NCP-US-6.10 Reliable Test Duration - NCP-US-6.10 Valid Exam Dumps

The passing rate of our NCP-US-6.10 exam materials are very high and about 99% and so usually the client will pass the NCP-US-6.10 exam successfully. If any questions or doubts on the NCP-US-6.10 training material exist, the client can contact our online customer service or send mails to contact us and we will solve them as quickly as we can. We always want to let the clients be satisfied and provide the best NCP-US-6.10 Test Torrent and won't waste their money and energy. As long as you bought our NCP-US-6.10 practice guide, you will love it for sure.

The ExamPrepAway is one of the leading platforms that has been offering real and valid Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 (NCP-US-6.10) exam practice test questions. These Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 (NCP-US-6.10) exam questions are designed and verified by Nutanix NCP-US-6.10 subject matter experts. They work closely together and put all their expertise to check the Nutanix NCP-US-6.10 exam questions one by one.

Seeing NCP-US-6.10 Reliable Test Duration - Get Rid Of Nutanix Certified Professional - Unified Storage (NCP-US) v6.10

Authentic Solutions Of The Nutanix NCP-US-6.10 Exam Questions. Consider sitting for an Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 and discovering that the practice materials you've been using are incorrect and useless. The technical staff at ExamPrepAway has gone through the Nutanix certification process and knows the need to be realistic and exact. Hundreds of professionals worldwide examine and test every Nutanix NCP-US-6.10 Practice Exam regularly.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Sample Questions (Q12-Q17):

NEW QUESTION # 12
An administrator has a Nutanix Files deployment hosted on an AHV-based Nutanix cluster, scaled out to four FSVMs hosting several department shares. In the event of a ransomware attack, files need to be quickly recovered from a self-hosted snapshot. How can this be accomplished?

- A. Configure an Async DR Protection Domain.
- B. Configure a DR Availability Zone.
- C. Use File Analytics to enable self-service restore.
- D. Install NGT and enable self-service restore.

Answer: D

Explanation:

Self-Service Restore (SSR) requires Nutanix Guest Tools (NGT) installed on client VMs. SSR allows end users to directly restore files/folders from snapshots via Windows Previous Versions or macOS Time Machine, enabling rapid ransomware recovery without IT intervention.

* Option A/C: Async DR and Availability Zones are for disaster recovery (site-level), not granular file recovery.
* Option D: File Analytics provides insights but cannot enable restores.
Reference:Nutanix Files Administration Guide:
"Enable Self-Service Restore by installing NGT on client VMs and configuring SSR on SMB shares. Users access snapshots via 'Previous Versions' tab in Windows Explorer."(Chapter: "Self-Service Restore Configuration")Nutanix NCP-US Study Guide:"NGT-based SSR is the primary method for user-driven recovery of snapshots post-ransomware."(Section: "Files Data Protection")

NEW QUESTION # 13
Question:
What is the default cold data threshold within the File Analytics Data Age widget?

- A. Last accessed within the last one to two weeks
- B. Last accessed within the last week
- C. Last accessed within the last two to four weeks
- D. Last accessed longer than four weeks ago

Answer: D

Explanation:

In Nutanix Files,File Analyticsprovides insights into how files are used over time to help with capacity planning and data lifecycle management. TheData Age widgetspecifically identifiescold data, which typically includes older, less frequently accessed files. Thedefault cold data thresholdis:
"Files that have not been accessed forlonger than four weeksare considered cold data." This is aligned with best practices for identifying data that can be tiered to cheaper storage or archived to maintain performance and reduce costs.
The NUSA course materials emphasize:
"The default threshold for cold data classification in File Analytics isfour weeks. Administrators can customize this threshold to meet business or regulatory requirements." Thus,files not accessed for over four weeksare flagged ascoldby default in the Data Age widget.

NEW QUESTION # 14
An administrator wants to use Smart DR to ensure that in the event of an unplanned loss of service, users are redirected automatically to the recovery site. What can satisfy this requirement?

- A. Configure AD and DNS access for seamless client failover.
- B. Register PE clusters to PC before enabling the Files Manager.
- C. Configure Protection Policy replication schedule.
- D. Register Nutanix Files with the same PC.

Answer: A

Explanation:

To ensure that users are automatically redirected to the recovery site during an unplanned loss of service when usingSmart DRfor Nutanix Files, the administrator mustconfigure Active Directory (AD) and DNS access for seamless client failover. Smart DR enables disaster recovery by replicating file shares between primary and recovery sites, and automatic client redirection requires proper configuration of AD and DNS to update client access to the recovery site's file server.
TheNutanix Unified Storage Administration (NUSA)course states, "For Smart DR to support seamless failover in Nutanix Files, AD and DNS must be configured to redirect clients to the recovery site's file server VIP automatically during a failover event." This

involves ensuring that the file server's DNS name resolves to the recovery site's VIP and that AD authentication is available at the recovery site to maintain user access to file shares.

TheNutanix Certified Professional - Unified Storage (NCP-US)study guide elaborates that "Smart DR failover requires AD and DNS integration to update the file server's DNS records to point to the recovery site' s VIP, ensuring clients are redirected without manual intervention." This configuration allows clients to continue accessing file shares using the same DNS name, with the underlying IP address switching to the recovery site's VIP during failover.

