available at both the Global Account and Subaccount levels. At the Global Account level, trust configurations define the identity provider (IdP) settings that apply across all subaccounts within the account, enabling centralized management of authentication for the entire BTP environment. This allows administrators to establish a default IdP or configure custom IdPs for consistent user authentication. At the Subaccount level, trust configurations provide flexibility to override or customize the IdP settings specific to individual subaccounts, accommodating unique requirements for different applications or services. This dual-level approach ensures that organizations can balance global standardization with localized control. The Directory and Organization levels are not used for trust configurations in SAP BTP, as these are not part of the platform's security configuration hierarchy, making options C and D incorrect.

NEW QUESTION # 86
......

C-SEC-2405 exam dumps allow free trial downloads. You can get the information you want to know through the trial version. After downloading our study materials trial version, you can also easily select the version you like, as well as your favorite C-SEC-2405 Exam Prep, based on which you can make targeted choices. Our study materials want every user to understand the product and be able to really get what they need.
