Pass Guaranteed 2026 NCP-DB-6.10: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Latest Official Practice Test

As long as you study with our NCP-DB-6.10 exam braindumps for 20 to 30 hours that we can claim that you will pass the exam for sure. We really need this efficiency. Perhaps you have doubts about this "shortest time." I believe that after you understand the professional configuration of NCP-DB-6.10 Training Questions, you will agree with what I said. What our NCP-DB-6.10 study materials contain are all the real questions and answers that will come out in the real exam.

If you are a college student, you can learn and use online resources through the student learning platform over the NCP-DB-6.10 study materials. And for an office worker, the NCP-DB-6.10 study engine is desighed to their different learning arrangement as well, such extensive audience greatly improved the core competitiveness of our NCP-DB-6.10 practice quiz, which is according to their aptitude, on-demand, maximum to provide users with better suited to their specific circumstances.

Nutanix NCP-DB-6.10 New Study Materials | NCP-DB-6.10 Latest Exam Review

Together, the after-sale service staffs in our company share a passion for our customers, an intense focus on teamwork, speed and agility, and a commitment to trust and respect for all individuals. At present, our company is a leading global provider of NCP-DB-6.10 preparation exam in the international market. I can assure you that we will provide considerate on line after sale service for you in twenty four hours a day, seven days a week. Therefore, after buying our NCP-DB-6.10 Study Guide, if you have any questions about our study materials, please just feel free to contact with our online after sale service staffs.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q85-Q90):

NEW QUESTION # 85
Era allows custom metadata to be assigned to entities (clones, time machines, databases, and database servers) by using which

component?

- A. Tags
- B. Notes
- C. Index
- D. Text

Answer: A

Explanation:
Nutanix Era allows custom metadata to be assigned to entities (clones, time machines, databases, and database servers) by using Tags. Tags are a component of Nutanix Era that allows users to assign custom metadata to various entities, enhancing the ability to organize, search, and manage these entities within the Era platform.

NEW QUESTION # 86
A database administrator logged into their NDB dashboard notices the Savings over traditional cloning metric in the Data Usage widget.
What does this number represent?

- A. The amount of disk space saved with near-zero byte clones
- B. The amount of disk space saver from compression
- C. The amount of disk space saved from deduplication
- D. The amount of disk space saved with shadow clones

Answer: A

Explanation:
The "Savings over traditional cloning" metric in the Data Usage widget on the NDB dashboard reflects the efficiency of NDB's cloning technology compared to traditional full-copy cloning methods. NDB leverages Nutanix's near-zero byte cloning capability, which creates lightweight clones by sharing base data and only storing changes (deltas). This metric specifically quantifies the disk space saved by using these efficient clones instead of duplicating entire datasets, as would occur in traditional cloning. It highlights NDB's storage optimization for database provisioning and management.

NEW QUESTION # 87
Which NDB HA control plane VM is upgraded first during an NDB upgrade?

- A. NDB Agent VMs
- B. Leader HAProxy
- C. Leader NDB API Server
- D. NDB Server

Answer: C

Explanation:
During an NDB upgrade, the upgrade process follows a specific order to maintain stability and HA. The Leader NDB API Server is upgraded first. This server coordinates API requests and ensures the control plane remains operational. Upgrading the leader first minimizes disruption, as subsequent components (e.g., other API servers, HAProxy) rely on its leadership role. Once the leader is upgraded, the remaining NDB HA control plane VMs (e.g., follower API servers, HAProxy) are updated in sequence.

NEW QUESTION # 88
Which two security options are available when configuring an SMTP server for sending alert notifications via email? (Choose two.)

- A. S/MIME
- B. DKIM
- C. TLS
- D. SSL

Answer: C,D

Explanation:
When configuring an SMTP server for sending alert notifications via email in NDB, the two security options available are SSL and TLS. These protocols encrypt the email communication between NDB and the SMTP server, ensuring the confidentiality and integrity of alert notifications.
NDB supports both options to accommodate different SMTP server configurations, with TLS being the more modern standard and SSL as a legacy option.

NEW QUESTION # 89
An administrator needs to work with databases and time machines, but not database parameter profiles. Which role satisfies this requirement?

- A. Database Infrastructure Administrator
- B. super Administrator
- C. Infrastructure Administrator
- D. Database Administrator (DBA)

Answer: D

Explanation:
In the Nutanix Database Automation (NCP-DB) framework, the role that allows an administrator to work with databases and time machines, but not database parameter profiles, is the Database Administrator (DBA). This role provides the necessary permissions to manage databases and time machines, which are essential components of the Nutanix Era solution. However, it does not grant access to database parameter profiles, which are typically managed by other roles.

NEW QUESTION # 90
.....

Although at this moment, the pass rate of our Nutanix NCP-DB-6.10 exam braindumps can be said to be the best compared with that of other exam tests, our experts all are never satisfied with the current results because they know the truth that only through steady progress can our Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 Preparation materials win a place in the field of exam question making forever.