The other options are incorrect or insufficient:

* Configure Protection Policy replication schedule: While configuring a replication schedule is necessary for Smart DR to replicate data, it does not address the requirement for automatic client redirection, which depends on AD and DNS.

* Register PE clusters to PC before enabling the Files Manager: Registering Prism Element (PE) clusters to Prism Central (PC) is a prerequisite for managing Nutanix Files, but it does not directly enable automatic client redirection for Smart DR.

* Register Nutanix Files with the same PC: While Nutanix Files instances may be managed by the same Prism Central, this does not ensure automatic client redirection, which requires AD and DNS configuration.

The NUSA course documentation highlights that "Smart DR leverages AD and DNS to provide seamless failover, ensuring clients are automatically redirected to the recovery site's file server without service interruption." References:

Nutanix Unified Storage Administration (NUSA) Course, Section on Nutanix Files: "Smart DR configuration and failover requirements." Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 2: Configure and Utilize Nutanix Unified Storage, Subtopic: "Smart DR and client failover configuration." Nutanix Documentation (https://www.nutanix.com), Nutanix Files Administration Guide: "Configuring AD and DNS for Smart DR failover."

NEW QUESTION # 15

An administrator is implementing two production networks for Nutanix Objects:
* Objects Storage Network (internal)
* Objects Public Network (external)In which two ways is it recommended the administrator configure these networks? (Choose two.)

- A. Objects Storage Network and Objects Public Network on the same Virtual Network.
- B. Objects Storage Network and Objects Public Network on different Virtual Networks.
- C. Objects Storage Network on the same network as the Controller VM (CVM).
- D. Objects Storage Network on a different network to the Controller VM (CVM).

Answer: B,D

Explanation:
Network isolation is critical for security and performance:
* Option C: Storage (internal) and Public (external) networks must be on separate VLANs/virtual networks to prevent unauthorized access to internal traffic.
* Option D: The Storage Network should be isolated from the CVM network to avoid AOS cluster interference.
* Incorrect:
* A: CVMs manage AOS storage; Objects Storage Network should not share this segment.
* B: Combining networks violates security best practices.
Reference:Nutanix Objects Deployment Guide:
"Place Objects Storage Network on a dedicated internal network, segregated from Public Networks and CVM traffic. Use distinct virtual networks for each."(Chapter: "Network Segmentation Best Practices")Nutanix NUSA Course:"Isolate Storage Network (backend) from Public Network (client-facing) and CVM network to ensure cluster stability and security."(Module: "Objects Network Design")

NEW QUESTION # 16

An administrator has been asked to classify data in Data Lens to help with monitoring data usage.
Data Lens uses the file category configuration to do what?

- A. Classify Owner
- B. Classify File Size
- C. Classify Access Time
- D. Classify File Extensions

Answer: D

Explanation:

Data Lens classifies files primarily by file extensions (e.g., .pdf, .xlsx) to:
* Group files into categories (Documents, Media, Code, etc.).
* Track storage usage/access patterns by type.
Other options are invalid:
* A/B/D: File size, access time, and ownership are attributes but not classification criteria. Data Lens uses extensions as the default classifier.
Reference:Nutanix Data Lens Administration Guide:
"File categories are auto-defined by file extensions. Custom rules can map extensions to categories like
'Financial Documents' or 'Videos'."(Chapter: "Data Classification Policies") Nutanix Unified Storage (NCP-US) Study Guide:
"Extension-based classification enables granular monitoring (e.g., identifying PST file sprawl). Ownership
/size are filters, not classifiers."(Section: "Data Lens Analytics")

NEW QUESTION # 17

......

We try our best to renovate and update our Nutanix NCP-US-6.10 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate. At the same time, Nutanix NCP-US-6.10 Preparation baindumps can keep pace with the digitized world by providing timely application. You will never fell disappointed with our NCP-US-6.10 exam quiz.

NCP-US-6.10 Valid Exam Dumps: https://www.examprepaway.com/Nutanix/braindumps.NCP-US-6.10.ete.file.html

Nutanix NCP-US-6.10 Reliable Test Duration The content is written by professions who have studied the exam for many years, Since our NCP-US-6.10 Valid Exam Dumps - Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 exam study guide is electronic products, we can complete the process of trading only through the internet, which will definitely save a lot of time for you, Owing the NCP-US-6.10 certification means that you have special and professional ability in the IT industry.

Regulations require that each type of tax be shown separately, In this NCP-US-6.10 exercise you will create a custom context menu with several custom item used to print and manage the contents of an editable text field.

Pass Guaranteed 2026 High Pass-Rate NCP-US-6.10: Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Reliable Test Duration

The content is written by professions who have NCP-US-6.10 Reliable Test Duration studied the exam for many years, Since our Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 exam study guide is electronic products, we can complete the process of NCP-US-6.10 Reliable Test Duration trading only through the internet, which will definitely save a lot of time for you.

Owing the NCP-US-6.10 Certification means that you have special and professional ability in the IT industry, Passing exam won't be a problem anymore as long as you are familiar with our NCP-US-6.10 exam material (only about 20 to 30 hours practice).

With the latest NCP-US-6.10 test questions, you can have a good experience in practicing the test.
