If you are satisfied with our GH-500 training guide, come to choose and purchase.

Microsoft GitHub Advanced Security Sample Questions (Q82-Q87):

NEW QUESTION # 82

Which CodeQL query suite provides queries of lower severity than the default query suite?

- A. `github/codeql/cpp/ql/src@main`
- B. `github/codeql-go/ql/src@main`
- C. `security-extended`

Answer: C

Explanation:

The security-extended query suite includes additional CodeQL queries that detect lower severity issues than those in the default security-and-quality suite.

It's often used when projects want broader visibility into code hygiene and potential weak spots beyond critical vulnerabilities.

The other options listed are paths to language packs, not query suites themselves.

NEW QUESTION # 83

Which of the following Watch settings could you use to get Dependabot alert notifications? (Each answer presents part of the solution. Choose two.)

- **A. The Custom setting**
- **B. The All Activity setting**
- C. The Ignore setting
- D. The Participating and @mentions setting

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation:

To receive Dependabot alert notifications for a repository, you can utilize the following Watch settings:

Custom setting: Allows you to tailor your notifications, enabling you to subscribe specifically to security alerts, including those from Dependabot.

All Activity setting: Subscribes you to all notifications for the repository, encompassing issues, pull requests, and security alerts like those from Dependabot.

The Participating and @mentions setting limits notifications to conversations you're directly involved in or mentioned, which may not include security alerts. The Ignore setting unsubscribes you from all notifications, including critical security alerts.

NEW QUESTION # 84

Which key is required in the update settings of the Dependabot configuration file?

- A. assignees
- **B. package-ecosystem**
- C. commit-message
- D. rebase-strategy

Answer: B

Explanation:

In a dependabot.yml configuration file, package-ecosystem is a required key. It defines the package manager being used in that update configuration (e.g., npm, pip, maven, etc.).

Without this key, Dependabot cannot determine how to analyze or update dependencies. Other keys like rebase-strategy or commit-message are optional and used for customizing behavior.

NEW QUESTION # 85

When secret scanning detects a set of credentials on a public repository, what does GitHub do?

- A. It sends a notification to repository members.
- B. It displays a public alert in the Security tab of the repository.
- C. It scans the contents of the commits for additional secrets.
- **D. It notifies the service provider who issued the secret.**

Answer: D

Explanation:

When a public repository contains credentials that match known secret formats, GitHub will automatically notify the service provider that issued the secret. This process is known as "secret scanning partner notification". The provider may then revoke the secret or contact the user directly.

GitHub does not publicly display the alert and does not send internal repository notifications for public detections.

NEW QUESTION # 86

Which security feature shows a vulnerable dependency in a pull request?

- A. Dependency graph
- B. Dependabot alert
- C. The repository's Security tab
- D. Dependency review

Answer: D

Explanation:

Dependency review runs as part of a pull request and shows which dependencies are being added, removed, or changed - and highlights vulnerabilities associated with any added packages.

It works in real-time and is specifically designed for use during pull request workflows.

The dependency graph is an overview, Dependabot alerts notify post-merge, and the Security tab shows the aggregated alert list.

NEW QUESTION # 87

.....

On the one hand, our company hired the top experts in each qualification examination field to write the GH-500 training materials, so as to ensure that our products have a very high quality, so that users can rest assured that the use of our research materials. On the other hand, under the guidance of high quality research materials, the rate of adoption of the GH-500 Study Materials preparation is up to 98% to 100%.
