CyberArk CPC-CDE-RECERT Valid Exam Pass4sure & CPC-CDE-RECERT Braindump Free

You can also be a part of this wonderful community. To do this you just need to pass the CyberArk CPC-CDE-RECERT certification exam. Are you ready to accept this challenge? Looking for the proven and easiest way to crack the CyberArk CPC-CDE-RECERT Certification Exam? If your answer is yes then you do not need to go anywhere. Just download VCETorrent CPC-CDE-RECERT exam practice questions and start CyberArk CDE-CPC Recertification (CPC-CDE-RECERT) exam preparation without wasting further time.

CyberArk CDE-CPC Recertification Sample Questions (Q90-Q95):

NEW QUESTION # 90

After a scripted installation has successfully installed the PSM, which post-installation task is performed?

- A. The screen saver for the PSM local users is disabled.
- B. Remote desktop services are installed.
- C. The PSMAdminConnect user password is reset.
- D. A new group called PSMShadowUsers is created.

Answer: A

Explanation:

After the successful scripted installation of the Privileged Session Manager (PSM), one of the post-installation tasks is to disable the screen saver for the PSM local users. This is done to ensure that the PSMConnect and PSMAdminConnect users, which are created during the installation process, do not have a screen saver activated that could interfere with the operation of the PSM.

:

CyberArk documentation on PSM post-installation tasks1.

CyberArk documentation on disabling the screen saver for PSM local users

NEW QUESTION # 91

Which Safe(s) does the AllowedSafes=Win platform parameter configuration match? (Choose two.)

- A. WindowsPasswords
- B. win-ssh-keys
- C. SQL-Win-SA
- D. WiNdOwS_Accts
- E. CXD-WIN-ADMINS

Answer: A,C

Explanation:

AllowedSafes is a regular expression and is case sensitive.

The regex Win (with no anchors) will match any Safe name that contains the exact substring "Win" with the same case:

* WindowsPasswords # starts with Win #

* SQL-Win-SA # contains Win #

* win-ssh-keys # contains win (lowercase) # (case sensitive)

* CXD-WIN-ADMINS # contains WIN (all caps) #

* WiNdOwS_Accts # mixed case, does not contain the exact substring Win # Therefore the correct choices are A and D.

NEW QUESTION # 92

What is the correct CyberArk user to use when installing the Privilege Cloud Connector software?

- A. Installer
- B. Administrator
- C. <subdomain>_admin
- D. installeruser@<suffix>

Answer: D

NEW QUESTION # 93

What is determined by the MaxConcurrentConnections setting within a platform?

- A. Maximum number of concurrent connections that can be opened between the CPM and the remote machines for the platform
- B. Maximum number of concurrent connections allowed for a specific account on the platform through the PSM
- C. Maximum number of concurrent connections that can be between the PSM and the remote machines for the platform
- D. Maximum number of concurrent connections to the Vault allowed for sending audit activities relating to the platform

Answer: A

Explanation:

CyberArk defines MaxConcurrentConnections as: "The maximum number of connections that can be opened between the Central Policy Manager and the remote machine where the passwords are replaced." That is exactly option A.

NEW QUESTION # 94

Before you can delete a Safe, you must first delete all of its content (accounts and files) permanently. What else must also be achieved before the Safe can be successfully deleted?

- A. The version retention period has expired for all files.
- B. The "Save account versions for a period of:" has been set to 0 within the Safe version retention settings.
- C. The Safe owners have been removed from the Safe membership.
- D. The associated CPM user has been removed from the Safe.

Answer: A

Explanation:

CyberArk states that a Safe can be deleted only after its contents are deleted permanently, and (critically) objects are only deleted permanently after their retention/versions retention has passed. In the Privilege Cloud Safe management documentation, it notes that accounts are deleted permanently only after their retention period has passed, which is why deletion can be blocked by "non-expired" objects.

The underlying Vault/PACLI behavior is also explicit: "It is only possible to delete a Safe after the version retention period has expired for all files contained in the Safe." So, beyond deleting the content, the version retention period must have expired for all files # B.

NEW QUESTION # 95

.....

Three formats of CyberArk CPC-CDE-RECERT practice material are always getting updated according to the content of real CyberArk CPC-CDE-RECERT examination. The 24/7 customer service system is always available for our customers which can solve their queries and help them if they face any issues while using the CPC-CDE-RECERT Exam product.
