- C. Policy are applied to all entities of an entity type.
- D. Policy are applied to an entity type in a category.

**Answer: A**

Explanation:

When multiple alert policies are applied to an entity, Nutanix uses a hierarchical approach. Policies applied to an entity type within a category take precedence. For example:

\* If a category (e.g., "Production") has policies applied to entities like VMs, and the entity matches that category, the category-specific policy will override general policies.

\* This prioritization allows administrators to fine-tune alert policies for specific workloads or environments.
